DIRECTIONS FOR USE

The arrangement is according to the Dewey Decimal Classification. An outline of the classification will be found on page xv. This will serve as a table of contents.

Biography is arranged as follows: (1) Works about biography, 920A; (2) Biographical dictionaries, 920D; (3) Collective biography, 920; (4) Individual biography, arranged by the subject of the biography, 92. Biographies of artists and musicians are classed with criticism of their works in the 700s; and *see* references are made under their names in class 92 to the class in which their biographies will be found. Lives of Christ are in class 232.

Lists of useful series will be found at the ends of various classes (e.g. 745, 759, 780.92, 92).

Running class numbers are carried at the top outside corner of each page; page numbers are given at the bottom of each page.

Books recommended for first purchase in small libraries are marked with a star; and those specially recommended are marked with a double star.

English publishers and prices are given after the American publishers and prices: e.g. 1932 Vanguard press $2; Paul, S. 10s 6d.

Directory of publishers will be found at the end of the Catalog.

INDEX

The index, beginning on page 1311, includes in one alphabet author, title and subject entries for all books and analytical entries for parts of books.

Analytical entries are introduced by the word *In*. These include:

1. Entries for many subjects not represented in the Catalog by entire books: e.g. Galsworthy, John; Radium
2. Many additional entries for subjects for which books are included: e.g. Bach, Johann Sebastian; Furniture; Reptiles
3. Much biographical material about artists, historical personages, scientists, etc.

PREFACE

The Introduction to this volume, written by the able and loyal associates who have carried to completion the work which was only partly finished at the time of the death of its principal editor, Minnie Earl Sears, states fully the arrangement of the book. The details which they have given need no repetition here, but the Preface may, perhaps, try to see the Catalog in perspective and estimate its value and use in the whole scheme of library service.

More than a quarter of a century ago a publisher to whose vision and courage the library world owes much that is of value in present reference tools started to develop the idea of a standard catalog to meet certain needs common to all general libraries but particularly pressing in the smaller library, often inadequately equipped to meet its own problems. In the standard catalog of his vision the material included was to be selected cooperatively, since only such selection could be counted upon to provide material needed in different types of libraries, but the making of the catalog was to be done by a central cataloging staff, since only in that way could the dangers of cooperative work—waste of time and lack of uniformity in results—be avoided. From his idea have grown not only the Standard Catalog for Public Libraries but also the larger Standard Catalog Series which now includes, besides the present volume, an important index, the Song Index, and such special catalogs as the Children's Catalog and the High School Catalog. That the basic idea for the making of such a general list was sound on its two essential points is proved by the usefulness of the preliminary sectional publication of the Standard Catalog. Cooperative selection avoids the dangers of one-man selection which are that individual preferences, special bits of knowledge or deficiencies may creep in to interfere with a well balanced whole, while central editing and cataloging make for both speed of issue and uniformity of cataloging, and the existence of a permanent cataloging staff provides for the continuity of work which is the only way in which revisions and supplements can be issued as promptly as they are needed. Publication of the series has extended over more than 25 years, from 1908 when its first number, a Fiction Catalog, appeared, but the period of most active production has been during the last ten years. In 1923 Miss Sears became the general editor of the whole series and began to develop on a large and balanced scale both the Standard Catalog itself and its surrounding circle of special catalogs and indexes. To the fact that this general editor was a catalog expert and a born organizer with a knowledge of both the making and the use of reference books, the sound and rapid growth of the series during that period was due. Two sections of the catalog had been published before 1923, Social Sciences in 1918, Biography in 1919, both edited by Corinne Bacon. Under Miss Sears' editorship there appeared in steady succession the other sections needed to round out the whole classification, Fine Arts, History and Travel, Science and Useful Arts, Literature and Philology, Philosophy, Religion and General Works, a new edition of Biography by Miss Sears, and a new edition of Social Sciences by Miss Bacon. Issued separately, preliminary to the final publication of the whole Standard Catalog, these sections not only paved the way to the combined work but also served certain purposes as special subject bibliographies which perhaps will not be served quite so well by the general volume. The Fine Arts section, for example, furnished an admirable popular bibliography in a field in which there had been no such guide since Sturgis and Krehbiel's list (1897). As providing a separate bibliography, which could be kept with an art collection, the separate section had certain practical advantages of convenience over the inclusion of the revision of the same section in the present combined catalog. Fortunately, for those who find the section issue an advantage, all of the sections are still in print and available, though not of course in the revised form in which the material is included in the present catalog. To this period of Miss Sears' editorship belong three important developments in the character of the catalog. One, particularly important from the point of view of selection, was the enlistment of international aid in the choice of titles, first from well known Canadian librarians who voted upon and recommended material found to be important in Canadian libraries and later from prominent English librarians who rendered the same service for English material. Planned as a guide for the American public library, the Standard Catalog is, of course, primarily an American list, but the international cooperation which Miss Sears

enlisted increased and enriched its value for its special purpose and gave it certain elements of usefulness in libraries outside the United States. The second development, which was to make the Catalog almost as much a reference index as a catalog, was the inclusion, in all sections except Social Sciences, of analytical indexes, which brought out much important subject matter that might otherwise have been buried. A third development during this period of intensive making was the actual growth in size of the catalog. The original project of 25 years ago had been for a modest list of 5000 titles. By the time Miss Sears had worked out her basic plan the estimated size had increased to 10,000. The completed catalog of today actually lists some 15,000 titles, counting those given in notes.

The place of the Standard Catalog in the whole scheme of library service is that it provides for the three fundamentals of that service, which are the right selection, the right cataloging and the right use of books. Its list of titles is not the unaided selection of one person, however valuable such a choice might be. The fact that it represents consensus of opinion of many experienced librarians and subject specialists who have examined both preliminary lists and the books themselves and have voted on the works which from their own knowledge of both books and library needs they would choose as the best available material for the special purposes of the Catalog, makes it particularly useful for the selection of books for purchase. Since the careful editorial examination of books thus chosen involved the comparison of different editions of the books, its aid in selection extends to editions also as well as books. Its aid extends also to the selection of books for the individual as well as for the library, making it equally a tool for the readers' adviser as well as for the order librarian. The large amount of analysis included makes it a help in the sometimes difficult decisions about discard or replacement of worn material, since a work which is thoroughly analyzed in a good index possesses a reference value after its first use for reading purposes has waned. While its primary purpose as an aid in selection was to serve small and medium sized libraries it serves also some of the same needs in large libraries. Even the largest and most scholarly library has many readers whose needs are sometimes the same as those of readers in a smaller library and such needs may be better served by the Standard Catalog than by the more comprehensive bibliographies which that library would use for other purposes. The giving of sources of all critical notes is a further help in selection, if the note needs to be followed up or its value weighed.

To the cataloger the Standard Catalog offers expert aid on many points. Its careful cataloging helps in author entry and suggested subject headings, and the giving of L. C. card numbers serves the library which uses printed cards, all points of particular importance in the smaller library, where the cataloging staff is often inadequate either in skill or in number, to the task of making the best or fullest catalog for its books. On the matter of catalog economy alone the Standard Catalog offers important aid. Of the 15,000 books included 3,200 have been fully analyzed and the analytics for these books total more than 20,000 entries, a number which would be a heavy expense in even a large library and quite out of the question for the small library. The inclusion of this large amount of analysis makes the Standard Catalog perfectly usable as a substitute for such analysis in the library's own catalog and thus used effects a very definite cut in cataloging cost.

As a reference tool the Catalog has many uses. One such use, by readers' advisers, has already been indicated. Its more special reference use comes, however, from this large amount of analysis. It was the inclusion of the detailed analytical index which Miss Sears developed that took the Catalog out of the class of books which are aids in selection only and put it definitely with those which are important as reference indexes to material on wanted subjects, sometimes to material not covered by whole books or even periodical articles available in a given library. Some of this subject indexing is duplicated by similar indexing in larger special indexes, such as the Essay Index, but a large amount is not duplicated. Even in the large library this reference feature is of use—the present writer has used it profitably in a large university library, for example. In the smaller library this inclusion of more than 20,000 author, title and subject references in the analytical index makes the book an important reference tool for the finding of material not otherwise easily findable in the library. As a reference aid then for questions of selection, for cataloging problems and for the finding of subject material with which to answer readers' questions, the Standard Catalog serves the three basic uses which its editor had in mind when she worked out its plan.

ISADORE GILBERT MUDGE

INTRODUCTION

The Standard Catalog for Public Libraries includes about 11,700 titles carefully selected with the aid of librarians and specialists. These titles are arranged in classes according to the Dewey Decimal Classification and are fully annotated with the indication of the sources of all quoted notes. In addition to the 11,700 titles included, about 3500 additional titles mentioned in notes will add to the usefulness of the list, especially in larger libraries.

The Catalog is a revision of the seven non-fiction sections and supplements of the Standard Catalog for Public Libraries formerly published as follows: Philosophy, Religion and General Works (1932); Social Sciences (first edition, 1918; second edition, 1927); Science and Useful Arts (1930); Fine Arts (1928); Literature and Philology (1931); History and Travel (1929); and Biography (first edition, 1919; second edition, 1927). All of the individual sections were edited by Minnie Earl Sears, with the exception of Social Sciences and the first edition of the Biography Section which were edited by Corinne Bacon. At the time of Miss Sears' death, November 28, 1933, much of the preliminary work on the selection of titles for this cumulation of the catalog had been done, but, unfortunately, the work had to be completed without her scholarly revision. The editors who carried on the work endeavored to follow her policies. They are, however, responsible for any errors and shortcomings in the completed work.

Selection. The selection of books included has been made primarily for small and medium-sized libraries, but the list will be found useful in larger libraries, especially in suggesting good titles for first purchase. As this Catalog is intended to be a practical list of books which the average public library of small or medium size will be able to afford and will find most useful, it has been necessary to omit scholarly and expensive works not suited to this class of libraries. A number of classics, now seldom used, are also omitted since their purchase would form a source of expense hardly justifiable. However, it is well to remember that even small libraries need some expensive books, if quality rather than quantity is to be emphasized. Additional titles which are desirable in large and scholarly libraries or in special libraries are given in notes, but it should be borne in mind that the selection is not made for the specialist.

The general policy has been to include books in the English language only, altho a few exceptions have been made such as the Oxford anthologies and volumes of the Loeb classical library. Of course libraries will wish to have a representation of foreign literatures in the original, measured to suit the local demand, but it is felt that the compilation of a list of that kind should form a separate undertaking. No attempt has been made to include a large number of the classics in translation. The editions listed are those which have been found most useful by librarians in work with the average public.

This Catalog is made primarily for American libraries, but it is hoped it may also prove useful in all English-speaking countries. The cooperation of English and Canadian librarians in many sections of the Catalog has made it possible to include some representative English titles, which, while perhaps better known to English readers, are of interest to American libraries.

Method of Compilation. The editors are greatly indebted to librarians and specialists in various subjects for their valuable cooperation. The original Sections and their supplements were compiled from selected lists of books voted on by collaborators. A list of those who collaborated on this edition will be found following the Introduction. They have given their opinions on the present-day value of these older titles and voted on lists of new titles. A number of those who checked for the earlier editions were unable to continue their cooperation and are therefore not included in the list of collaborators. The

final selection does not represent the opinion of any one person but was made according to the votes received from these collaborators, plus a careful examination of the books by the editors.

Revision. The number of books in the Catalog is now about 11,700, an increase of about 20% over the number contained in the seven sections of the Standard Catalog for Public Libraries. As the various sections had been issued at different times, the need for a thoro revision of every section was not the same. The five older sections and supplements have been thoroly revised, new votes obtained from collaborators, and every title reconsidered. Out of date titles have been dropped, and a selection of new books published up to the Spring of 1934 has been added. Annotations have been revised, and information about prices and publishers brought up to date. New editions of books already included have been compared with the old, and descriptive annotations written showing the exact amount of change. The two newest sections which included the classes Literature, Philology, Philosophy, Religion, and General Works, were of such recent date it was thought unnecessary to reconsider the titles already included. Instead, a list of new titles in these classes was voted on and about 20% more titles added. Titles which had gone out of print since these two sections were published were reconsidered, and some were dropped or replaced by other editions.

The previous edition included, at the ends of many classes, sections which listed a generous amount of pamphlet material. Since the *Vertical file service* now covers this field, this listing of pamphlets has been discontinued, but a few of the most useful are now included as books on the votes of our collaborators. At the ends of some of the classes a list of series will be found from which libraries not needing to buy the whole series may select the titles suited to their individual requirements.

The special features of the various sections have been retained as far as possible, but to keep the Catalog in strictly classed order some changes in arrangement were made. These changes are noted below.

Arrangement. The Catalog is arranged by the Dewey Decimal Classification with the classes in strictly numerical order. Books on costume (class 391) formerly included in the Fine Arts Section, are now found with the books on the social sciences. Philology (400) formerly in the Literature and Philology Section now follows the 300's in its numerical place. History is now in strictly class order with travel (910) and biography (920) coming between general history (901-909) and ancient and modern (930-999). All individual biography, except lives of artists and musicians and lives of Christ, is in class 92 where the arrangement is by the subject of the biography. In this class *see* references have been added from the name of each artist or musician to the class where books about him will be found. Biographies of artists are classified with books on the art represented (e.g. Sargent, an American painter, in 759.1 with other books on American painting). Lives of musicians are in class 780.92. Lives of Christ will be found in class 232. All of this material may be found thru the index.

Books for First Purchase. Books recommended for first purchase, particularly in small libraries, are marked with a star. About 2500 titles, or more than one-fifth of the total number of titles included, are so marked. In addition to these single stars about 560 titles or a little over one-fifth of all starred books are marked with a double star. The selection of titles starred has been done with the advice of collaborators who have had in mind the needs of small libraries. The double-starred items are in general those titles most highly recommended by the collaborators. Probably the entire collection of books starred will not fit the needs of any one library because local needs differ; and it is, therefore, necessary to adapt the selection to the community. Out of print books have not been starred because of the difficulty in securing them.

Analytical Index. A large number of analytics for parts of books have been included in the Author, Title, Subject and Analytical Index. This indexing will make available much material which it is usually not practicable to bring out in library catalogs because of the expense. In this Index about 3200 books or over one-fourth of the total number included have been analyzed wholly or in part. Nearly 21,000 analytical entries are included. These entries cover many subjects represented in the Catalog by entire books (e.g. Furniture) as well as those for which whole books are not included (e.g. Radium). Usually analytical entries have been made only for material covering at least ten pages. Textbooks and histories of subjects have not been analyzed as their content is obvious and they are easily used. Author and title analytical entries have been made for plays in all collections by different authors, but collected plays of one author have not been analyzed if they are included in *Index to plays* by Ina T. Firkins, 1927 edition. Analyzing of literary essays in such classes as 814, 814.08, 824, and 824.08 has not been done to any extent for books which are analyzed in the *Essay and general literature index* by M. E. Sears and Marion Shaw. Translations of foreign literature, notably the classics, contained in complete works of such writers as Robert Browning, have been indexed (e.g. Agamemnon of Aeschylus, translated by Browning) thus supplementing the foreign literature included in the Catalog. The combination of the separate indexes to the several sections reveals much material brought together from widely separated classes (see entries under Arms and armor).

New features of the Index are (1) the full index to the Social Sciences, (2) the author and title index to the Biography Section; and (3) the indexing and analyzing of some vocational material. References to biographies of engineers, scientists, and representatives of many other vocations can be found under these subjects in the Index. Under Journalism, for example, references are made to the names of twenty-three journalists whose biographies are included in the Catalog. It is hoped that this feature will prove useful in providing material to illustrate the work of these callings. Books on careers have also been analyzed.

Library of Congress Card Numbers. As a new feature the number to be used in ordering the catalog cards printed by the Library of Congress has been given. We are greatly indebted to the Library of Congress for supplying cards from which this information was obtained. If the card for which the number is given describes a different edition the number is enclosed in brackets, e.g. [31-11081]. Numbers for open entries (yearbooks, etc.) are enclosed in parentheses, e.g. (26-9716). Card numbers are not given when more than one number is needed to cover an entry (e.g. Pageant of America). Before beginning to order cards a library should get from the Library of Congress the latest edition of *L. C. printed cards; how to order and use them.*

Subject Headings. Subject headings for each book have also been given. The Library of Congress subjects given have been adapted for small library use, following the modifications used in the *List of subject headings for small libraries* edited by Minnie Earl Sears (1933). Libraries should find this Catalog a helpful guide in adapting the Library of Congress subjects to their needs. In the Index references have usually been made to classes in which the subject is indicated. It has been impossible to follow this practice in all cases as some subjects (e.g. U.S.—Economic conditions) occur for so many books in such varying classes, that only those classes are indicated in the Index where the best material will be found.

Uses. This Catalog will serve several purposes. (1) Use as a purchasing list, showing the best titles for small and medium sized public libraries to buy in the fields covered, and indicating by starred titles the books recommended

for first purchase. To aid in this use full information is given about publishers, prices and editions. (2) Use as an aid in interlibrary loan. Since this Catalog furnishes lists of the good books on a given subject, a librarian unable to supply material can borrow from other libraries the most useful books in print. (3) Use as a reference and bibliographic tool for reference workers and readers' advisers. The full analytical index which brings out material not readily found elsewhere has been added with this end in view. The additional titles given in notes will also add to the reference value. (4) Use as an aid in library schools and training classes in teaching courses in book selection.

Prices. Editions. Publication Date. The prices given are those of 1933. Both English and American prices are given for books published in both countries. In a number of cases where no American edition is available, books with English editions only are listed. As a rule the descriptive notes fit the American edition since that was the edition used in cataloging. In order to have the information as accurate as possible the information about prices, editions and out of print books published in the United States has been obtained in most cases directly from the publishers. Information about books published in 1933 and in 1934 has been obtained from the Cumulative Book Index. An effort has been made to include information about the latest editions and reprints. The English prices have been obtained mainly from the 1932 edition of the Reference Catalogue supplemented by the Cumulative Book Index, latest publishers' catalogs and correspondence with the English publishers. As the prices of American books vary with the exchange rates, some of the English publishers were unwilling to quote definite prices on those titles and information about English prices is therefore admittedly incomplete. The fact that the English title of a book sometimes differs from the American one may account for a few omissions of English editions, tho an endeavor has been made to note such differences. The date of publication given is usually the latest copyright date. The publisher listed is the one from whom the book is now obtainable.

Out of Print Books. A number of out of print books from the previous edition have been retained because they are still useful and desirable from the library point of view. There is always the possibility that the more desirable ones may be reprinted if the demand is sufficient and of course it is often possible to buy second-hand copies of these books. An English edition is listed when obtainable if the American edition is out of print. In such cases a note has been added to show the American publisher who formerly carried this title. As price information was obtained from the publishers in 1933, all out of print books included have been marked "o.p. 1933."

Acknowledgments. Thanks are due to the publishers who have generously given us copies of books included in the Catalog. Without these books at hand it would have been impossible to give the proper annotations and the analytical entries in the Index. The publishers have also cooperated by furnishing information about prices and editions. Grateful acknowledgment is made to Miss Dorcas Fellows for the elucidation of many points in classification. Sincere thanks are given to the various members of the staff who have assisted in the work, especially to Iris Almy who has helped with the cataloging and various other parts. The work with the publishers in obtaining information about prices and editions was done by Sadie Knople Brachfeld, and the proofreading by Rosetta Reisig. We are also much indebted for the generous help given by the collaborators.

It is planned to continue the former policy of keeping the Catalog up to date by issuing annual supplements.

DIRECTIONS FOR USE

The arrangement is according to the Dewey Decimal Classification. An outline of the classification will be found on page xv. This will serve as a table of contents.

Biography is arranged as follows: (1) Works about biography, 920A; (2) Biographical dictionaries, 920D; (3) Collective biography, 920; (4) Individual biography, arranged by the subject of the biography, 92. Biographies of artists and musicians are classed with criticism of their works in the 700s; and *see* references are made under their names in class 92 to the class in which their biographies will be found. Lives of Christ are in class 232.

Lists of useful series will be found at the ends of various classes (e.g. 745, 759, 780.92, 92).

Running class numbers are carried at the top outside corner of each page; page numbers are given at the bottom of each page.

Books recommended for first purchase in small libraries are marked with a star; and those specially recommended are marked with a double star.

English publishers and prices are given after the American publishers and prices: e.g. 1932 Vanguard press $2; Paul, S. 10s 6d.

Directory of publishers will be found at the end of the Catalog.

INDEX

The index, beginning on page 1311, includes in one alphabet author, title and subject entries for all books and analytical entries for parts of books.

Analytical entries are introduced by the word *In*. These include:

1. Entries for many subjects not represented in the Catalog by entire books: e.g. Galsworthy, John; Radium
2. Many additional entries for subjects for which books are included: e.g. Bach, Johann Sebastian; Furniture; Reptiles
3. Much biographical material about artists, historical personages, scientists, etc.

000 GENERAL WORKS

010 BIBLIOGRAPHY

Conner, Martha

Practical bibliography making. 1931 Wilson, H. W. 50c; Holmes **010**

1 Bibliography 31-15571

A very brief presentation of some elementary principles, with problems and examples. Intended for beginning students

Esdaile, Arundell James Kennedy

Student's manual of bibliography. 1931 Scribner $4; Allen, G. 12s 6d **010**

1 Bibliography 2 Library science [31-22679]

Based on lectures given in the School of librarianship of the University of London. It covers a wide field on the make up and history of books and the technique of the bibliographer, including chapters on papyrus, vellum, paper, printing and book building, illustration, binding, collation and description of books. Chapters IX and X are devoted to the description of over 200 bibliographies and the final chapter deals with the arrangement of bibliographies

"Mr. Esdaile has produced a readable, workmanlike handbook, which does credit both to himself, to the British Museum where he has learned his art, and to this country which . . . has been the pioneer in these studies." Spectator

Van Hoesen, Henry Bartlett, and Walter, Frank Keller

Bibliography, practical, enumerative, historical; an introductory manual. 1928 Scribner $7.50; 30s **010**

1 Bibliography 2 Research 3 Reference books—Bibl. 4 Bibliography—Bibl. 5 Library science 6 Libraries—Hist. 28-17678

"A comprehensive handbook based upon teaching experience with university students. It includes discussion of methods of reading, research, collection and preparation of material and presents chapters on subject bibliographies, library science, general reference books, special, national and universal bibliographies. The history of writing and printing, book decoration, book-selling and publishing are also briefly treated. An extensive bibliographical appendix is also present." Pratt quarterly

An aid to bibliographic work is Mrs B. P. Cowles's "Bibliographers' glossary of foreign words and phrases" (1933 Bowker pa $2) which lists in one alphabet terms from 20 languages, with their English equivalents. The library which orders many foreign books will find it useful

014 ANONYMS AND PSEUDONYMS

Marble, Mrs Annie (Russell)

Pen names and personalities. 1930 Appleton-Century $2.50; 10s 6d **014**

1 Anonyms and pseudonyms 2 Authors 30-18269

"The author tells the story of many famous pen names and how they came to be adopted, with pleasant gossip about the personalities back of the names. There is a bibliography of books on pseudonyms and disguises, and an index of pen names." Cleveland

Does not take the place of the reference books for anonyms and pseudonyms, listed in I. G. Mudge's "Guide to reference books," which will be needed in libraries where much reference work on anonymous and pseudonymous literature is done

015 BIBLIOGRAPHY OF SPECIAL COUNTRIES

As the prices of English books have been included in the "Cumulative book index" since 1930, the average small or medium sized American library does not now need the "English catalogue of books," annual or cumulated. It is the standard English publication in the field

"Current national bibliographies" compiled by Lawrence Heyl (preliminary ed 1933 A.L.A. pa 50c) is a list of sources for information concerning current books of all countries. For countries for which no current national bibliography exists, periodicals with book reviews, and important catalogs of book dealers are listed

Book review digest. Wilson, H. W.
* service basis; Holmes **015**

1 Book reviews 2 Bibliography—Period. (6-24490)

First published for the year 1905. Published monthly, except July, with a semi-annual cumulation in August, and an annual cumulation in February, which forms the annual volume issued in book form. The 1921 annual has cumulative index for 1917-21, the 1926 annual has an index for 1922-26, and the 1931 annual an index for 1927-31

"A digest and index of selected book reviews in over 50 English and American periodicals, principally general in character. . . For each book entered gives author, title, place, publisher and price, a brief descriptive note, quotations from selected book reviews with exact reference to periodical in which review appeared, and references only, without quotation, to other reviews. Indicates length of review in number of words and whether favorable or unfavorable. From the public library point of view and primarily useful in the selection of books for such a library." Mudge

The "Standard catalog monthly" published since January 1929 in the Wilson bulletin (Wilson, H.W.) is a current selection of the books suited to the very small library, selected from those listed in the "Book review digest." From 1921 thru 1928 it was issued separately as the "Standard catalog bimonthly."

Publishers' trade list annual. Bowker $3.50 **015**

1 Catalogs, Publishers' 2 American literature—Bibl. 3 English literature—Bibl. 4 U.S.—Bibl. (4-12648)

First published 1873. A large volume appearing annually which is a collection of publishers' catalogs arranged alphabetically and bound together with no general index. It lists only books in print and so is chiefly useful in ascertaining the current price and whether an individual title is still available. Some small libraries may get along without this by using the "United States catalog" and supplements and the price lists of individual publishers

"Publishers' weekly" (Bowker $5 year) is the standard American book trade journal, which lists the new publications each week

Publishers' trade list annual—*Continued*

A publication which covers the same field for English publications as the "Publishers' trade list annual" for American publications is the "Reference catalogue of current literature" which appears every fourth year and is supplemented by a good general index. The current edition is dated 1932 (5y Bowker $20; Whitaker 70s)

Serves as the current continuation of the large "Catalogue of public documents of Congress and of all departments of the government of the United States" (1893-1925 v 1-17 1896-1931 Supt. of doc., various prices) These volumes are of especial interest to larger libraries

(some) government publications. . . Indispensable for order department work, as an adjunct to the library catalog, and as a reference tool." Mudge

Kept up to date by the "Cumulative book index" (monthly Wilson, H.W. service basis; Holmes) which was enlarged in 1930 to include all books in English regardless of country of origin. Cumulates annually, with a five-year cumulation for 1928-32

Vertical file service catalog. Wilson, H. W. service basis; Holmes **015**

1 Pamphlets—Bibl.

An annotated list of pamphlet material arranged alphabetically by subject. Subscription to the service includes automatic distribution of some free material and utilization of the service as a clearing house for free and low cost material

016 AIDS TO BOOK SELECTION

Bibliographies of a special subject are listed at the head of the books in that subject; e.g. bibliographies of Chemistry are given at the head of class 540, and bibliographies of Drama at the head of class 808.82. These are not repeated here. Libraries may prefer to classify them together in 016. Libraries needing more material will find it listed in I. G. Mudge's "Guide to reference books"

Shaw for the Advisory group on college libraries of the Carnegie corporation of New York (2d preliminary ed 1931 A.L.A. $3.50) is a list of approximately 14,000 titles selected on the recommendation of 200 college teachers. "This new edition has been expanded from 95 to 173 pages. There are new and many more sample cards. New topics discussed are: how to catalog two editions of the same book; what to do when two or more volumes of the same book are copyrighted at different times; how to catalog supplements, indexes, abridgements, stories retold from the classics, and books which are collections of the works of many authors but have an editor or compiler." "The purpose of this manual is to give to the librarian, who lacks professional education and experience under expert guidance, the necessary directions for accessioning, classifying, and cataloging a collection of printed material, in order that it may be available for use. Furthermore, an effort has been made to avoid many of the technical terms commonly used in describing these processes, to define those which are used, and to state the necessary rules clearly and simply and as briefly as possible." "A creative cataloger of broad experience and vision, has lifted these two vital subjects out of the region of dull and lifeless discussion to which they are accustomed and given them new meaning. Miss Mann's book covers both principles and methods. It discusses the Cutter, Decimal, and Library of Congress systems of classification, dictionary and classified catalogs, the various kinds of entry, L. First edition, 1923. The second edition added "see also" references. "This [third] edition of an indispensable tool represents an increase of 38 pages over the second or 1926 edition. New subject headings bring the list to date, particularly in the fields of pure and applied science. Catalogers will welcome the addition of many explanatory notes defining headings and making distinctions between closely allied subjects. . . . A very valuable new feature is the section on 'Practical suggestions for the beginner in subject heading work,' which may be purchased as a reprint [Wilson, H.W. pa 50c]. The part entitled 'New headings' will prove worthwhile indeed to one who is curious about the evolution of new subject headings." N.Y. libraries

This list, planned to meet the needs of small libraries, is less comprehensive than the list published by the American library association (out of print, 1933) and the Library of Congress list. The statements are concrete and concise, with examples of practice where they are needed to illustrate the theme. The volume is well documented, and there is a reading list including considerable material in addition to the works cited in the footnotes. To experienced librarians this manual may seem to contain much that is obvious, but it is intended for those who are inexperienced in a new phase of library development and should be most helpful to them." The books have been arranged by grades, the work of grading having been done by the Research department of the Winnetka public schools." Book rev. digest

"The descriptive notes are suggestive and helpful. . . It is unfortunate that the Winnetka grading scheme was used at all in the present booklist, but it does not destroy the usefulness of the book. . . 030 GENERAL ENCYCLOPEDIAS

As a general encyclopedia is perhaps the most used reference book in any library, it is false economy to buy a poor one, and a small library should try to buy the best work in this class that it can afford even if it has to omit some other books to do so. If the amount available does not permit the purchase of a new copy of one of the large general encyclopedias listed below it may be better to purchase a second-hand, slightly worn copy of one of them than to buy one of the smaller cheaper encyclopedias

Two smaller encyclopedias which have been recommended are:

Doubleday's encyclopedia, (ed by) A. E. Bostwick (and others). (2d ed) 1932 Grolier soc. $69.90 With annual supplements

Everyman's encyclopaedia. new and rev ed 12v 1931-32 Dutton $30, ea $2.50; Dent ea 5s 6d

For certain types of readers the simpler encyclopedias prepared for younger readers will often be useful. A list of such works recommended can be found in the Standard catalog for high school libraries

Each article covers its subjects in all countries, but aims especially to record progress in the United States." Mudge

1 Encyclopedias and dictionaries 31-35302

A useful modern encyclopedia of the popular "small subject" type said to be strong in scientific and technical subjects. Last revised thruout in its 1918-20 edition. The 1931 issue is not reset but shows changes, sometimes extensive, in the plates of existing articles, but

Encyclopedia Americana—*Continued*
not the addition of many new subjects. It is well up to date as far as recent census figures, recent changes and development in many political and scientific subjects, and gazetteer information are concerned, but for new subjects needs to be supplemented by the "Americana annuals," 1923-date. The 1931 issue is the one recommended to the library purchasing the Americana for the first time or needing a second copy. The smaller library having either the 1918-20 edition or one of the later printings of this edition may not need the 1931 edition

The "Americana annual; an encyclopedia of current events" (Amer. corp. $9) is a useful work which serves both as an annual supplement to the encyclopedia and as a year book. First issued in 1923

Encyclopaedia Britannica. 14th ed A new survey of universal knowledge. 24v 1929 Encyclopaedia Britannica cl $114.50, buckram $136.50; £27 16s 6d 030

1 Encyclopedias and dictionaries 29-17944

The most recently reset of any of the large encyclopedias in English, a revision and popularization of what in its 11th edition (1910-11) was regarded as the most scholarly encyclopedia in English. Not entirely new thruout as many articles, often considerably abridged, are carried over from the 11th edition. Strong features are its full illustrations and its up-to-date articles by specialists on subjects showing recent developments, e.g. scientific and technical subjects, war and post-war topics. This edition includes more American subjects than the preceding editions. The 14th edition has met with some criticism on the score of careless work in some articles. Supplements usefully but does not displace the 11th edition the larger articles of which are still to be preferred on some subjects which have not changed greatly

The "Britannica booklets" (v 1-10 1932-1933 price varies ea $2.50-$3) each on a specific subject, consist of selections from the "Encyclopaedia Britannica," and many excellent illustrations. Contents: 1 Chinese art; 2 Painting; 3 Mammals and birds; 4 Graphic arts; 5 Earth, the seas and the heavens; 6 Japanese art; 7 Theatre and motion pictures; 8 Fishes, insects and reptiles; 9 Botany: plants and gardening; 10 Botany: the science

1 Encyclopedias and dictionaries 34-8026

A good one-volume combination of encyclopedia and hand book first published in 1924. The 1931 issue (the fifth) while not reset, was brought up to date by incorporating the new census figures, by inserting a number of new articles and by rewriting other articles or sections. The material has again been revised for the present edition, published 1934. The arrangement is in 12 large subject groups with a full general index

New international encyclopædia. 2d ed 23v 1922, and Supplement 2v 1930 Dodd cl $123, buckram $131.50 030

1 Encyclopedias and dictionaries 29-28822

Also issued in a cheaper 14v edition of the whole work for $90

A well-edited, well-proportioned encyclopedia of good modern type unfortunately now not entirely up to date except for articles which have been brought to date in the 1930 supplement. Strong features are its inclusion of small subjects in the main alphabet, numerous biographies and its many excellent bibliographies. The main work is the 2d edition 1914-16, reprinted with changes and revision in the 1922 issue, reissued with later dates. Libraries having either the 1914-16 edition or the 1922 issue of that edition need add only the 1930 supplement, and the Year books

New international year book. Funk cl $5.60, buckram $6.50 030

1 Yearbooks 8-19149

First published for the year 1907. The volumes for 1907-30 were published by Dodd

"An excellent annual encyclopedia, compiled and arranged on the same plan as the 'New international encyclopædia' and useful both as a supplement to that work and as an annual record of the progress and events in any subject. Especially useful for biography. Contains an annual necrology list which is somewhat less accurate for exact dates of death than the corresponding list in the 'Americana annual.'" Mudge

Some 6000 books in the English language are covered in this work which indexes essays and similar collections of critical, biographical and other monographs; books of travel, history and other subjects where parts of the books justify analyzing; reports and publications of boards and associations dealing with sociological subjects, also publications of historical and literary societies; many miscellaneous books and some public documents. The indexing is by catchword subjects. A supplement covering the years 1900-1910 (1914 A.L.A. o.p. 1933)) represents a cumulation of the "Index to general literature" appearing annually in the "Annual literary (library) index" 1900-1910 together with material indexed in 125 new books, thus adding a total of about 500 more titles indexed

Published in six semi-annual parts, 1931-1933, and now combined in one alphabet in a single volume. It is being continued by semi-annual numbers indexing current literature of the same nature, to be cumulated annually in January, and the annual cumulations eventually combined to form permanent volumes

An index to about 40,000 essays and articles in 2144 volumes of essays in all fields, collective biography and works of a miscellaneous nature which have reference value. While only books published since 1900 are included, the material to be found in collections by various authors includes not only the work of modern essayists but also a great many essays by the earlier standard essayists such as Addison, Bacon, Carlyle, Emerson, Hazlitt and Lamb

"Serves two distinct purposes in providing (1) a long needed index, by authors, titles and subjects, to essays and (2) a continuation from [1900] of the A.L.A. Index to general literature with full author and subject cataloging instead of the catch-word subject indexing of the A.L.A.

"A condensation of 'Poole's index,' including all references to 37 popular periodicals still published, to the end of 1899. Designed especially for the small library, but of value to all libraries, large or small, on account of its one alphabet and the fact that it gives references enough for all ordinary work." Mudge

The "First supplement, 1900-04" (1905 Houghton o.p. 1933) covers the same period as the first volume of "Readers' guide to periodical literature"

The unabridged Poole, which with supplements covers the years 1802-1907, and is also out of print, is useful in libraries that have it even if they have only a small proportion of periodicals indexed in it since the new "Union list of serials" shows many possibilities of borrowing thru interlibrary loan periodicals needed for reference but not in the home library

Readers' guide to periodical literature. 1900-
‡ date Wilson, H. W. service basis; Holmes 050

1 Periodicals—Indexes (6-8232)

A cumulated index, with author, subject and some title entries, to about 100 periodicals. Made up of permanent cumulated volumes, annual volumes used to supplement the cumulated volumes, and monthly numbers cumulating at intervals during the year

Contents of cumulated volumes: v 1, 1900-04; v2, 1905-09; v3, 1910-14; v4, 1915-18; v5, 1919-21; v6, 1922-24; v7, 1925-28; v8, 1929-June 1932

The large library will need also the "International index to periodicals" (1907-date Wilson, H.W. service basis; Holmes) An index on the same plan as the "Readers' guide" but indexing periodicals of a more scholarly type and many foreign ones

A useful index which covers, in the main, periodicals not in the "Readers' guide" or other indexes is "Annual magazine subject-index" (1907-date Faxon $15 per vol.) From 1909 to date includes "The dramatic index" as pt. 2

An alphabetical list followed by a subject index. When possible, it gives for each periodical the date of founding, frequency of publication, publisher's address, and price. This edition includes extensive revisions. Many changes in periodicals since the fourth edition of 1920, made it necessary to compile the fifth edition from original sources

The "Periodicals directory" edited by C. F. Ulrich (1932 Bowker $10) is a list by subject of 6000 current periodicals, both foreign and domestic which gives price, how often published, where indexed, etc. Has a title index

Union list of serials in the libraries of the United States and Canada; ed by Winifred Gregory. 1927 Wilson, H. W. service basis; Holmes 050

1 Periodicals—Bibl.—Union lists 28-827

This comprehensive list includes 75,000 titles and records the holdings of about 250 contributing libraries. Of prime importance in larger libraries and entered here because of its great importance in any library where the reference work calls for borrowing back volumes of periodicals not in the library's own collection. In a small library where not enough reference work of this kind is done to justify the expenditure, it will not be needed

Two supplements are available January 1925-June 1931, and July 1931-December 1932, edited by G. E. Malikoff (1931-33 Wilson, H.W. service basis; Holmes)

The purpose of the book, apparently, is to tell how reporters gather the information which they retail, later on, to the newspaper readers, how they overcome the obstacles that are placed in their way by those who do not wish the truth to become known, and, above all, to emphasize the glamour of newspaper work. . . The stories that Mr. McKenzie presents form a varied collection. Some of them depict reportorial work at its best, and others go far to support the worst accusations that have been made concerning the snooping methods of certain newspapers." N.Y. Times

Cunningham, Gustavus Watts
Problems of philosophy. 1924 Holt $3.50; Harrap 8s 6d 100

1 Philosophy 24-25649

"The first part of the study is concerned with the relation which philosophy bears to common sense and science and with the origin of the problems of philosophy. Then the author turns to a consideration of some of the problems with which philosophy is concerned—knowledge, causality, matter, space and time, evolution, mind, goodness, immortality. Questions and exercises are given at the end of each chapter." Book rev. digest

"Professor Cunningham offers an introduction which is marked by unusual clarity and directness of style. He speaks from the general position of idealism but sets forth other points of view with sympathetic understanding. Often he balances the arguments and leaves the reader to his own conclusions." International jour. ethics

The unique feature of her book is a competent (though elementary) explanation of what so-called symbolic logic has been up to in recent years and of the significance of this logic for other branches of philosophy." Sat. rev. of lit.

"Written by a distinguished French philosopher, this book is an outline intended for beginners. Part one is an exposition of the nature of philosophy. Part two deals with the classification of philosophy—its main divisions and problems." Book rev. digest

"It is both written and translated with lucidity and ease, and not the least of its charm is to be found in the gentle, if firm, manner in which M. Maritain rebukes and puts right the philosophers, ancient and modern, who have strayed from the narrow but orthodox way." Times (London) lit. sup.

Book rev. digest

"In explaining the fundamental problems of philosophy to the beginner, Prof. James has advanced his ripest judgment; he spared no pains to make every point clear. And in presenting his subject he made it as interesting reading, even to the uninitiated, as a story." N.Y. Times

Burnham, James, and Wheelwright, Philip Ellis
Introduction to philosophical analysis. 1932 Holt $2.75 110
1 Philosophy 32-4399

"As a general introduction to philosophical problems, this joint production . . . exhibits several commendable features, which . . . set it above the common run of introductory works. . . The authors correct a widespread defect in introductory works by devoting considerable space to questions of a logical nature that should be considered in any general survey of the field. In the second place, the book has the added merit that it is predominantly non-historical. . . Finally, and primarily because of the general approach adopted, the book presents one with a fairly well-integrated picture of the contemporary outlook in the major departments of knowledge, in the various 'realms of discourse,' to use the authors' terminology." Also available from Modern library at 95c; and from Constable at 6s
"Originality of thought, a lucid style and mellowness of atmosphere mark this exposition of the author's philosophy concerning life as an art. N.Y. state lib.

Cohen, Morris Raphael
Reason and nature; an essay on the meaning of scientific method. 1931 Harcourt $5; Routledge 21s 112
1 Methodology 2 Science—Philosophy 3 Social sciences 31-8779

"What Professor Cohen has sought to do is to set forth, as he sees it, the general bearing of the principles of procedure according to which scientific results are obtained and constantly revised, upon the 'rationalism' versus 'empiricism' problem. The book is therefore in a very real sense an analysis of scientific method. After a discussion of the 'rivals of reason,' the author deals with reason and scientific method in all fields, including not only the physical, biological, and social sciences, but also history and ethics." Columbia law review
"This book is packed with rigorous thought and it makes demands upon the reader. It is not intended for popular consumption but for the man or woman who wants an honest analysis of the present state of philosophy in the light of the present state of science, we know of nothing better." Outlook

Brownell, Baker

New universe, an outline of the worlds in which we live. 1926 Van Nostrand $4 113

1 Universe 2 Evolution 3 Sociology 4 Philosophy, Modern 26-22007

"Written by the professor of contemporary thought at Northwestern university, this book attempts to describe man's spiritual and physical development and his ever increasing relationships (through increased knowledge) with the cosmos. There are four main divisions: Studies in nature; Studies in social policy; Studies in personal values and General ideas of the world. The discussion is interesting and seldom abstruse." Bkl.

"A book, well planned, scholarly, crammed with references and quotations, yet eminently readable, with attractive qualities of personality and humor. The book has a higher quality—it goes back to the eternal things; it inspires new hope for the future of philosophical thinking and writing in America; it carries a genuine promise." N.Y. Times

Langdon-Davies, John

Man and his universe. 1930 Harper $5; 16s 113

1 Universe 2 Science—Philosophy 3 Evolution 4 Relativity 30-18599

"The story of the development of man's mind and of his efforts to understand the universe, and to reconcile his developing knowledge with his old religion. Readable and stimulating." Wis. bul.

"This book . . . tries to present some of the spade work which is required before anyone can begin to plant the seeds of a philosophy. It suggests in a fragmentary way the effect of science upon those beliefs the holding of which makes life worth living for each of us. It is not therefore exactly a history of science but a history of the human imagination as science has affected it and allowed it to grow." Preface

Man comes of age. 1932 Harper $3.50; Hamilton, H. 10s 6d 113

1 Universe 2 Science—Philosophy 3 Life (Biology) 4 Psychology 5 Ethics 32-3116

Published in England under title: Science and common sense

"The author reviews our present knowledge in the fields of science and psychology in order to find a basis for questioning traditional ideas of religion and morality. After summarizing the modern scientific theories of space, time, matter, life, and personality he attempts to show, in the light of these discoveries, what we may do, believe, and enjoy." Book rev. digest

"Mr. Langdon-Davies is eloquent in his attack on established morality. He does not, however, make any real attempt to answer his fundamental questions. The book is primarily a plea for the right to ask them. 'Man Comes of Age' is, therefore, a disappointing sequel to the author's previous book, with precisely the same message but less convincingly set forth and no further developed." Books (N.Y. Herald Tribune)

Younghusband, Sir Francis Edward

Living universe. 1933 Dutton $3; Murray, J. 10s 6d 113

1 Universe 33-29360

"The first part of the book, entitled 'Mainly Facts,' is a synopsis of the astronomical, geological and biological history of this planet, admirable alike for its lucidity and its poetic style. . . . The second part of the book, 'Mainly Inferences' devotes a good deal of space to the question of the possibility of life analogous to our own existing in other portions of the universe than the earth." Times (London) lit. sup.

A. N. Whitehead's "Process and reality, an essay in cosmology" (1929 Macmillan $4.50; Cambridge univ. press 18s) is an important work which will interest the scholar rather than the general reader

Coffin, Joseph Herschel

Soul comes back. 1929 Macmillan $2; 10s 128

1 Soul 2 Personality 29-7516

"In the first part of the book, The stairway of the soul, Professor Coffin pictures the soul as it looks to the materialist, the idealist, the fundamentalist, the modernist. In the second half, A soul for John Doe, he follows the career of John Doe's soul to its culmination in the reality which we call personality." Book rev. digest

"The temper of the book is admirable and fits it to be put into the hands of thoughtful people, young and old, who are confused in their thinking. The great merit of the book is that it presents in simple and arresting language some of the chief principles needed to refute the current idea that it is meritorious and scientific to deny purpose, values, ideals and religious experiences." Crawshaw, William Henry

Indispensable soul. 1931 Macmillan $2.50; 12s 6d 128

1 Soul 2 Relativity 3 Intuition 31-33777

"In this book the author argues against the materialistic philosophy and behavioristic science which take the position that there is no need to assume the existence of a soul. In the course of the argument he deals with such subjects as relativity, spiritism, animal psychology and immortality." Book rev. digest

"The book is a classical illustration of how the concepts of traditional metaphysics clash with those of functional science and psychology, and of how they permit of no easy harmonization. In fine literary style and with sweeping eclectic argument Dean Crawshaw carries the reader forward to his desired end." Crozer quarterly

problem of the relation between mind and body." Book rev. digest
"It is a sufficient appreciation of this very valuable book to say that it does justice to the reputation of its author. It was published in German [in 1916]; and its present translation, which was authorized and revised by Professor Driesch himself, is clear and well suited to the needs of the English reader." First published 1911. Reprinted a number of times without much change
"An excellent study of this problem of the relation of body and mind, better critically than it is constructively." Trinity college list
"The book is worth reading for the historical part alone, inasmuch as it condenses into a most readable form a full account of the various psycho-physical doctrines for the past 3000 years; and the fascinating manner in which the author presents the animistic position of the present day is sure to earn for the volume a place on the book-shelf of every psychologist, be he professional or amateur." 1 Mental suggestion [A21-76]
"A plainly stated explanation of the teachings of the psychological New Nancy school of the Jean Jacques Rousseau institute. Its substance consists in controlling the subconscious (and so the conscious) by means of suggestions made to one's self. 'The event is only the actualization of . . . thoughts, and what we pray to ourselves for is always granted.' Not mystical. Discusses the place of New thought, not agreeing wholly with it nor with psychoanalysis." Bkl.

"Discusses helpfully and in non-technical chapters the importance of the proper mental hygiene in different ages and relationships—childhood, adolescence, marriage; school, college, business; religion, literature, and social work." Pittsburgh
"Of the many problems which arise in the lives of all, there is scarcely one that is not discussed sanely and helpfully. The great value of the book from the standpoint of the reviewer, apart from its soundness, is that it is understandable, and one does not have to be versed in the language of the alienist to profit by it. The reviews of the book by specialists have been favorable from the professional standpoint. In view of these and his own experience with it, it is recommended to the average reader with confidence. The printing and make-up are excellent." American journal of public health

Jastrow, Joseph—*Continued*

Piloting your life; the psychologist as helmsman. 1930 Greenberg $1 131

1 Psychology, Applied 2 Psychology, Physiological 3 Mental physiology and hygiene 30-13734

"'Piloting Your Life' is frankly aimed at a popular audience, as was its companion volume, 'Keeping Mentally Fit.' Since his retirement from the direction of the department of psychology at the University of Wisconsin Dr. Jastrow has assumed more and more the role of interpreter of psychological findings. These two volumes, growing out of a popular newspaper column, depart from the style of his more scholarly works in increasing simplicity and crispness of utterance." Books (N.Y. Herald Tribune)

Wolfe, Walter Beran

How to be happy though human. 1931 Farrar $3.50; Routledge 10s 6d 131

1 Psychology 2 Mental physiology and hygiene 3 Conduct of life 31-25649

The "director of the mental hygiene clinic in the Community Church, New York City writes this practical book of guidance in developing an effective personality and happy human relations in life." Book rev. digest

"Dr. Wolfe sets out to supply 'a Baedeker of the soul,' not as an academic essay, but as a practical guide to procedure in puzzling situations. Following his teacher, Alfred Adler, he builds upon the foundation of the inferiority complex; and perhaps this motif is overworked. But he does not claim to have written a symmetrical or comprehensive treatise, and what he sets out to do he does." C. J. Herrick in New republic

1 Psychoanalysis 22-695

"Though the book is purposely elementary and therefore may not contain much that is new to those already experienced in the subject, it summarizes in a clear and memorable form a mass of useful information, and for readers not deeply versed in the subject who seek to understand themselves and others, or are concerned with the treatment and education of children, it is a book to be strongly recommended." Coster, Geraldine

Psycho-analysis for normal people. 3d ed 1932 Oxford $1.25; 2s 6d **131.34**

1 Psychoanalysis [26-22098]

First edition 1926. Some rewriting has been done to bring the material up to date

"In this excellent little book Miss Coster has given an account of all that is valuable in the teaching of psycho-analysis for the understanding of the psychology of ordinary people. The more definite doctrines of psycho-analysis, such as the Freudian sexual doctrine, are so modified by Miss Coster as to become not only tolerable but moderately convincing. The one chapter of Miss Coster's book which is specifically psycho-analytical is the one on dreams." Times (London) lit. sup.

"An unprejudiced summary of the principal teachings of the various schools of psycho-analysis and its derivatives. The systems associated with Freud, Jung, and Adler are described, also the work of Prinzhorn." Book rev. digest

"In spite of the limited space at his disposal, Dr. Crichton-Miller has managed to make his account of this complex subject remarkably comprehensive and up to date. By means of numerous well-selected quotations he has allowed the authors to speak for themselves on essential points of doctrine, so that the reader gets personally acquainted, as it were, with these persuasive writers. A useful bibliography completes a well-planned little book." Times (London) lit. sup.

Dresser, Horatio Willis

Knowing and helping people. 1933 Beacon press $2.50 **131.34**

1 Psychoanalysis 2 Personality, Disorders of 33-6807

"Through brief summaries of individual cases the author shows the application of psycho-analysis to human needs, and the co-ordination of the work of the psychoanalyst with that of the minister, doctor, and social worker. For the reader with a knowledge of elementary psychology." Bkl.

"From the standpoint of true scholarship Dr. Dresser's book makes an unique and invaluable contribution. . . The work has two characteristics especially worthy of mention. First, Dr. Dresser has maintained a wholesome attitude toward human personality and its problems, to an extent not achieved in previous similar works. Second, he has declined to seek the ultimate answer to any question in any single school of psychological thought." Christian century

1 Psychoanalysis 20-12205

"This volume consists of a translation of twenty-eight lectures given to laymen. They are conversational in tone and follow the inductive method, the author building up his evidence from case after case. He deals little in general statements. . . There are four lectures on the psychology of errors, eleven on the dream, and thirteen on general theory of the neuroses." Book rev. digest

"Freud presupposes no knowledge of psychopathology. The treatment of the subject is serious. It is not technical. The book is an instructive summary of the conclusions arrived at after many years' work. It is comprehensive and logical in arrangement." E. D. Martin

The author's "Psychopathology of everyday life" (1914 Macmillan $3.75; Benn 12s 6d) uses forgetting, awkwardness and such every day experiences to illustrate his theory that they are indications of the subconscious wish

The chapter on archaic man, which describes his own experiences with natives, is very interesting and dramatic. The general impression left by these essays is that there is some truth in almost every view." New statesman and Nation

132 MENTAL DERANGEMENTS

Dissatisfied worker. 1931 Macmillan $2, college ed $1.50; 6s 6d 132

1 Psychology, Pathological 2 Mental physiology and hygiene 3 Efficiency, Industrial 31-14302

A psychological study based on the thesis "that a large part of vocational maladjustment and industrial unrest are secondary to, and but a reflection of, emotional maladjustment. Emotional maladjustment in most instances is in turn the natural and inevitable expression of emotional maldevelopment." Preface

"Presents in brief and concise fashion the generally recognized 'mental mechanisms' by which symptoms of dissatisfaction develop in workers regardless of the influence of working conditions. The worker emphasized in the book is perhaps better recognized as the troublesome worker or the queer worker, rather than as the dissatisfied worker. This makes the thesis more acceptable, but unfortunately still leaves the problem of the dissatisfied worker on the doorsteps of management." Annals Amer. acad.

"She has given a remarkably vivid description of the distortion that the mind suffers when it goes out of gear. . . Here we have a book on insanity in which we are spared none of its torturing ghastliness, none of the bitter and actual experiences of treatment; but because the author is something of a poet and very much of a human being, we never taste the dregs of the theme." "After so many hasty and misleading books on witchcraft and its history, it is a joy to turn the scholarly pages of Professor Kittredge. Equipped by years of study and giving for his every statement his authorities, he has here garnered the whole wealth of literary allusion to the presence, in lands of English speech, of the beliefs and practices loosely known under the name of witchcraft." "Sir Oliver's book—tentative, and even inconclusive as it is—is a stimulating contribution to a perennially interesting problem." Saturday rev.

"Articles read at a public symposium for the discussion of psychical research held at Clark university in December 1926. They constitute a fair presentation of its pros and cons. Part one contains papers by men and women who believe in such phenomena—Sir Oliver Lodge, Sir Arthur Conan Doyle, Mary Austin, and others; parts two and three are composed of articles by people convinced of the rarity or improbability of spirit manifestations; and part four contains two articles antagonistic to the claims of spiritualists, one by Joseph Jastrow and the other by Harry Houdini." 1 Dreams [11-18936]
"Belongs mainly to the introspective group of dream studies, though not to the psycho-analytic variety. It is based on data which have accumulated beneath my hands during more than twenty years." Preface
"The book is popular in style, but is thoroughly scientific in method, and Mr. Ellis has a wide acquaintance with the work of other investigators in this field." Nature

Freud, Sigmund
Interpretation of dreams; authorized tr. by A. A. Brill. new ed rev 1933 Macmillan $5; Allen, G. 16s **135**
1 Dreams 2 Psychoanalysis 33-31745
"This is the third English edition of Freud's famous book and is a translation by Dr. Brill of the last, or eighth, German edition which has been thoroughly revised to conform to new material and the new psychoanalytic terminology. In a foreword to the present edition Freud writes: 'It contains, even according to my present-day judgment, the most valuable of all the discoveries it has been my good fortune to make.'" Times (London) lit. sup.
The theory propounded and defended by Prof. Freud is: (1) that every dream is the fulfilment of an unconscious wish; (2) that the majority of these "wishes" are desires and impulses normally inhibited from consciousness in our waking thoughts by conformity to the ethical criteria of social life; (3) that even in sleep there is a psychic "censor" that resists the rise of these suppressed "wishes" into consciousness; and (4) that the actual dream is a sort of charade in which the hidden meaning is conveyed by taking advantage of every opening for symbolism and analogy. Condensed from Life

* Man and woman; a study of secondary and tertiary sexual characters. 1929 Houghton $5; Black, A. & C. 10s 6d 136

1 Sex 2 Woman 3 Man 29-23074

"Published in 1894, the result of twelve years' investigation, 'Man and Woman' has been translated into many languages and passed through many editions. The present volume has been more thoroughly revised than its predecessors and represents the mature and perhaps final judgment of Havelock Ellis as a man of seventy upon the patient research of his earlier years, the cornerstone of facts upon which so much of his later writings were based. This book is essentially a collection of facts concerned with the differences between men and women, and contains (now as at its first publication) the most comprehensive systematic analysis of human secondary sexual characteristics assembled in a single volume." 1 Child study 2 Children—Management 33-28951

This is one of a series of volumes based on material presented at the White house conference on child health (1930) and embodied in the reports of its committees. The author "after a description of the equipment with which the child approaches living and the child's methods of learning and of meeting emergencies, shows how parents may assist the child in acquiring control over himself and his environment." Editor's introduction

"Much excellent material is provided, and the approach is, in general, excellent. Parents . . . may find the book a little difficult to concentrate on, since the terminology is that of the college classroom and the style is a trifle pedestrian. . . It might also be used with study groups of teachers or social workers." Books (N.Y. Herald Tribune)

Old, but still a useful textbook on psychology

"Not a digest of the author's Psychology, published in 1904, but 'an entirely fresh survey of the field,' with shifted emphasis due to the development of psychology during the intervening fifteen years. Prof. Angell does not ignore the biological point of view, but devotes more space to adjustment to environment, and assigns much importance to the function of subconscious processes, although he declares himself unconvinced by the Freudian theories. A text-book, but also useful for reading." Cleveland

Another well-known older textbook which is still used is M. W. Calkins's "First book in psychology" (4th ed rev 1914 Macmillan $2.25; 10s)

The main sections of the book discuss, in the order named: Physiological psychology in the first half of the nineteenth century; the preparation for experimental psychology within philosophical psychology; The founding of experimental psychology; Modern experimental psychology; Survey of experimental psychology." Book rev. digest

"The style is lucid, direct, and lively. Interpretations, both expressed as actual textual content and implied in terms of place and area of treatment, may rightly differ from writer to writer. But there is no book now available that is as circumspect and pithy as this History of Experimental psychology." American journal of psychology

"Motives of Men is essentially an inspirational book, but it is so on the basis of a rich content. It is however on the practical side of enlarging the motives operative in human affairs that the book makes its major appeal to the interest of social workers." Survey

James, William
* Psychology; briefer course. 1892 Holt $2.50 **150**

1 Psychology 24-30671

An abridgment of the author's great work, the "Principles of psychology." It condenses all of the material and omits several whole chapters and all polemical, historical, metaphysical and speculative passages. Brief chapters on the various senses have been added. The "Principles of psychology" (2v 1890 Holt $8; Macmillan 30s) is an important work of wide influence, which all larger libraries will find indispensable

"Perhaps no one has better expressed in his writings the full scope and tendency of modern psychology than the late William James. . . Better than any other book, his great work on the 'Principles of Psychology' can be taken as at once a summing up of the older psychology and an introduction to the modern point of view." R. S. This authoritative book on gestalt, or configuration, psychology is recommended for libraries where an entire book on the subject is needed

"It is a systematic introduction into the main principles of the Gestalt theory and their application in the most important fields of psychology. The book is both destructive and constructive. It tries to kill, once and for all, tacit assumptions and avowed principles which in the author's . . . opinion have blocked the progress of psychology and have made it a lifeless and shallow doctrine. . . In attacking the axioms and methods responsible for this sterility Köhler paves the way for the erection of new principles." Yale review

C. E. M. Joad in Spectator

"This book is a condensation and simplification of the most essential parts of the author's Outline of Psychology and Outline of Abnormal Psychology. In this edition, as in the previous one, an effort has been made to recognize the contributions of both the introspective and behavioristic methods to psychology. The treatment of certain topics in this edition has been definitely influenced by the *Gestalt* or Configuration standpoint in psychology. Fundamentally the authors have attempted to maintain the view that psychology is a biological science and that a knowledge of the structure and function of the living organism is basic to a true understanding of mental life." A record of the results of investigations made by two exponents of Gestalt psychology. The object was to determine what intellectual kinship the apes might have with man, and also to observe some of the simplest primary acts of an intelligent kind

One of the "most important books on animal psychology which has appeared for many years. It is written by a man who is neither an anthropomorphist nor a mechanist, and yet who combines the sympathy of the one with the scientific attitude of the other. The impasse is made perfectly clear, and the necessity for some new psychological concept is obvious." New statesman

1 Thought and thinking 2 Educational psychology 33-27208

"The new edition of How We Think is, as its subtitle indicates, a 'restatement' of How We Think (first edition 1910). In the first place, although some material found in the original edition has been excised, there has been considerable expansion. The present book contains nearly a quarter more than did the older account. In the second place, the revision has been made with a view to increased definiteness and clearness of statement. Scrupulous pains have been taken to restate all ideas that were found by teachers to give undue trouble in understanding." Preface

"A serviceable introduction to the general subject. It covers an analysis of the thinking process and the training of thinking on the basis of natural aptitudes. It reflects educational wisdom." Joseph Jastrow

Its purpose is to convince men and women who are neither morons nor geniuses that they can nevertheless have a vigorous and interesting mental life of their own, a life that is more than the mere parroting of current shibboleths, which has become the popular substitute for thought." Christian century

"As an assistance to the art of thinking, M. Dimnet gives much advice which would be extremely useful to anyone on the point of practising this art. If M. Jungle of the mind. 1931 Scribner $2.50; 8s 6d **153**

1 Psychology 2 Thought and thinking 3 Belief and doubt 4 Superstition 5 Occult sciences 31-30331

"Starting with the premise that 'thinking is not a natural, spontaneous process' but a painfully acquired ability Professor Swift goes on to discuss some of the easy substitutes for thinking in which people indulge. The author examines some of the cults which flourish today —astrology, mental telepathy, clairvoyance, new thought, psychoanalysis, numerology, faith cures, and many others, and shows how they confuse the mind and prevent normal living. These modern credulities, most of them survivals of old superstitions, disturb the mental poise and turn the mind into a jungle." Book rev. digest

The author "makes great play with the foibles of civilized man. He is able to produce a crushing list of modern credulities, being particularly severe on the habit in sensational journalism of playing up to these weaknesses." Times (London) lit. sup.

Finally he sees in the notion of an objective external world the greatest creation of all." Times (London) lit. sup.

The first is as old as man; the second has been in existence only a few thousand years." New republic

To the same source is traced life's meaning and value, its color and intensity, its worth and significance." Providence

T. A. Ribot's "Psychology of the emotions" (1897 Scribner o.p. 1933) is an older standard work which treats of both the general elements

Lund, Frederick H.—*Continued*
of emotion and the special emotions. J. T. MacCurdy's "Psychology of emotion, morbid and normal" (1925 Harcourt $7.50; Routledge 25s) is valuable to psychiatrists and students of psychology for the number of case-histories it gives, but it is also suitable for the serious layman

"A sensible discussion of the role the emotions can and should play in our lives." Cleveland

"Dr. Dunlap is not afraid of a little heresy nor does he hesitate to strike out boldly along lines of interpretation which may be useful to distraught men and women. . . Few books on psychology are so consistently readable, and few are so concerned with topics in which the layman knows himself to be vitally interested." Books (N.Y. Herald Tribune)

Sherman, Mandel, and Sherman, Mrs Irene (Case)

Fundamentals of logic. 1933 Scribner $2; 10s 6d 160
1 Logic 33-4919

"The book, an elementary text, is divided into three parts. Part one is devoted to the analysis of logic in argument; part two is an exposition of the principles of symbolic logic; part three is a statement of the fundamentals of scientific methodology. To help in the exposition a summary is given at the end of each chapter." Book rev. digest
"The most elementary exposition of 'modern logic' that has yet appeared. . . For any one who is interested in learning something about 'symbolic' logic the first two parts of this book afford a notably clear and simple introduction to the subject." Springfield Republican

General logic; an introductory survey. 1931 Scribner $3; 12s 6d 160

"Not an elementary handbook, but a comprehensive examination of the science of logic, with many criticisms of principles enunciated by various authorities and commentators. The inherent difficulty of the subject is considerably mitigated by the author's clean-cut thought and spirited expression." Springfield Republican

Enriques, Federigo
Historic development of logic; auth. tr. from the Italian by Jerome Rosenthal. 1929 Holt $3 160
1 Logic 29-12222

"The translator's preface calls attention to the fact that the history of logic is a neglected field, there being but one book on this subject in English and that an antiquated one. The present work, tho comparatively brief, goes deeply into the historical sources of logic, mathematics and philosophy." Book rev. digest
"An invaluable text for students of logic, philosophy, or mathematics who seek light on the first principles and structure of science." Journal of religion

Mr. Mace has performed a valuable service in bringing together, briefly, systematically, and often with important additions of his own, the contemporary English efforts to improve on Mill. . . An unusual feature of the book is a good sketch of Yule's theory of attributes in connection with the application of the logic of classes to statistics." Journal of philosophy

A more extensive treatment with the same point of view is L. S. Stebbing's "Modern introduction to logic" (1930 Crowell $4.50; Methuen 15s)

"The discussion of the ethical problems of the economic life is especially timely and enlightening. There is no laying-down of the law, no confusion of the moral problems with questions of technique, but, instead of this, a clear and concrete statement of the principal moral problems presented by contemporary industry. I know of no more carefully considered, balanced introduction to this vital subject." International jour. ethics

The book might well have been called Ethical Living instead of Intelligent Living. . . On the whole, the book may be unhesitatingly recommended. Its unscientific science will easily be forgotten in view of its splendid common sense and the first-hand acquaintance with human nature as expressed in the central chapters." Survey

1 Ethics 4-10377

A good brief historical survey first published in 1886. The 6th edition is a reprint of the 1902 edition but adds a chapter on "Modern, chiefly English, ethics" by A. G. Widgery. Based on his article on "Ethics" in an earlier edition of the Encyclopaedia Britannica

R. A. P. Rogers's "Short history of ethics, Greek and modern" (1911 Macmillan $1.80; 4s 6d) is an elementary survey, largely descriptive but partly critical, to the end of the 19th century

Sockman, Ralph Washington

Morals of tomorrow. 1931 Harper $2.50; 8s 6d 170

1 Moral conditions 2 Ethics 3 Social conditions 4 Social ethics 31-2669

"In this book on morals Dr Sockman steers a middle course, leaning slightly toward the soundly conservative as compared with most contemporary moral reformers. [His] philosophy is based upon a Christian ideal of self-fulfillment rather than upon the development of individualism at the expense of social progress. Dr. Sockman is minister of the Madison Avenue Methodist Episcopal church, New York City." Book rev. digest

"Morals of Tomorrow is . . . witty, free from controversial sharpness, persuasive and amiable. It is not deeply original being in a good sense a popular presentation of contemporary ethical thought from a well-stocked file of notes." Bookman

Stabler, Walter Brooke

Creative Christian living. 1933 Univ. of Pa. press $1.50; Oxford 6s 6d 170

1 Christian ethics 2 Christian life 34-272

"Addressed particularly to youth these talks by the chaplain of the University of Pennsylvania make an appeal for Christian principles in both personal and social conduct." Book rev. digest

"This volume is a call to the heroic, the adventurous, the daring. It presents Christian living as no schoolboy 'dummy' bayonet practice, but a 'strenuous quest for a Truth that leads into a Way that issues in a Life.' A book such as this is a stimulant. Creative Christian Living should have a wide circulation." Crozer quarterly

Wieman, Henry Nelson

* Issues of life. (Mendenhall lectures) 1930 Abingdon press $2 170

1 Conduct of life 2 Christian life 3 Religion 31-96

Contents: Growing up; Living together; Maximum energy for living; Goods of the good life; Religion; God and the ideal; Life and scientific method; Personality; Last devotion

"The virtue of this book is its happy union of philosophic temper, religious spirit, and sense for practical problems which is so distinctive of Professor Wieman. In disciplined thought and expression, and faith in the efficacy of intelligence, the author is a rationalist; in sensitiveness to the 'compulsive lure of God,' he is a mystic; in shrewd and practical wisdom in dealing with concrete situations, he is an American." Christian century

171 ETHICS: THEORIES. PHILOSOPHY

R. C. Eucken's "Meaning and value of life; tr. by L. J. Gibson and W. R. B. Gibson" (1909 Macmillan $2; Black, A. & C. 5s), an expansion of the author's idealistic philosophy, will still be useful in libraries having it, tho it has not now the popular appeal that it once had

Nicolai Hartmann's "Ethics" (3v 1932 Macmillan v1, 3 ea $3.50, v2 $5; Allen, G. v1, 3 ea 12s 6d, v2 16s) is an important contribution to ethical theory by an exponent of the current German school of phenomenology

Adler, Felix

Ethical philosophy of life presented in its main outlines. 1918 Appleton-Century $3.50; 15s 171

1 Philosophy, Modern 2 Ethics 18-10283

" 'A philosophy of life growing out of the experience of a lifetime.' The first part is biographical and describes early influences in the author's life; the second part outlines the philosophy evolved from these early experiences and makes the application of his philosophical theory to his personal life and to social institutions. Dr. Adler's ethical conceptions are more noteworthy than his metaphysics." Cleveland

Broad, Charles Dunbar

Five types of ethical theory. 1930 Harcourt $4.50; Routledge 15s 171

1 Ethics 30-8851

A scholarly study of the progress of ethical theory in the systems of Spinoza, Butler, Hume, Kant and Sidgwick. The author is a lecturer in Trinity College, Cambridge, and the treatment is philosophical rather than historical

"Dr. Broad has many of the more important merits of a fine philosophical writer. He ingratiates himself at once by his unpretentiousness and remarkable lucidity. He is a rigorous and acute logician, quick to smell and pounce upon a fallacy or an ambiguity." Nation

Everett, Walter Goodnow

Moral values; a study of the principles of conduct. 1918 Holt $2.75 171

1 Ethics 18-3232

"Professor Everett has a remarkable faculty for bringing out the human significance of even the most abstruse ethical theory. It is this quality of profound and genial insight into human character which, coupled with his mature scholarship, makes Professor Everett's book especially valuable for the general reader, particularly for high school teachers, and even for the older students." School rev.

Hobhouse, Leonard Trelawney

1 Ethics 2 Philosophy and religion 29-10228

"The first part of the book is an eloquent and moving analysis of the confusion and disillusion of the modern age. The rest of the book is an attempt to find a way out of this

Lippmann, Walter—*Continued*

chaos, thru the acceptance of a higher humanism and a way of life inspired by the ideal of 'disinterestedness' in all things." Book rev. digest

"One of the finest qualities of the 'Preface to Morals' is a certain strain of literary self-conquest, wholly in keeping with the author's idea of asceticism, which saves the book from falling into the slough of cleverness, and gives it a lean literary vigor and sincerity. . . This is a sound and valuable book; honest, unafraid, and austere." Yale review

Mill, John Stuart

Utilitarianism, Liberty & Representative government. (Everyman's lib.) 1910 Dutton 70c, lib. binding $1; Dent 2s, lib. binding 3s 171

Royce, Josiah

Philosophy of loyalty. 1908 Macmillan $2.50; 12s 6d 171

1 Ethics 8-11729

"A thoroughly sincere attempt to set clearly before the American people, the need for aiming at the highest ethical ideals in their daily life, in their intercourse with one another, and in their relations with the outside world. Believing that certain . . . conditions and tendencies indicate a lowering of individual and national standards, Professor Royce gives himself resolutely to the task of remedial and constructive criticism." Outlook

Russell, Bertrand Arthur William Russell, 3d earl

* Conquest of happiness. (Star ser.) Garden City pub. co. $1 171

1 Happiness 33-12273

Popular cheap reprint of book published by Liveright in 1930. The original edition is still available in England (Allen, G. 7s 6d)

"Genuinely helpful diagnoses of the causes of unhappiness, together with a common sense consideration of the possibilities of happiness and practical 'ways of escaping from psychological sources of misery.' Based on the author's own experience and observation." N.Y. libraries

"Mr. Bertrand Russell's new book is beautifully planned and written; it is neither more nor less than a guide to the fuller enjoyment of life. The author knows just what he wants to say, and says it brilliantly; the rest—the cloudland of mysticism and the dubious terrain of physical health—remains unseen. The worth of a guide is in its omissions as much as in its contents." Spectator

Sedgwick, Henry Dwight

Art of happiness; or, The teachings of Epicurus. 1933 Bobbs $2 171

1 Epicurus 2 Egoism 3 Hedonism 33-32242

"Mr. Sedgwick has given us a very gentle and persuasive study of Epicurus and his way of life. . . He has taken us back to the fourth century B.C. and shown us, not the selfish, pleasure-loving figure as commonly conceived, but rather a wise-counselling sage amid his delightful surroundings, one for whom he has a deep sympathy and a rather adequate understanding." Sat. rev. of lit.

"Those who have read Mr. Sedgwick's previous books will not need to be told with what charm and interest, with what innumerable small delectable graces of thought and expression and with what subtly engaging spirit he permeates this new volume." N.Y. Times

172 STATE ETHICS

172.4 International ethics. Peace and war

For books on war and peace which involve international relations see class 341.6. Some libraries may prefer to put all the material in one number or the other

Allen, Devere

* Fight for peace. 1930 Macmillan $5 172.4

1 Peace 30-30292

"While he has not written a chronological history of the peace movement, the author has brought together much interesting material bearing on the subject. He has recapitulated the arguments for peace and made some very pertinent observations on the present standing of the movement." Wis. bul.

"Though not a professional historian, Mr. Allen has produced a book which is both scholarly and popular. Characterized by admirable factual accuracy, it is a very valuable contribution to the story of the unofficial peace movement in America." Nation

References: p690-716

(ed.) Pacifism in the modern world. 1929 Harper $2 172.4

1 Peace 29-19444

A symposium on the subject with an introductory historical essay by the editor

"Together the essays scarcely present a philosophy, still less a program. But they do present a general point of view variously applied to problems of national security, class war, the treatment of criminals, etc., which seeks a substitute for the usual method of violence, whether as the prop of what is or the weapon of change. . . One of the most valuable features of the book is Mr. Allen's brief historical introduction." Books (N.Y. Herald Tribune)

Angell, Sir Norman

The great illusion, 1933. 1933 Putnam $2.50 172.4

1 War 2 War, Cost of 3 Disarmament 4 Imperialism 5 Commercial policy 33-9071

A new version of a well-known argument against war, published first in 1910 and now revised to show how important the case is in the light of present economic conditions

"It is a pity that Sir Norman Angell has not exactly reproduced the text of the Great Illusion as it appeared in 1910 without altering a word, but prefacing it with his own criticism of himself. . . In the earlier edition . . . there were many over-statements. But they do not affect the validity of his main argument, or detract to any considerable extent from the high prophetic character of his remarkable book —a book which, if it had been heeded as much as it had been commented on in 1914, might have saved the world from disaster. And his lessons are still needed." Spectator

The author's "Unseen assassins" (1932 Harper $3; Hamilton, H. 7s 6d) is an analysis of the causes of war. The author decides that nations do not want war but that it comes thru failure to see in advance policies that render it inevitable

That next war? tr. by Ernest Classen. 1931 Harcourt $2.50; Allen, G. 10s 6d 172.4

1 War 2 World politics 31-26376

"A significant review of conditions that make for war and peace in the world today, from the pen of a Swedish military officer. Many steps have been taken toward organized peace in recent years, but these new movements 'have not yet succeeded in changing the historical preparations for war.' The analysis of 'six dangerous points' is an especially valuable feature." Wis. bul.

Inter-parliamentary union

What would be the character of a new war? by Norman Angell, K. A. Bratt, G. B. R. Sergel, and others. 1933 Smith, H. $2.50; Gollancz 5s 172.4

1 War 2 Military art and science 33-16598

"A symposium of eighteen experts. . . Nearly half of the contributors are military men: generals of the British, French, German, American, Japanese armies. These are not people who grow hysterical at the thought of blood; they write calmly, dispassionately, and technically. And this makes the book, if possible, even more harrowing. . . It all reads like a nightmare, but the statistical figures and chemical formulas given by these able generals may convince anyone that the discussion is in earnest." Boston

"For all students of international affairs and for students of contemporary moral practice the articles in this book provide most valuable material." International jour. ethics

In "The intelligent man's way to prevent war" by Sir Norman Angell and others, edited by L. S. Woolf (1933 Gollancz 5s) seven well-known men discuss this related question. Among the contributors are Gilbert Murray, Harold J. Laski, and C. M. Lloyd

Nearing, Scott

War; organized destruction and mass murder by civilized nations. 1931 Vanguard press $3 172.4

1 War 31-24911

"The author argues that war is an inevitable feature of modern civilization and that as the world is organized now all efforts to prevent wars are bound to be futile. He looks forward to the establishment of a warless society thru proletarian revolution." Wis. bul.

"Quite apart from its revolutionary thesis, this work will be a standard reference on war. . . Historians may feel that Dr. Nearing has not been particularly convincing in explaining away the wars which antedated capitalism; but a more obvious fault is his failure to answer the argument that a proletarian revolution is not needed to stamp out war because internationalization of capital will nullify national rivalry." New republic

Nichols, Beverley

Cry havoc! 1933 Doubleday, Doran $2.50; Cape, J. 7s 6d 172.4

1 War 2 Peace 33-27405

"A vehement, slightly chaotic indictment of agencies working for war—armament industries, history textbooks, advocates of large navies, and others—by a young Englishman who is convinced that the pacifist attitude of non-resistance is not enough and must be supplemented by a re-educated public opinion." Bkl.

Page, Kirby

National defense; a study of the origins, results and prevention of war. 1931 Farrar $3 172.4

1 War 2 European war, 1914-1918—Causes 3 European war, 1914-1918—Influence and results 4 U.S.—For. rel. 5 Peace 6 International cooperation 31-26853

The author, who is editor of the "World tomorrow," studies in part I the causes of the World war such as Nationalism, Imperialism, Militarism, etc., thru quotations from national leaders of all countries; in part II the results of the war in destruction, economic and political consequences, moral and spiritual effects; in part III the existing perils to world peace; and in part IV means of preserving national security without resorting to arms

"Here is the challenge to the world's intelligence, a practical challenge, practically presented by an internationalist and an idealist. Whether Mr. Page's program for amelioration is well founded is a matter for debate . . . but as to the facts which underlie his convictions there can be no two opinions." Outlook

The author's earlier book "War; its causes consequences and cure" (1923 Doran o.p. 1933) makes a vigorous plea for peace

A helpful book for those writing orations on world peace." Cleveland

R. H. Abrams's "Preachers present arms" (1933 Round table press $2.50) is a study of the attitude of churches and clergy toward war thru-out American history. A large part of the book is concerned with the part churches played during the World war

Wingfield-Stratford, Esmé Cecil

They that take the sword. 1931 Morrow $4; Routledge 12s 6d 172.4

1 War 2 Combat 3 Militarism 4 Soldiers 5 War and religion 31-28119

"A study of war and the warlike spirit from earliest times to the present. The author does not believe that man is essentially combative; the cave man of tradition is a myth. He doesn't believe that nations have risen to power through military prowess, rather the contrary. He believes that the military mind is a reactionary mind. These and other themes are developed, leading up to the utterly destructive character of modern warfare. A book with an appeal to the thinking reader." Wis. bul.

"Peace and war" by Guglielmo Ferrero, translated by Bertha Pritchard (1933 Macmillan $3.25; 8s 6d) consists of four essays by a distinguished historian on the problem of war, conditions of lasting peace, the end of monarchy, and paganism and Christianity

Clark, Thomas Arkle
High school boy and his problems. 1920 Macmillan $1.50, text ed $1.20 173
1 Boys 2 Education 20-8370

"Dean Clark of the University of Illinois for many years has made boys and their ways the chief concern of his official life. . . He knows the temptations that beset the young man and is not astonished that they are sometimes too much for him. He is inclined to overlook the minor shortcomings, but conceives it his duty to warn the boy of the risk he runs in yielding to evil suggestions. For the rest the book has much in it that is of interest, and the dean is particularly happy in his chapters on the value of systematic study and on choosing a career or a college." "Altho the emphasis first and last is on the religious factor, the author gives thoroughly rounded attention to social and other aspects of family life today. He is especially good on the problems of young people." Wis. bul.

"Though not a profound discussion of the family, the book is characterized by a vigorous idealism, born of depth of religious conviction. It is wise rather than scholarly and reveals a tolerant and sympathetic insight into an exceedingly difficult problem. The writer shows a wide range of information, based in part at least upon personal investigations." Christian century

The author, a well-known champion of woman's emancipation . . . has turned her energies to the broadening of woman's conception of her natural mission of wife and mother. Her chapters, as follows, are characterized by originality, revolutionary insight, and ethical purpose: The right of the child to choose his parents; The unborn race and woman's work; Education; Homelessness; Soul murder in the schools; The school of the future; Religious instruction; Child labor and the crimes of children." Newsom, George Ernest

New morality. 1932 Scribner $1.75; Nicholson 6s **173**

1 Marriage 2 Sexual ethics 3 Family 33-4577

"Mercilessly, step by step, and through the processes of deep thought and painstaking research the author exposes and condemns the New Morality—'the waning twilight of values,' and then in his final chapter, headed 'A Better Hope' he sums up his championship of the Family. . . . A rather remarkable book ends on a note of hope except for those who are striving to make the world sexually safe for the promiscuous." Saturday rev.

"Mr. Newsom perhaps just a little defeats his own aim by his very stiffness. His argument, for instance, that the individual must be sacrificed to the family is, in its way, just as narrow as the demands of the New Moralists that the family shall be sacrificed to the individual." Times (London) lit. sup.

1 Family 2 Marriage 3 Social problems 26-13737

"This consideration of family life from the biological point of view complements the author's earlier work 'Modern marriage,' in that it discusses what society can do to make the individual's marriage a success. From an examination of the various types of mating the author finds that monogamous marriage is biologically the most natural as well as the best for the race. He points out the factors inimical to this type of family life, and suggests how they may be controlled." Book rev. digest

"One of the least prejudiced and most comprehensive discussions of marriage as it exists to-day. . . The book is written out of experience and wide reading. . . Borden, Mary

* Technique of marriage. 1933 Doubleday, Doran $2.50; Heinemann 7s 6d **173.1**

1 Marriage 33-27170

"To Mrs Borden the success of the marriage partnership rests upon two qualifications essential to all social relationships: good manners and worldly wisdom. From this angle of common sense she discusses the social life of two people, the engagement and wedding day, the ordeal of the honeymoon, and other aspects of marriage, showing the reasons why, in so many cases, it goes wrong." Book rev. digest

This book "has a different and interesting treatment, a freshness of viewpoint and a genuine value that make it worth the reading of several kinds of people. . . Its author depends for the solution of the unhappy complications of marriage mainly on a practical approach to them and generous common sense in their treatment. She does not touch at all upon the physiological factors that have been much emphasized in many recent books." N.Y. Times

The subject is discussed in its various aspects, sociological, psychological and physical, the author's aim thruout being 'to interpret marriage as a human experience in such a way as to bring to the student insight and a familiarity with the resources that science has given for dealing with marriage problems.' References at end of chapters. Index." Book rev. digest

"This book is, in the estimation of the present reviewer, the best Dr. Groves has ever written. Although one cannot wholeheartedly subscribe to all he says, one can at least appreciate the real difficulties he faced in making a selection of those experiences which would most adequately describe the personal adjustments of husband and wife in the marriage relationship." Journal of home economics

Though it contains many suggestive historical references, the book can not be regarded as an exhaustive or important historical work. "As now collated, the chapters make up a wise and carefully written book on subjects such as courtship, children, birth control and continence, with which those about to marry are confronted. The general point of view is that the spiritual and scientific aspects of marriage cannot be considered apart. . . The essays are outspoken in detail; but the Bishop of Liverpool is justified in the claim he makes in a foreword that the material has been 'carefully and judiciously set forth'; and it presents a balanced view too frequently lacking in treatises on the subject of sex." "London's famous woman preacher treats the relations between men and women in a frank, sensible manner and from the viewpoint of true morality. Conservative yet tolerant." N.Y. state lib.

"Miss Royden has the sympathy of complete comprehension for the honest conventional point of view. It is this which makes her book so valuable. With all her progressiveness and her desire to think things out afresh, she is yet careful to preserve the large element of good that remains in ordinary standards. Her book, in our opinion, displays at its best the feminine standpoint in the treatment of a subject." Spectator

"This small book is of inestimable value for those who need to realize that fine sex relationship is an art, which requires knowledge of technique. It is very specific as to the technique, and is written with exceedingly good taste." Mary Ware Dennett

"Dr. Wright has seized an opportune moment in our revised attitude to give an exposition of facts, methods of approach, physiological and psychological factors, which is . . . lucid, honest and straightforward. . . the modes of friendship, compares love and friendship, and discusses the possibility of friendship between a man and a woman." Book rev. digest

"In its mode, which is French and exquisite, the book is excellent, though to some tastes it will seem too French and too exquisite. It contains wisdom expressed meticulously, which to some will seem a collection of platitudes. It is the wisdom of a perfectly-ordered French life, so perfectly ordered that one might call it precious." Sat. rev. of lit.

Powys, John Cowper

Philosophy of solitude. 1933 Simon & Schuster $2; Cape, J. 6s 177

1 Solitude 2 Self 3 Happiness 33-4365

The author has written this book for dwellers in our American cities to help them to develop a philosophy of solitude thru which they may create for themselves "a continuity of secret happiness, in defiance of the world"

"'A Philosophy of Solitude,' delicate, poetic, distinguished, offers no solution of the world's problems; but it points out a path for the individual self, a path which followed can but lead to ever-increasing repose. . . . Mr. Powys is to be welcomed to that gracious company of those who, from Lao-tze, who composed the Tao Teh King five centuries before Epictetus and seven centuries before Marcus Aurelius, down to Emerson and Thoreau, have taught that individualism is right and proper in the world." N.Y. Times

P. F. Anson's "Quest of solitude" (1933 Dutton $2.50; Dent 7s 6d) is a history of protagonists of the solitary life, from John the Baptist to Charles de Foucauld, the nineteenth century hermit of the Sahara, and Henry D. Thoreau

178 TEMPERANCE. PROHIBITION

This Catalog uses this number for prohibition since that is the number used in the Dewey decimal classification. Some libraries may prefer to class all this material in 351.761, Liquor regulation

D. L. Colvin's "Prohibition in the United States; a history of the Prohibition party and of the prohibition movement" (1926 Prohibition national committee $2.50; Hodder 16s) is an official history of the movement from 1785 to 1926. It contains little about the Anti-saloon league. If a volume on the League is needed, P. H. Odegard's "Pressure politics; the story of the Anti-saloon league" (1928 Columbia univ. press $3.50; Oxford 17s 6d) is a well documented history and study of the tactics used by the League to influence legislation

"Professor Binkley presents a moderate and concise analysis of the workings of prohibition . . . He puts forward a "modest proposal' that the liquor user should be licensed in much the same fashion that the automobile driver is licensed, that there should be a system of responsible drinking—a registration for drinkers and a bond of dealers. Those whose drinking became a nuisance to the neighbors or a menace to the public would be denied the privilege." Books (N.Y. Herald Tribune)

"A review of methods of liquor control in various countries. Of English origin so does not overstress the situation in the United States. Well worth bringing to the attention of readers who want a broad view of the subject." Wis. bul.

"[A] little book, on which the author is to be highly commended. It is quite impartial, which is no small matter in regard to a subject usually discussed with a distinct bias and occasionally with a good deal of heat; and it covers the whole field so far as that is possible in limited space." Times (London) lit. sup.

Emerson, Haven, and others

(eds.) Alcohol and man. 1933 Macmillan $3.50; 18s 178

1 Alcohol—Physiological effect 32-31891

"The sixteen articles on the effect of alcohol on man, which make up this composite volume, present only such facts as have been determined by science, and opinions supported by these facts. Most of the authors are physicians and members of university faculties and the question of prohibition does not enter into their discussions, which tend to place the emphasis on the effect of alcohol on the mind rather than on the body." Bkl.

"What remains to be done with the work of these scientists is to make their information so simple as to reproduce it in the knowledge of school children and common people. That is the task of preachers and teachers. This book is for those groups, and it ought to find its way speedily into every school and city library in America." Christian century

Fosdick, Raymond Blaine, and Scott, Albert Lyon

* Toward liquor control. 1933 Harper $2 178

1 Liquor problem 2 Liquor laws 33-32035

"The survey conducted under the direction of Messrs. Fosdick and Scott, represented a wide gathering of facts and opinions and a study of liquor control systems in Canada and on the continent of Europe. A summary of these systems is given in the appendix. . . The report dismisses the idea of federal control of liquor traffic and urges that enlightened control legislation be enacted by individual states." Springfield Republican

"This book presents an interesting mélange. Side by side with a realistic appreciation of conditions is to be found a naive disregard of factors essential to the control of the traffic in intoxicants in this country. The book has, however, a twofold interest. On the one hand it exhibits an interesting documentation of the current state of the public mind. On the other hand there arises a consideration of the adequacy of the means which we are urged to adopt toward liquor control." Sat. rev. of lit.

Mr Merz has based his work on files of press clippings covering the past ten years; but in his opening chapter he also summarizes the story of the dry movement up to the adoption of the Eighteenth amendment. A final chapters sums up the needs of the situation today." Book rev. digest

Peabody, Richard Rogers

Common sense of drinking. 1931 Little $2 178

1 Alcoholism 31-9349

"Not a book on prohibition but an exposition of the author's methods, based on studies in abnormal psychology, of treating alcoholic patients and inducing them to give up drinking. Physiological and moral aspects of the question are purposely left out of the discussion. The book is based in part on a paper published in 'Mental Hygiene' and on short stories which appeared in the 'New England Journal of Medicine' and the 'British Journal of Inebriety,' with the addition of many illustrations taken from case histories and a simplification of language." The thesis is that prohibition has not been efficiently enforced, but can be, and even as enforced is far better than attempts at regulation of the liquor traffic. Unquestionably one of the best presentations of the position of the 'drys' on the prohibition question." Wis. bul.

Herman Feldman's "Prohibition; its economic and industrial aspects" (1927 Appleton-Century $2; 7s 6d) rewritten from 20 articles originally prepared for the Christian Science Monitor, a statistical study based upon information secured by questionnaires, is an older work favorable to prohibition

"The book is a model of skilful compression and arrangement. It is not quite easy reading, though very well written, but can be recommended to anyone who . . . desires to see Aristotle's work surveyed as a whole and placed in its true position, in regard both to his predecessors and the subsequent trend of western thought." Nature

Dewey, John

Experience and nature. (Paul Carus foundation lectures) [new ed] 1929 Norton $4; Allen, G. 12s 6d **191**

1 Experience 2 Philosophy [25-4301]

In this edition, chapter I is rewritten to serve as a simpler introduction to the book

"With monumental care, detail and completeness Professor Dewey has in this volume revealed the metaphysical heart that beats its unvarying alert tempo through all his writings, whatever their explicit themes." Books (N.Y. Herald Tribune)

"It has distinction of style and a certain eloquence and persuasiveness. It has the obscurity of discourse which is both abstract and literary, having neither schematic precision nor concrete vividness; but how the author's peculiar philosophy could be more aptly insinuated into the reader's mind is difficult to conceive." Sat. rev. of lit.

Philosophy of John Dewey; sel. and ed. by Joseph Ratner. 1928 Holt $4; Allen, G. 16s **191**

Books (N.Y. Herald Tribune)

‡ Quest for certainty: a study of the relation of knowledge and action. (Gifford lectures, 1929) 1929 Minton $4; Allen, G. 10s 6d **191**

1 Knowledge, Theory of 2 Thought and thinking 3 Science—Philosophy 29-23500

"This is a completer and better-rounded statement of the author's point of view than any which has preceded it, and on some points it is a clearer one. . . It begins, one feels, where the author himself begins; the directing intent is laid down in the opening pages; and it moves forward with uninterrupted sweep to that which, one is persuaded, constitutes the personal goal of his thinking." Journal of philosophy

"Apart from the technical merits of the theory propounded, the book deserves great praise for its penetrating analysis of the present state of philosophical thought, and clear presentation of the problems with which what Professor Dewey calls the traditional philosophies are beset." C. E. M. Joad in Spectator

The author's "Philosophy and civilization" (1931 Minton $5) is a collection of essays in which he attempts an application of philosophy to present-day civilization. Almost all have appeared in learned periodicals or symposiums

"Professor Riley's book is an account of American metaphysics and his description of the earlier part of his subject is one for which a reader should feel greatly indebted. Here, Professor Riley is unusually well informed. As for the later chapters, those on pragmatism and the new realism, probably no one can yet write of these topics in a way to satisfy anybody but the writer himself." Journal of philosophy

"The book has all Mr. Santayana's well-known merits: beauty of style, a truly philosophic temper, a wide survey of history and thought. It is full of sayings that are profound, delightful, or amusing. And it has the great merit of not pretending, by bad arguments to establish doctrines which we accept on instinct, but cannot hope to prove." Bertrand Russell in New statesman

Santayana's philosophy is further expounded in the series called "Realms of being," consisting of "Realm of essence" (1927 Scribner $3.50; Constable 12s) and "Realm of matter" (1930 Scribner $3.50; Constable 12s)

Haeckel, Ernst Heinrich Philipp August

Riddle of the universe at the close of the 19th century; tr. by Joseph McCabe. 1900 Harper $2.50 **193**

1 Monism 2 Evolution 3 Religion and science 0-6403

Available in England from Watts at 1s

The famous zoologist undertook to organize the latest results and hypotheses of natural science into a system of Monism. The second work specifically devoted to this purpose was his vigorous and dogmatic "Riddle of the universe." The Monism of Haeckel combines spiritualistic and materialistic ideas in a way that is not altogether clear. But Haeckel's significance does not consist in his logical consistency, but in the tremendous enthusiasm aroused by his ideas, and in the fanciful vividness of his expositions. Adapted from Harald Høffding's Brief hist. of modern philosophy

Kant, Immanuel

Critique of pure reason; tr. by N. K. Smith. 1929 Macmillan $8.50; 25s **193**

1 Knowledge, Theory of 2 Reason 3 Causation 31-1002

"In 1781, he published his 'Critique of Pure Reason,' nearly, if not quite, the most important philosophical treatise ever written. The essential doctrine of this book is the thought that man's nature is the real creator of man's world." Josiah Royce

Where the "Selections" listed below are not sufficient for the needs of the library, this is the first volume of Kant to buy. It is a recent translation from the second German edition (1787). An important translation by Max Müller (2v Macmillan $5; 25s) was first published in 1881

Two other works of the author's which are of importance to larger and special libraries are "Critique of judgment" translated by J. H. Bernard (1892 Macmillan $4.25; 12s 6d) and "Critique of practical reason and other works on the theory of ethics" translated by T. K. Abbott (Longmans $4.75; 12s 6d)

Nietzsche, Friedrich Wilhelm

Beyond good and evil; tr. by Helen Zimmern. Modern lib 95c, Allen, G. 7s 6d **193**

20-20361

Originally published in 1886. This edition is a reprint, in less expensive format, of the one published by Macmillan at $2.75

"An explanation and an elucidation of 'Thus spake Zarathustra'. . . In it Nietzsche attempts to define the relative terms of 'good' and 'evil' and to draw a line of distinction between immorality and unmorality. . . His object was to establish a relationship between morality and necessity and to formulate a workable basis for human conduct. Consequently 'Beyond good and evil' is one of his most important contributions to a new system of ethics, and touches on many of the deepest principles of his philosophy." W. H. Wright in Introduction

* Thus spake Zarathustra; tr. by Thomas Common. Modern lib. 95c; Allen, G. 10s **193**

23-6730

First published 1883-84. This edition is reprinted from the one published by Macmillan in 1924 and still available at $4

"The doctrine of 'Zarathustra' is that 'good and evil are purely relative. . . There is one morality for the strong, vigorous, efficient man, and another for the weak, average, subordinate man.' Nietzsche writes a rhapsodic prose, conspicuous for a charm and clarity of style that is unique in German literature." A. D. Dickinson

Schopenhauer, Arthur

* Selections; ed by D. H. Parker. (Modern student's lib.) 1928 Scribner $1.25; 3s 6d **193**

28-12566

The greater part of this edition is devoted to selections from "The world as will and idea." There are also chapters from "On the will in nature" on Comparative anatomy and Physical astronomy, and essays from "Parerga and Paralipomena" with titles On education and On women. A biographical and critical essay by the editor prefaces the work

Schopenhauer "offers us an empirical metaphysics, and because he stands on the ground of experience he is the first to call that which 'constitutes the basis of being and its substance' by its right name: Will. That is what constitutes his originality, his merit, the secret of his success in contemporary Germany." Alfred Weber

subjects: On God, On man, and On man's well-being. The appendix gives the sources of the selections from the "Ethics." Introductory material includes a short biography and a critical essay. The "Ethics" is available in Everyman's library edition (Dutton 70c, lib. binding $1; Dent 2s, lib. binding 3s)

"Spinoza, perhaps more than any other great philosopher, directed all his work to a single unvarying aim. The question of how man shall live to realize his best potentialities is never far from any problem on which he embarks. . . [He] did not trouble to treat metaphysical, mechanical, methodological problems separately, but only as they are the necessary preparation to ethics." R. P. McKeon

R. P. McKeon's "Philosophy of Spinoza; the unity of his thought" (1928 Longmans $5; 25s) is a scholarly work valuable for the student. "Spinoza and Buddha" by S. M. Melamed (1933 Univ. of Chicago press $3; Cambridge univ. press 14s 6d) is a philosophical study of Spinoza's background and influence, which maintains that his philosophy was derived from oriental thought, not from European

This author's "Matter and memory; tr. by N. M. Paul, and W. S. Palmer" (1911 Macmillan $4; Allen, G. 12s 6d) is perhaps preferred by philosophers, but it is a little advanced for the average reader. For his "Creative evolution" see class 110

"In writing this book Mr. Tsuchida's purpose was to give to Western readers an idea of what educated Japanese and Chinese are thinking, and to present, through his criticism of this thought, his own views. . . Mr. Tsuchida devotes only two of his twelve chapters to Chinese thought, but he brings out, in that limited space, the fundamental differences in the thought of the two countries." Boston Transcript

"Dr. Tsuchida has not room to treat these questions at all fully, nor does he give much indication of the quality of the surprisingly numerous thinkers whom he mentions. But the ground he opens up is entirely new to Western readers, and even his rather hurried indications are extremely welcome." Times (London) lit. sup.

Also available in a satisfactory cheap reprint in the Red label reprints series (Harper $1)

"A good discussion of religion from the standpoint of philosophy, clearly expressed and in harmony with modern trends of thought." Chicago

"The layman will understand what the author is talking about, and will find himself relaxing from the muscle tensions which a theologian always seems capable of inducing in him. That the book was written for him is apparent from its almost total lack of footnote apparatus and from its easy-reading type. . . No one can gainsay the clarity, charm, and cogency with which it is written." Journal of religion

"The author is concerned with the problem of what basic religious ideas should be taught to children. The conflict between traditionalism and modernism as experienced by the modern parent is fully discussed, and methods for building up a positive faith are offered. Should be welcomed by parents facing the question." Wis. bul.

"Concise and forceful [the author] faces difficulties frankly, convinced of the potency of the certitudes he has to offer. . . His approach is that of modern psychology rather than that of traditional apologetics." Christian century

1 Religion 2 Religion—Philosophy 28-30166

"Surveying the whole field of the history of theology Mr. Baillie attempts a fresh evaluation of the nature of religion. While he may have added no new insight to the vexing problem of religion he has done more than give us a mere historical survey of conflicting theologies. . . Mr. Baillie has made the best defense of the Kantian position in our generation." Books (N.Y. Herald Tribune)

"It may seem to some that Professor Baillie concedes too much to the anthropologists and allows too little to the distinction between origin and validity when he owns to the return of misgivings as to the ethical import of investigations into primitive cults; but this . . . is unessential and detracts not at all from the value of his sincere and distinguished work." "In these essays on the philosophy of religion, the author, formerly professor of philosophy in Yale University, examines and rejects the various modern solutions of religious knowledge, the evasions and naturalizings by which religion is denatured and its essence lost. His basic argument is that the 'problems of religion are philosophical, and there is no substitute for a philosophy of religion.'" Book rev. digest

"Among the younger American theologians no one has a better understanding of the workings of the modern mind than Walter Marshall Horton of Oberlin. . . ‡ Meaning and truth of religion. 1933 Scribner $3; 12s 6d 201

1 Religion—Philosophy 33-8768

"This finely composed and beautifully written book is a vindication of religion in our time. True to its title, it interprets the meaning of religion in terms of the best contemporary thought; and then undertakes to prove its truth or soundness as rooted in the very heart of life. Fundamentally orthodox in its reaffirmation of the historic postulates of God and the soul, free will and immortality, the book is radical in its analysis of the religious principle itself. . . Professor Lyman conducts his inquiry with an utterly free spirit, an easy mastery of his material and a firm conviction of faith as based on what he finds to be knowledge of our time." J. H. Unfashionable convictions. 1931 Harper $2; 7s 6d **204**

1 Religion—Addresses, essays, lectures 31-32250

"Among the unfashionable convictions of which Dr. Bell writes are the following: that religion is a necessary discipline to him who would come at truth; that earthly happiness is a poor sort of goal; that tolerance is frequently an evidence of an enervated personality; that patriotism has developed into a disease called nationalism; that the modern revolt against Christian ethics is merely a protest against Victorian mistakes." Book rev. digest

"Dr. Bell is conservative, even old-fashioned, and not ashamed of it. . . . In his mingled reaction and revolt, Dr. Bell is pre-eminently a man of convictions. He knows what he thinks, and why. Take his ideas, or leave them! Here they are, stoutly and bravely stated." J. H. Holmes in Books (N.Y. Herald Tribune)

Gilkey, Charles Whitney

Present-day dilemmas in religion. (Cole lectures for 1927) 1928 Cokesbury press 75c **204**

1 Religion—Addresses, essays, lectures 28-8828

"In alluring literary style and with an abundance of pertinent references and citations, Dr. Gilkey has sympathetically pointed out real issues as contrasted with superficial ones. The outcome is a wholesome presentation of a truly catholic religious faith in contrast to sectarian and provincial contentions. Theology is almost entirely thrust into the background, and vital religious experiences are allowed to speak at first hand." Journal of religion

Jacks, Lawrence Pearsall

Living universe. 1924 Harper $1; Hodder 2s 6d **204**

1 Church and education 2 Civilization 3 Immortality 24-3283

"Of these three lectures by Principal Jacks, two were delivered on the Hibbert lectureship and one was given in Oxford to university extension students. The thought underlying them all is that the universe is a living, not a dead, lifeless mechanism, and that we are fellow-workers in its creative evolution. In the first lecture he shows that religion and education are a unity and that a religious spirit must enter into education and an educational spirit into religion. The second lecture presents the ideal of a civilization which shall direct itself to developing the spirit of man instead of exploiting the material world. The third expresses his conception of immortality in a living universe." Book rev. digest

Religious perplexities. (Hibbert lectures, 1922) 1923 Harper $1; Hodder 2s 6d **204**

1 Religion—Addresses, essays, lectures [23-7244]

"The perplexities with which these lectures deal are religious, not ecclesiastical; primary, not secondary; and faced, not evaded: the book appeals to the lay mind. It deals, in fact, with some of the central problems of religion in general and Christianity in particular; and it will come as a relief to those who, while dissatisfied with the thinness of modern theology, are consciously or unconsciously, seekers after God." Spectator

More, Paul Elmer

Catholic faith. 1931 Princeton univ. press $4; Oxford 18s **204**

1 Christianity 31-33421

"Mr. More once wrote a study of the Demon of the Absolute. His present book is an extended commentary of that provocative text. He abhors an Absolute in any form. An infallible church and an impeccable Bible he will not have, for they involve absolute authority. Protestantism he rejects for it is an absolute anarchy. . . . Since Rome will not do and Protestantism is hopeless, there remains only Anglo-Catholicism, and in the smooth waters of that form of faith Mr. More seems to have dropped anchor and come to rest." Books (N.Y. Herald Tribune)

Contents: Buddhism and Christianity; The creeds; Eucharistic sacrament; The church; Christian mysticism

"A challenging dauntless sort of book. Not in a long time has any one come forward in such exalted and at the same time practical spirit to question the tendencies of the modern world and to offer for its healing with such absolute conviction the ideals and purposes of religion." N.Y. Times

Six chapters of this book were originally delivered as the Wilkin lectures of 1931, at the University of Illinois

Contents: Need of religion; Religion we need; Religion and health; Religion and happiness; Religion and life eternal; Religion and the energies of men; Christianity and the motives of men; Religion and armaments; Mighty meek; What is spirituality?

"When he discussed 'The Religion We Need,' which is really the second theme of this book, he pointed away from the obscurantism, and the ethical blindness and impotence of so much of our traditional religion, to a 'high religion' not only philosophically respectable and in harmony with the facts of science, but able to make its social and ethical resources available to the solution of the problems of contemporary civilization." Paul Burt in Introduction

Whitehead, Alfred North
* Religion in the making. (Lowell lectures, 1926) 1926 Macmillan $1.50; Cambridge univ. press 6s **204**

1 Religion—Addresses, essays, lectures
26-15643

Contents: Religion in history; Religion and dogma; Body and spirit; Truth and criticism

"This small book consists of four lectures, but the matter of them might well have taken up four volumes. Professor Whitehead is one of the most valuable writers we have on philosophic matters, but he provides exclusively strong meat for grown men. He must be taken slowly and digested at leisure. . . The whole book is weighty almost over-weighty, with pregnant ideas." Times (London) lit. sup.

208 RELIGION—COLLECTED WORKS

Newman, John Henry, cardinal
Newman synthesis; arranged by Erich Przywara. 1931 Sheed $2.50; 7s 6d **208**

1 Catholic church—Doctrinal and controversial works
31-9434

"A collection of paragraphs from the works of Newman arranged so as to show his growth to full spiritual maturity, as well as the development of his theological system." Pittsburgh

"If the choice and order is somewhat influenced by the compiler's special angle of approach, it yet gives a remarkable and harmonious impression of his thought. The picture of Newman which emerges from these pages is that of a great and convinced ecclesiastic and superb literary artist, who was also a temperamental ascetic." Spectator

"Fine gold of Newman," collected from his writings by J. J. Reilly (1931 Macmillan $2.50) is another selection of short extracts, mostly a page or less in length, from the writings of Cardinal Newman. "Essays, critical and historical" (2v Longmans $4; 10s 6d) is a good representative collection of Newman's essays written in his characteristic attractive style. Most of them are concerned with religious subjects

1 Religious literature

A devotional anthology from the Christian classics arranged under the headings: Spiritual autobiography; Spiritual counsel; English mysticism and divinity; English religious poetry. "In contrast with the usual method, he gives us long rather than numerous selections—less than thirty in all—showing that he wishes us to have not a comprehensive, but a typical, series of extracts from the representative exponents of Christian literature." Catholic world

"Propaganda for the Catholic view of the world and for the Catholic type of Christianity constitutes the main purpose of this book and the guiding principle in the selection of its materials. . . The collection presents a great body of material which any earnest seeker of the heavenly path will be glad to have accessible in such convenient form." W. E. Garrison in Christian century

1 Free thought 2 Rationalism 13-20846

"A clear and comprehensive review of the growth of freedom of thought from ancient Greece and Rome to the present, showing considerable bitterness against the theological obscurantism which has in the author's opinion held human thought in prison." Cleveland

Fiske, John
Through nature to God. 1899 Houghton $1.50 **211**

1 Natural theology 2 Theism 99-1680

Contents: Mystery of evil; Cosmic roots of love and self-sacrifice; Everlasting reality of religion

"Seeks 'to solve the tremendous mystery of evil so as to give man a fuller sense of his high calling and a firmer assurance of the infinite wisdom and benignity.' It shows the range and power of love and self-sacrifice, and emphasizes the religious lesson which nature teaches. The second part is, with slight changes, the Phi Beta Kappa oration at Harvard university, June, 1895. Its original title was 'Ethics in the cosmic process.'" Pittsburgh

The author's "Idea of God as affected by modern knowledge" (1885 Houghton $1.50) treats the subject from the point of view that belief in a divine purpose is necessary to any consideration of evolution

Horton, Walter Marshall
* Theism and the modern mood. 1930 Harper $2; Student 4s, pa 2s 6d **211**

1 God 2 Humanism 30-8490

"A brave attempt to come to a critical understanding of humanism, to dethrone it, and to set in its place a workable and reasonable theism. The work is not ponderous, but brief, timely and admirably executed. It cannot but prove reassuring to those who have witnessed the armies of theism falling back before the advancing hosts of humanism. And it may serve to bring back God to many who have surrendered to the logic of the humanists, for it is this very logic which the author attacks most vigorously." Christian century

Age of reason; being an investigation of true and fabulous theology; ed by M. D. Conway. 1896 Putnam $1.75; 7s 6d **211**
4-1971

First published in complete form in 1795

"Paine's confession of faith is simple. He was an ardent Deist believing in a God who created the world, and who is known to mankind through the world which he created. Nature was Paine's Bible, and science its only interpreter. . . Paine's language was not shaped for conciliation. He spoke with the brutal freedom of a reformer. . . He wrote in clear, strong English which the people could understand; and he wrote as one of them." E. Sedgwick

1 Humanism—20th cent. 30-11928

212 THEOSOPHY

Blavatsky, Helene Petrovna (Hahn-Hahn)
Key to theosophy. 1913 Theosophy co. $2; Theosophical pub. house 7s 6d **212**

1 Theosophy 15-21954

First published in 1891

"'The Key to Theosophy,' written in question and answer form, presents philosophical ideas in clear, concise terms comprehensible to the average mind. It contains an excellent history of the Neo-Platonic Movement of the third century, gives a philosophical concept of God, and fully analyzes the complex structure of nature and man. The conditions of life after death and the question of Reincarnation are presented for consideration, while various ethical problems are discussed from the scientific point of view." L. C. Grugan in Wilson bul.

Two other very good books on this subject are: Mrs A. W. Besant's "Ancient wisdom, an outline of theosophical teachings" (1897 Theosophical press $2.50; Theosophical pub. house 5s) a well written account by a prominent theosophist, and A. B. Kuhn's "Theosophy; a modern revival of ancient wisdom" (1930 Holt $3) a study, chiefly on the life and teachings of Madam Blavatsky, which is limited to those aspects of theosophy which are in some manner distinctively related to America

1 Religion and science 2 Science—Philosophy 29-10527

"A discussion of the religious trends of the present which strives to be direct and to show where the present attitude leads." Providence

"His book has one exceeding great value, above all its other values; it makes unmistakably clear that the reconciliation of science and religion is no easy matter. . . Here is a clear account of one philosopher's prescription for an ailing religion to make it alive and well in a scientific age." Sat. rev. of lit.

Cotton, Edward Howe

(ed.) Has science discovered God? 1931 Crowell $3.50 215

1 Religion and science 31-30634

"Men like Millikan, Einstein, Conklin, McDougall, and Thomson have contributed to this volume their attitude and opinions relating to one of the most discussed subjects in the minds of intellectual people today." Pittsburgh

"As one would expect on reading the names of the contributors, there is in parts of the book some rationalization of early religious faith. But mainly the book is notable for rigorous definition of the limitations of the scientific method, for clear distinction between objective facts and subjective values, for scientific agnosticism, and for . . . reverence." Sat. rev. of lit.

Eddington, Sir Arthur Stanley

‡ Science and the unseen world. (Swarthmore lecture, 1929) 1929 Macmillan $1.25; Allen, G. 2s 6d, pa 1s 6d 215

1 Religion and science 2 Friends, Society of 29-19461

"A lecture delivered in London at the yearly meeting of the Society of Friends (Quakers) for 1929. The author . . . does not believe that the revelations of science are the last and only word. He holds that both a scientific and a mystical outlook are involved in the problems of experience. Short, easily read, and will meet the needs of many questioning readers." Wis. bul.

Eddy, George Sherwood

New challenges to faith. 1926 Shelley $1.50 215

1 Religion and science 26-18730

Originally published by Doran

" 'After thirty years of work the writer had the privilege of a sabbatical year.' This year was spent at Teachers' College and at Union Theological Seminary, and was evidently one of great intellectual stimulus. As a consequence he has outlined in this book some of the ideas and ideals which became clear during that year of study. It is a frank facing of scientific findings and a statement of the 'challenges' resulting therefrom. The author is at home in his exposition of social conditions. His account of scientific and biblical criticism displays the student's effort to master the facts rather than the master's touch." Journal of religion

Heyl, Paul Renno

Philosophy of a scientific man. 1933 Vanguard press $1.50 215

1 Religion and science 2 Religion—Philosophy 3 Science—Philosophy 33-4056

"A physicist presents these views as the fruit of a lifetime of religious and philosophical thinking. He examines the place of reason in nature, the mystery of evil, the dual aspect of nature—physical and biological, and the discordance which mind introduces into its perfect machinery and order. As the last step in the unfolding of this personal philosophy Dr Heyl reaches the religious hope and emotion." Book rev. digest

"While the book will have the sympathy of all scientists and of many whose intellects struggle with an unreasonable nature, it equally deserves the attention of those who subject reason to their emotional needs." Books (N.Y. Herald Tribune)

Huxley, Julian Sorell

Religion without revelation. (What I believe ser.) 1927 Harper $2.50; Benn 8s 6d 215

"The dean of the Divinity school of the University of Chicago contributes the first and the last four of the eighteen chapters in this volume. Each of the other thirteen chapters is written by an authority in the branch of science of which he writes: Robert A. Millikan on the structure of matter; John M. Coulter on plant life; Edwin B. Frost on the structure of the cosmos; Charles B. Davenport on eugenics, and others. In these scientific chapters there is neither religion nor theology, simply a brief statement of our present knowledge in these various fields of investigation. In Dr. Mathews's four chapters of summing-up he discussed the harmony between the scientific and religious field of interest and the service that science may render faith." Book rev. digest

Bible, an American translation. The Old Testament translated by a group of scholars under the editorship of J. M. P. Smith; the New Testament tr. by E. J. Goodspeed. 1931 Univ. of Chicago press $3.50 **220.5**

31-28514

A scholarly translation into present-day English. The Old Testament was originally published in 1927, the New Testament in 1923. Still obtainable separately, the Old Testament $2.50, New Testament $2, popular ed $1. In this one volume edition the 90 pages of textual notes on the Old Testament have been omitted

"Goodspeed's New Testament . . . rests upon the discovery that the language in which the New Testament was written is the colloquial Greek of its time and place. The translator's purpose, therefore, was . . . the making of a new translation which would convey to present readers both the thought and the mood which the original conveyed to its first readers. The success with which this purpose has been achieved has been generally acclaimed. The original [of the Old Testament] is not colloquial. The eminent scholars who collaborated with Professor Smith have been duly mindful of this, and have departed from the familiar versions less radically." W. E. Garrison in Christian century

These additional volumes are not included in the one volume edition

"In the belief that the present form and arrangement of the Bible with its mixture of great and small, text and note, matter and appendix, poetry and prose, are a hindrance to its literary appreciation, Dr Moulton has prepared this [work]. By selection and condensation, by the omission of exegesis and notes which interrupt the continuity of the narrative, and arbitrary chapter and verse divisions which take from the pleasure of Bible reading, he has brought out the unity of the Bible and presented it in literary form." Book rev. digest

Some libraries may prefer the "Modern reader's Bible for schools" ed by R. G. Moulton (2v 1920-22 Macmillan ea $1.50; ea 7s 6d) which is based on the Modern reader's Bible but adapted for younger readers

The selection of passages has been made after a careful survey of the best 'Agreed Syllabuses' now used in England. Preaching values in the Old Testament in the modern translations. 1933 Abingdon press $2 **221**

1 Bible. O.T.—Criticism, interpretation, etc. 2 Bible. O.T.—Versions 3 Preaching 33-8274

A collection of short homilies based upon texts taken from James Moffatt's translation of the Old Testament. Similar to the author's "Preaching values in new translations of the New Testament" listed in class 225

"Instead of ponderous moralizing and hair-splitting exegesis, we are given clear and compact examples of what expository preaching at its best should be. The very topics are illustrations of how to phrase the subject of a sermon. And the vivid, incisive comments generally live up to the promise of the titles. The Old Testament becomes an intensely contemporaneous document under the double light of the new translations and the keen thrusts and modern parallels with which Dr. Luccock takes his ancient Hebrew idea and reinterprets it into the language and setting of today." The use of this volume will not prove, I think, in any case a crutch to lean on, but is much more likely to be tonic and invigorating. The author has capitalized the homiletical values of the translations of the New Testament by Doctors Moffatt, Goodspeed, and Weymouth. . . The author aims primarily to place before his readers a survey of current scholarly opinion rather than to offer new solutions for the problems involved. Yet he never hesitates to state his own agreement or disagreement with the views of others on controverted points, and his own stand is that of the most advanced modern British scholarship." "Although far less is known of Peter than of his fellow apostle, Paul, 'Peter is, after Christ, the most prominent person in the story of our religion and in the gospels.' As such the author writes the apostle's biography, setting down both tradition and fact, but distinguishing between them." Book rev. digest

A. T. Robertson's "Epochs in the life of Simon Peter" (1933 Scribner $1.75) by a more conservative scholar, interprets the Biblical material to present a clear picture of this impulsive character. Technical notes and references are given but need not trouble the casual reader

* Paul of Tarsus. Harper $1; Student 6s **225.9**

1 Paul, Saint, apostle 25-25018

A 1930 reprint of a book first published in 1925 by Doran

"Full of understanding for St. Paul the man. . . [Dr. Glover] has entered into the secrets of St. Paul's own personality. He does not hide from us his contradictions, his prejudices, his pedantries, but he makes us realise his charm, his courage, his tenderness, his imagination, and his unconquerable faith in God." Hibbert jour.

Knox, Wilfred Lawrence
St Paul. 1932 Appleton-Century $1.50; Davies 5s **225.9**

1 Paul, Saint, apostle 32-22106

Written from the historical point of view this book emphasizes Paul's part in organizing and unifying the early church

"The peculiarity of Father Knox's study of the apostle is the extreme detachment with which the supernatural element in that amazing life is treated; the careful avoidance of enthusiasm, the steady emphasis on the ordinary factors in St Paul's methods and results; the refusal to make definite statements in regard to that Spirit who is the real hero of the Book of Acts." Spectator

Robinson, Benjamin Willard
Life of Paul. (Handbooks of ethics and religion) [2d ed] 1928 Univ. of Chicago press $2; Cambridge univ. press 9s **225.9**

1 Paul, Saint, apostle 28-8772

For the 1928 edition supplementary reading and bibliography have been revised and a new chapter added

"This student's life of the great evangelist gives first of all a description of the Mediterranean world—its main influences, conditions, religions and policies at the time Paul was born. The life of Paul is then expanded. . . The author is professor of New Testament literature and interpretation in the Chicago theological seminary [1930]." Book rev. digest

Two other good books for libraries needing more material are: G. A. Deissmann's "Paul; a study in social and religious history; tr. by W. E. Wilson" (2d ed rev and enl 1926 Hodder 21s) a scholarly work, and C. E. Jefferson's "Character of Paul" (1923 Macmillan $1.75; 9s) a book for both preachers and laymen

226 New Testament—Gospels

"Four gospels" (1933 Harper $3; Hodder 10s 6d) is a new translation by C. C. Torrey who concludes from long study that the original Gospels were written in Aramaic and translates with this in mind. He translates from the Greek

Bible. N.T. Gospels. Harmonies
Harmony of the synoptic gospels for historical and critical study, by E. De W. Burton and E. J. Goodspeed. 1917 Scribner $2 **226**

17-25996

"Aims . . . to set the text of the several gospels in such parallelism as will make the facts themselves tell their own story with the utmost possible fullness and clearness. . . The text of the Gospels employed in the book is that of the American Standard Edition of the Revised Bible, copyright 1901 by Thomas Nelson & Sons." Preface

There is also available "Harmony of the Gospels for historical study; analytical synopses of the four Gospels in the version of 1881, by W. A. Stevens and E. D. Burton" (rev ed 1902 Scribner 10s) which includes also the Gospel according to John

Buttrick, George Arthur
Parables of Jesus. 1928 Harper $1; Hodder 8s 6d **226**

1 Jesus Christ—Parables 28-16652

"This volume by [a New York] minister unites the merits of scholarship and the practical wisdom of a successful pastor-preacher. The author is at pains to clarify difficult questions involving textual criticism, and at the same time he never allows details to obscure the central moral and spiritual truths for which these matchless stories stand." Religious book club bulletin

S. P. Cadman's "Parables of Jesus: illus. by N. C. Wyeth" (1931 McKay $2.50) is another book on the parables which some libraries prefer to the one by Buttrick. It is easier reading; each parable is quoted and is followed by a brief discussion and interpretation in popular style

Cadoux, Arthur Temple
Parables of Jesus, their art and use. 1930 Macmillan $2.50; Clarke, J. 6s **226**

1 Jesus Christ—Parables 31-14208

"Cadoux's book is not the heavy and involved work that one might expect such a scholarly study to be, but its value is enhanced for the average minister because of its conciseness and brevity. . . The author sees Jesus in the setting of a Jew among his people with the parables born out of the conflict of his life and ministry. . . The parables of Jesus must be seen as 'moments in the creative reaction of Jesus upon the life around him. They take us into the brunt of his warfare.'" Christian century

Chappell, Clovis Gilham
Sermon on the Mount. 1930 Cokesbury press 75c; Williams & Norgate 5s **226**

1 Sermon on the Mount 30-11390

Grant, Frederick Clifton
Growth of the Gospels. 1933 Abingdon press $1.50 **226**

1 Bible. N. T. Gospels 33-4708

"The purpose of his book is to sum up recent developments in the investigation [on the origin, significance and formation of the Gospels] and to analyze and discuss some of the problems that have arisen from conflicting opinions. Especially does he undertake to revalue the known sources and review the supposititious sources of whose existence there is some doubt." Christian science monitor

A briefer study than the book by Streeter listed below, and may be sufficient in some libraries

Jones, Eli Stanley
‡ Christ of the Mount, a working philosophy of life. 1931 Abingdon press $1.50; Hodder 5s **226**

1 Sermon on the Mount 31-30537

An interpretation of the Sermon on the Mount, regarding it as the one practical philosophy for the solution of the world's problems

"The whole discussion is devotional and to those fond of devotional studies the book will be interesting indeed. To those looking for something especially fresh and new on the Sermon on the Mount—save an occasional illuminating incident from the author's experience in India—the book may be disappointing." Christian century

Montefiore, Claude Joseph Goldsmid
Rabbinic literature and Gospel teachings. 1930 Macmillan $5.50; 15s **226**

1 Bible. N.T. Gospels 30-31238

"The book offers supplementary studies to Dr. Montefiore's work on the Synoptic Gospels and makes up for the omission in that notable contribution . . . of all save a few parallels between the religious and ethical teaching of the Gospels and of the Rabbinical Literature. Three quarters of the present volume are concerned with St. Matthew's Gospel, the second and third Gospels receiving comparatively slight treatment." Times (London) lit. sup.

"The student seeking an honest appraisal of rabbinic literature illustrative of gospel doctrine

Montefiore, Claude J. G.—*Continued*

will find this book invaluable. He will find here much rabbinic material hitherto unavailable in English." Christian century

The author's "Synoptic Gospels" referred to above, (2d ed rev 2v 1927 Macmillan $10.50; 30s) is a valuable Jewish commentary on the synoptic gospels

Bibliography: p259-64

Streeter, Burnett Hillman

Four Gospels; a study of origins, treating of the manuscript tradition, sources, authorship and dates. 4th impression rev 1930 Macmillan $5.25; 21s 226

1 Bible. N.T. Gospels A32-2865

Fresh discoveries since the book was first published in 1924 have lead to numerous minor alterations in points of detail

The aim has been to co-ordinate the results achieved along different lines of investigation and to use them and the author's own research as a basis for further conclusions. The layman as well as the minister and scholar has been kept in view in the arrangement of the material. Condensed from Introduction

"This volume is a massive and important contribution to the lower and higher criticism of the Gospels, and indirectly to their historical criticism, since the investigation of the text, the sources, the authorship, and date is the indispensable preliminary to the determination of historical value." Times (London) lit. sup.

1 Paul, Saint, apostle 2 Mysticism 3 Bible. N.T. Epistles 32-1464

"Written by the eminent German theologian and medical missionary in Africa, this book is a study of St Paul's thought, work and influence, and the connection of Paul's view of the world-order with the Jewish apocalyptic ideas on the one hand and those of the early Catholic church on the other. Dr Schweitzer maintains that Paul's beliefs and mystical character being such as they were he could not have been responsible for the Hellenization of Christianity, but that on the contrary, he adhered closely to the teachings of Jesus." Book rev. digest

"Though it is possible to exaggerate this mode of interpretation, no one will follow the learned and scholarly argument without instruction and profit." New statesman and Nation

"Professor Goodspeed is one of the best known New Testament Patristic scholars in the United States, and few even of professional students are likely to grumble if he abandons for once the austerity of technical discussions for a genial application of critical methods to a class of documents which the learned have often been content to ignore. It is, as he says, 'one of the duties of scholarship to do what it can to protect the public against deception.'" Times (London) lit. sup.

In its spirit the book is reverent, thoroughly devotional, but wholly candid. Its first paragraph contains the keynote of the whole work: 'Religion is the reality of which theology is the study.'" Pittsburgh

W. A. Brown's "Christian theology in outline" (1906 Scribner $3.50; Clark, T. 12s) is an equally good book. The average library will not need both

"We have in this volume, Whither Christianity, some brilliant writing, some aflame with the genius of the Spirit. The chapters by Richard Roberts, Miles H. Krumbine, and Gaius Glenn Atkins are only lesser classics in virility of thought, in comprehension of the problems and in the simplicity and beauty of style." Crozer quarterly

McGiffert, Arthur Cushman

‡ History of Christian thought. v 1-2 1932-33 Scribner ea $3; ea 12s 6d **230**

1 Theology 2 Religious thought 32-8444

"When the first volume of this work appeared it was at once recognized as of first-class importance, an authority in its field and perhaps the crown of the author's long and fruitful career as one of the most distinguished Christian scholars in America. The second confirms and strengthens the initial impression. . . Professor McGiffert groups his material around the outstanding figures in the annals of the church . . . interpreting the progress of thought in terms of personality." Books (N.Y. Herald Tribune)

"The charm of this [book] . . . lies not merely in its felicitous style but also in the ease and sense of mastery with which the reader is conveyed from one difficult and abstruse topic to another by the authoritative grasp the author has of his subject, coupled with his ability to make technical issues intelligible to the lay mind." Springfield Republican

* Rise of modern religious ideas. 1915 Macmillan $2 **230**

1 Theology 2 Philosophy and religion 15-2864

"Not intended as an adequate history of the modern movement of thought but as a summary statement of the influences promoting such a movement. After a preliminary account of the disintegration of Protestant scholastic theology by the influence of Pietism, Rationalism, Natural Science, and the Critical Philosophy, the work explains the . . . reconstruction of theology by the aid of modern philosophical and historical conceptions." Amer. hist. rev.

Mathews, Shailer

Faith of modernism. 1924 Macmillan $1.50; 6s 6d **230**

1 Modernism 24-25304

"Dr Mathews shows that the difference between modernism and dogmatism is not one of mere theology, but a struggle between two types of mind. He explains the attitude of the modernist toward the Bible and toward Jesus Christ and the compulsion that he feels to project, not simply to defend the Christian faith." Book rev. digest

"Dean Mathews' book is one which no student of modern religious issues can afford to pass by, its spirit in general is irenic and its aim constructive, though one might question the right to characterize the confessionalists as those who enforce the traditional 'without serious recognition of moral imperatives.'" Journal of religion

H. L. Stewart's "Modernism past and present" (1932 Murray, J. 12s) is another recommended book on the subject. It emphasizes the spiritual philosophy underlying modernism, from the time of Socrates to the present

Moore, Edward Caldwell

Outline of the history of Christian thought since Kant. (Studies in theology) 1912 Scribner $1.75; Duckworth 3s 6d **230**

1 Philosophy and religion 2 Philosophy, Modern 3 Church history 12-29045

"The chapters fall principally into three sections: the destruction of the scholastic theology and the development of idealism from Kant to Ritschl, the critical and historical movement from Strauss to Harnack, and the results for theology of modern science as represented by Darwin, Spencer, and Huxley. A final chapter, The English-speaking peoples: action and reaction, sketches briefly the men who have started movements, either progressive or reactionary, in England and America, from Coleridge to William James." Nation

"Scholarly little manual. As a ready reference compendium of nineteenth century philosophy and criticism the book should prove useful in a minister's study; but we fear that its condensed style and lack of unity will not make it popular with the ordinary layman interested in the subjects treated." Independent

J. K. Mozley's "Beginnings of Christian theology" (1931 Macmillan $2.25; Cambridge univ. press 6s) deals popularly with Christian thought at an earlier date. Given as eight wireless talks delivered by invitation of the British broadcasting association

1 Christianity 30-10964

Also available in a satisfactory cheap reprint in the Red label reprints series (Harper $1)

A discussion of pertinent religious questions by the minister of Brick Presbyterian church of Rochester, New York

"Candor, clearness and sincerity—qualities that never fail to appeal—characterize the author's treatment. No attempt is made to minimize the seriousness of the present religious situation, to underestimate the bigness of the task of readjustment, or to sidetrack the difficulties involved. It is the message of one who has obviously been compelled to wrestle with formidable perplexities, fighting his way step by step to more satisfactory vantage ground." Christian century

Two other popular books are J. G. Gilkey's "Faith for the new generation" (1926 Macmillan $1.75; 7s 6d) based on experience with the religious problems of college students; and R. J. Campbell's "Christian faith in modern light" (1932 Macmillan $1.75; Benn 6s) a group of lectures

1 Barth, Karl 31-30740

"A careful, unprejudiced interpretation of the theology of Karl Barth, whose name marks the beginning of a new era in theological thought." Book rev. digest

"As an essay in understanding, this book is deeply satisfying. It has done its work honestly, thoroughly, seriously. It has not followed a current practice of giving free rein to the imagination, and mythologizing about its author in various keys. Best of all is its temper of profound earnestness, so characteristic of Professor Pauck as a scholar and as a teacher." Christian century

Beckwith, Clarence Augustine
Idea of God, historical, critical, constructive. 1922 Macmillan $1.50; 7s 6d **231**

1 God 22-19244

"The purpose of the book is to study the changing idea of God. It shows how a changing view of the world must of necessity influence the idea of God, how impossible it is for the twentieth century to think in terms of the first, and how the new study of Jesus Christ and the new social emphasis in religion necessitates a re-definition of God. The book then goes on to study the idea of God from the historical, the doctrinal and the constructive viewpoint." Book rev. digest

"An unusually comprehensive study of the conception of God, including a historical survey, a consideration of modern philosophical discussions, a frank treatment of the important apologetic problems, and an appreciation of the meaning of the idea in religion." Journal of religion

* Certainty of God. 1928 Macmillan $1.75; 9s **231**

1 God 28-21388

"A liberal interpreter, the minister of the South Congregational church, Springfield, Massachusetts, considers these often asked questions: Do we really know there is a God? Is the sense of God's presence a delusion? Can we discover anything about God? Can we reconcile God's love and the world's pain? Where do we meet God in daily life? How does God speak to us? Does God have a purpose for individuals? How much will God do to help us? Can a person who has no sense of God gain one?" Book rev. digest

"The value of this book lies in the clearness with which opposing points of view are stated, in the fair liberality of conclusions reached, and in the compact citation of representative religious convictions told by men whose sincerity cannot be doubted." Books (N.Y. Herald Tribune)

Jones, Rufus Matthew
* Pathways to the reality of God. 1931 Macmillan $2; 10s **231**

1 God 31-28024

"In these chapters Dr Jones considers faith, mystical experience, the testimony of evolution and of history, revelation, prayer, and other pathways to an understanding of the reality of God." Book rev. digest

"There is vastly more spiritual vitality in the eleven pathways to religious certainty that are marked out by Dr. Jones than in the ontological, cosmological and teleological proofs for God. . . This is not only a book for theologians and scholars, although it is the result of thoroughly competent scholarship. It is a book that is brimming full of 'preaching values.'" Christian century

1 Holy Spirit 19-19611

"This volume is an attempt to put forward a conception of the Spirit of God which is definite but not scholastic, and which is capable of affording an intellectual basis both for a coherent Philosophy of the universe and for a Religion passionate and ethical, mystical and practical." The contributors are: A. Seth Pringle-Pattison, L. Dougall, J. A. Hadfield, C. A. A. Scott, C. W. Emmet, A. Clutton-Brock, B. H. Streeter

"Alike in its fearlessness, in its refusal to make terms with narrow types of orthodoxy, and in its strong Christocentric theology it is a characteristic product of modern English religious thought. Its main defect is that it only implicitly recognizes the affirmation of modern research that Christianity is a synthesis." Times (London) lit. sup.

J. F. Newton's "My idea of God" (1926 Little o.p. 1933) is another interesting symposium, to which eighteen American religious leaders of different sects have contributed

"Here Dr. Bacon comes to grips with the central problem of early Christianity, the actual figure of Jesus and his own thought of himself. He strives to penetrate behind the Christian apologetic and interpretation of the earliest records to what Jesus really did and said. Bible. N. T. Gospels

1 Jesus Christ—Biog. [25-9656]

The text is entirely taken from the gospels themselves." Book rev. digest

"The remarkable thing about the work of Dr Moffatt is the devout religious motive and spirit which animates the book. The story of Jesus is related in the simple and beautiful language of the evangelists, just as a great scholar would tell it to a little group of his own children at the Sabbath fireside." Sat. rev. of lit.

The writer has faithfully gathered facts and details of what happened and then has presented them in this novel and impressive fashion as a first-hand narrative. It is everywhere reverent, and at the same time there is something very real and intimate about the scenes." Rufus M. Jones

"The present volume follows up the previous inquiries ['The historicity of Jesus' and 'Jesus: a new biography'] by tracing the story of Christianity's interest in Jesus since the time of his crucifixion, in order to evaluate his significance for religion from the point of view of modern historical scholarship and in the light of present-day scientific ways of thinking." Preface

Two other scholarly books are A. C. Headlam's "Life and teaching of Jesus the Christ" (1923 Oxford $4.50; Murray, J. 12s) and Albert Schweitzer's "Quest of the historical Jesus; tr. by W. 1 Jesus Christ—Crucifixion 31-8703

"Believing that the meaning of the crucifixion has been lost sight of in the modern teaching of Christianity, the author attempts to rediscover it, to show what it was that crucified Christ, why Christ felt it necessary to make the sacrifice, and finally what the significance of that sacrifice is to the ethical and spiritual needs of today." Book rev. digest

"As one might expect from this author, the task of reverent probing into the mind of Christ is, in this case, carried out with the utmost sympathy and understanding." Churchman

Enelow, Hyman Gerson

1 Jesus Christ 31-26812

A 1931 reprint of a book published in 1920 by Macmillan

"This is an unprejudiced and popular appreciation of Jesus by a Jewish rabbi who is familiar with modern historical methods of biblical study and who is unbiased by the acrimonious controversies that have so often made the very name of Jesus anathema to the Jews. The author writes in a spirit of undisguised admiration for Jesus and concludes with the hope that he may yet serve as a bond of union between Jew and Christian." Biblical world

"The book is not intended for experts, and will not be noticed by them. It does, however, tell in interesting and readable form the Gospel story, and, without a parade of scholarship, attempts very gently to make use of the 'reasonably assured results of historic criticism.'" Crozer quarterly

E. I. Bosworth's "Life and teaching of Jesus" (1924 Macmillan $1.75; 7s 6d) is a carefully written life of Jesus taken from the Gospels, mainly concerned with the development of the message of Jesus as declared in his teachings to the Apostles

"The book is written with the purpose of discovering what Jesus really did think and experience concerning the issues of his day. . . Two sections of the book attempt to interpret Jesus' teachings in terms of modern problems. These chapters are fresh and intensely practical without being betrayed into fascism or sovietism." Christian century

Life of Jesus. 1931 Harper $3; Oxford 7s 6d **232**

1 Jesus Christ—Biog. 31-10667

"This biography, told in simple, popular language, is conservative in following the traditional story. It is the result of sixteen years of thought and many visits to the Holy Land where the author by observing the ways of life of today, sought for light on the ways of the people of Bible days." Book rev. digest

"Mr. Mathews's strong point is his intimate and detailed knowledge of Palestine and its customs: a knowledge which enables him, almost at every page, to throw fresh vivid light on the Gospel record, and gives his book a real value of its own. The numerous and excellent photographs, many of them astonishingly apposite, are genuine illustrations of the text." Spectator

* Ethical teaching of Jesus. 1924 Macmillan $1; 5s **232**

1 Jesus Christ 24-3946

The author is professor of New Testament criticism at Union theological seminary in New York, 1933. His aim is to discover, on the ground of critical and historical study, what Jesus actually taught and to show that his ethical teachings cannot be separated from religion. Condensed from preface

"It is great art to produce a work in which profound critical scholarship, transparent simplicity of style, and worthfulness of material are so thoroughly blended that no one obtrudes itself above the others, yet all are deeply felt. That great art Professor Scott has here again displayed. If anyone is writing more helpfully on New Testament themes, we do not know it. You must have a book on Jesus' ethical teaching; this is the book to have." Journal of religion

The book is written from the point of view of the man in the street by a lawyer and judge who handles the theme as if forming a judicial opinion, sifting evidences taken from the writings of theologians, philosophers, scientists and poets." Book rev. digest

"The value of the book comes from his being a modern lay thinker, who talks our language, and from his enthusiastic confidence that reason is the proper determinant of truth." Sat. rev. of lit.

1 Christianity and other religions 2 India—Religion 28-5267

"The 'Conferences' are attempts to set out the dominant aspects of religious life and thought as they appear to men of the most varied experience, special care being taken to present it as it appears to Orientals. While Mr. Jones examines the meaning and contents of other religions in order to emphasize what is true in them, he shows how Christianity may complete all that they lack of truth or power. With a wide knowledge of Indian religious life and the fervour of an ardent Christian missionary the writer of these chapters makes a stirring appeal to his fellow Christians to offer to others the redemptive power which comes to those who live in the faith of the Gospel." "Mr. Hutchinson's thesis is that organized religion seems everywhere to be leagued with reaction and to be in danger therefore of dying with a dying world. In Russia, Germany, and England, in the Orient and in America, the church seems incapable of coping with the significant ethical problems of our day. . . What Mr. Hutchinson calls for is ethical achievement relevant to the basic moral and social needs of our day. . . The question is whether there will be an ethical religion, adequate to the needs of our day, or whether the moral leadership of our generation will be compelled to disregard the church entirely." 1 Missions—China 29-3916

"A monumental work, covering Roman Catholic, Russian Orthodox, and Protestant missions in China up to 1926." Cleveland

"A careful reading of the volume will serve to convince the reader that Dr. Latourette has not only made a most substantial contribution to the literature on China, but that the claim that his will be the authoritative work on Christian missions in China for the next twenty years is not an extravagant one." Pol. sci. quar.

A book of a different kind is Chao-Kwang Wu's "International aspect of the missionary movement in China" (1930 Johns Hopkins $2.50; Oxford 11s 6d) a severe criticism of activities of the missionaries which have, the author maintains, inflicted on China loss of territory, and impairment of sovereignty

"The result of a thorogoing inquiry by a commission of fifteen men and women, this book is an appraisal of Protestant missions in the Far East today, in India, Burma, China and Japan. The inquiry is concerned with the effect of these missions on the life of the peoples of the Orient, with recommendations as to the extent to which missionary activities should be continued or changed." Book rev. digest

"The report is constructive, challenging, statesmanlike and progressive. It recommends changes, some of them vital—but many of the changes have been adopted already by the more progressive boards of missions." Boston Transcript

"Re-thinking missions" is based on the material now published in seven volumes of reports of the Laymen's foreign missions inquiry (7v 1933 Harper ea $1.50). The seven volumes consist of regional reports on India-Burma, China, and Japan, fact-finders reports on the same countries, and a volume on Home base and missionary personnel

Macnicol, Nicol

India in the dark wood. 1930 Edinburgh house press 2s 6d **266**

1 Missions—India 31-2131

"A wonderful treasury of significant facts and sayings. Well documented." International review of missions

"He is . . . extraordinarily interesting in his description of how in certain districts the Christian churches of India have adapted themselves to caste. . . We are in whole-hearted agreement with him as to the importance of the modern missionary being able to treat the Hindu religions not only with knowledge, but also with fairness. Yet in spite of these and many other notable qualities in a book packed with the knowledge born of long experience, we feel that the author is sometimes unduly optimistic as to the future role of the Christian churches in India." Faith for the world. 1929 Edinburgh house press 2s 6d **266**

1 Missions, Foreign 2 Christianity and other religions 31-14640

"Purpose . . . is to set out the main elements of the case for the Christian world mission and to show some of the principal tasks which are bound up with that mission." Preface

"Inspired by the Jerusalem meeting of the International Missionary Council. . . Mr. Paton has quarried in the rich mines of the eight volumes of its report to enforce what his own experience has shown him to be the main grounds on which the Christian world mission may be justified and its work developed. The book is made unusually impressive by the knowledge of which it gives evidence and the clear exposition of principles it provides. . . Among the books on the mission work of the Church published in recent years this work must be regarded as noteworthy." Times (London) lit. sup.

Phillips, Ray Edmund

The Bantu are coming; phases of South Africa's race problem. 1930 Harper $2; Student 5s **266**

1 Africa, South—Race question 2 Africa, South—Native races [31-4222]

While the scope of the book is broader than missions alone, it is important for the information it contains about missions. Some libraries may prefer to class this book in 916.8

Phillips, Ray E.—*Continued*

The author "believes that such Christian missionary work as there is in South Africa is hopelessly handicapped by an antiquated dogmatic orthodoxy and a blindness to the social factors in the situation. . . For the present, he has written by far the best book to come out of South Africa on the race issue there. It is a credit to the missionary enterprise that a missionary should write and a Christian publishing society should circulate such a volume." Christian century

Another recommended book which is important from the missionary viewpoint is Olive Wyon's "Dawn wind; a picture of changing conditions among women in Africa and the East" (1931 Student pa 2s 6d)

Pickett, Jarrell Waskom

Christian mass movements in India. 1933 Abingdon press $2 **266**

1 Missions—India 34-661

"Dr. Pickett has given us an experimental approach to the study of India's baffling problem of peasant poverty and untouchability. The book gives abundant evidence of painstaking investigation, personal experience in the field, extensive travel, and perhaps unfortunately, large expenditures of money. . . It is manifestly a study with a purpose fixed in advance and leading to apologetics or argument. . . However . . . the recommendations are statesmanlike and in line with modern thought in missionary administration." Christian century

1 Missions A15-2672

Not now up to date hence less valuable than Glover for the latest information

"Canon Robinson, editorial secretary of the Society for the Propagation of the Gospel in Foreign Parts and editor of the 'East and the West' has produced one of the best single-volume histories of missions yet written. Restricted mainly to modern times and to Protestant missions; very uneven in value, but marked by the discriminating insight of a ripe scholar in mission statesmanship." Guide to hist. lit.

E. C. Moore's "Spread of Christianity in the modern world" (1919 Univ. of Chicago press $2.50) is another older book, which gives a survey of the history of missions from the middle of the 16th century to 1919

Schermerhorn, William David

1 Missions 33-32389

"There is room for this volume with its full world view, relating missionary activity to the history and contemporaneous movements in the various countries. It is not a piece of propaganda but a fair and honest statement of facts from an objective point of view. The origin, growth and problems of Christian missions are shown in their proper setting and as affected by and affecting other movements and the general life of the people. . . Apparently there is no such complete and concise story of trative way as this. It is a valuable compendium as well as a vivid picture." Boston Tranmodern missions—given in a concrete and illusscript

The author, a doctor of theology, and philosophy, organist and writer on musical subjects, became, at 32, a medical missionary in Africa. This book tells of his work during the years 1924 to 1928. "The story of his varied activities is told with the utmost simplicity as though in a private diary or in letters home, but the reader must be wholly devoid of imagination who cannot see in it the record of an heroic enterprise which is one of the greatest glories of the gospel in our time." Christian century

His earlier book "On the edge of the primeval forest; experiences and observations of a doctor in equatorial Africa; tr. by C. T. Campion" (1931 Macmillan $2; Black, A. & C. 6s) first published in 1922, is an account of his missionary work from 1913-1917

"A handbook for church school administration in harmony with the ideals of progressive education, offering practical suggestions for building the curriculum, training leaders, providing environment and equipment, learning to use money, keeping records and measuring growth. "The volume seems throughout to have been written unconsciously for the larger school which has some approximation to proper quarters for work and is able to provide itself with more or less adequate working equipment. Miss Hewitt has in almost every case, after outlining the ideal procedure, suggested how it can be made available for the small and impecunious; therefore, no one should be discouraged from reading and profiting." "Dr. Bevan's short history of Christianity traces that complex story from its origins to the present situation. . . This little book, in which an immense but unobtrusive scholarship and a deep understanding of the nature of religion collaborate, has an importance out of all proportion to its size. It deserves most careful study alike from those who accept and admire Christianity and from those who reject it. Much will be learned from it by readers of both types." Spectator

"The story of Christianity was never more interestingly told than in 'Since Calvary.' Whether it is fairly told is another question. Mr. Browne has grown bolder, more radical, more hostile to organized religion; within certain limits his contentions are well established but only within those limits." Sat. rev. of lit.

America is still too thoroughly immersed in the illusions and superstitions of liberal, middle-class culture to appreciate just what Tillich is trying to do. 271 RELIGIOUS ORDERS

"Woman under monasticism" by Lina Eckenstein (1896 Cambridge univ press o.p. 1933) is an interesting study of the influence of monastic life on the development of women, based on the thesis that the religious orders in medieval times offered women the greatest opportunity for developing their abilities

"Mr. Compton, who writes from the extreme Roman Catholic standpoint, and whose history on controversial points is . . . Romanist rather than historical, gives a short sketch of the great orders following the Benedictine rule, the Canons regular, the Friars, and four post-Reformation orders. The work is illustrated by Mrs. M. Foster by striking drawings of costumes mostly founded on the figures of Dugdale or Helyot. The book will prove a useful compendium of facts about these orders not readily available otherwise." Saturday rev.

1 Jesuits 30-11530
A good book for those libraries which need an extensive work of this kind. "Covers both the history of the order and an examination of its philosophy. It is an impartial exposition of the Jesuit policy, its relation to great events, and the influence of Jesuit philosophy upon thought and conduct, with an account of Jesuit missions and proselytism and portraits of its leaders. . . Bibliography." Book rev. digest
"The book is neither an apology for nor an attack upon the Society of Jesus. It is, so far as a non-Catholic can judge of its accuracy and point of view, fairminded. With its material, drawn largely from controversial writings of the seventeenth and eighteenth centuries, the author has achieved a degree of detachment which lifts his study wholly out of the class of propagandist literature." 1 Martyrs 2 Persecution 3 Church history 33-27225
The first English edition of this classic appeared in 1563. "The book is far more than a bare record of persecution. It is an arsenal of controversy, and a storehouse of romance, as well as a source of edification. Protestantism is traced to its origins in England, Bohemia and Germany, and the corruptions which had crept into the Church of Rome are exposed at enormous length and with unsparing denunciation." J. M. Dodds

"Intolerance, not tolerance, is the subject of Mr Van Loon's book—in particular, religious intolerance, and of this the official rather than the private variety. The first half of the book traces the development of intolerance among Christians. The other half is concerned with such leaders in the fight against intolerance as Erasmus, Rabelais, Montaigne, Spinoza, Voltaire and Tom Paine." Book rev. digest
"It may be a powerful work, but it is not new. The value of the volume is in its gathering between one set of . . . covers, a sketchy panorama of the men who have fought for the right to their own thinking." Literary rev.

Verrill, Alpheus Hyatt
Inquisition. 1931 Appleton-Century $3; 10s 6d **272**

1 Inquisition 2 Church history—Middle ages 31-22133

"This popular history of the Inquisition is not confined to the story of the Spanish Inquisition. . . The author has attempted an impartial, unprejudiced survey and has tried to account for some of the cruelty and disregard for human life as general and natural characteristics of the times. Bibliography and index." Book rev. digest

"A narrative which is marked everywhere, or nearly everywhere, by a sincere desire to present an objective study of the terrific system which has become for many Protestants a symbol of the religious bigotry and intolerance of the Catholic Church. . . Mr. Verrill does not minimize the actual horrors. . . But his viewpoint is scientific, in the main, although he is not of the retinue of scholars like Lea, Acton, Baumgarten, Creighton Turberville, de Cauzons, or Vacandard. His book is moderate and fair-minded in tone." Sat. rev. of lit.

Adam, Karl
* Spirit of Catholicism; tr. by Justin McCann. 1929 Macmillan $2; Sheed 7s 6d **282**

1 Catholic church 30-17739

"Dr. Adam, the Professor of Catholic Theology in the University of Tübingen, writes in order to discover the governing ideas, the distinguishing characteristics of Catholicism, and the forces that are consequently set in motion by them. His book is made up of a series of lectures delivered to an audience of mixed religious beliefs in his university; and the fifth (enlarged and revised) edition follows the original scheme." Sat. rev. of lit.

"Tolerantly and sincerely written by a German scholar, a devout English Churchman might read this book without wishing to skip more than a few passages. The slight signs of controversy are directed against Lutheranism, not Anglicanism. There is a genuine desire to move out of the rut while keeping rigidly to the lines of the modern Roman Catholic Church." Times (London) lit. sup.

"There have been occasional efforts to write a brief history of the Church, which is in a way, likewise a history of the Popes. However, M. Hayward is the first to write a volume that is brief in compass, accurate in detail and interestingly presented. . . It is not often that one can praise these general summaries, but if ever there were an exception, this volume is one." Boston Transcript

1 Catholic church [A20-1002]

"An attempt to give . . . the main outlines of the events which make up the Story of the Catholic Church. . . Some care has been taken not to exaggerate the disedifying and scandalous things which impartial study brings to light . . . but there is no intention to make these pages apologetic in the sense of controversial. This outline assumes the truth of the Church's claim as far as anything dogmatic needs to be assumed in a simple narrative. It is meant to be history, but history from a Catholic point of view, unhesitatingly and uncompromisingly so." Preface

Why I am and why I am not a Catholic, by Hilaire Belloc and others. 1930 Macmillan $2; Cassell 6s **282**

1 Catholic church—Doctrinal and controversial works 30-30006

Articles contributed by five Roman Catholics: Hilaire Belloc, Archbishop Goodier, Father R. Knox, Reverend C. C. Martindale, and Sheila Kaye-Smith; and five non-Catholics: Reverend W. Orchard, Principal J. W. Oman, Professor A. E. Taylor, Professor H. L. Goudge, and the Lord Bishop of Gloucester
"It is pleasant to observe the good temper of all of the essays and the earnestness with which convictions are set forth and defended. Anglicanism is very much to the fore as we should expect in a work of exclusively British authorship, and Protestantism is most frequently, although not always, referred to as something hardly respectable. This is a severe limitation on both the compass and the usefulness of the volume; nevertheless the subject treated and the distinction of the writers who treat it make it well worth attention." Short history of the Oxford movement. 2d ed rev 1932 Morehouse $2.10; Mowbray 6s **283**

1 Oxford movement [A16-389]

First edition 1915
"Canon Ollard long has been recognized as an authority on the subject of the Catholic Revival. His book contains a mass of material, but it is somewhat lacking in organization. Especially valuable are his brief sketches of the earlier Tractarians. While these miniature biographies interrupt the course of the narrative, they do give twentieth century readers accurate pictures of such men as Dykes, Bloxam, Mozley, and Marriott. Almost one-third of the book is given over to discussion of the results of the Movement. . . Splendid illustrations enliven the book, while its style, popular in the best sense of the word, makes it one which can be recommended enthusiastically, to the laity." Living church

Scrupulous in statement and just in appreciations, while expounding a Catholic Anglicanism with an idealizing reverence which dims some realities of the lay world. Contains an excellent exposition of the system of life in the medieval church." Guide to hist. lit.

These brief studies, sometimes penetrating, sometimes witty, include Spiritualism, Russellism, Buchmanism, Bahaism, the Swamis and Yogis, Shakerism, Mormonism." Book rev. digest

"Mr. Ferguson does not rate as an authority on the history of religion, but he has worked intelligently with authentic sources of information, and his style is buoyantly, sometimes boisterously, readable—if one is not repelled by apparently flippant treatment of matters which are of tremendous import to those who believe in them." Formerly carried also by R.R. Smith

"This exposition of the Quaker faith and way of life is made by the best-known living exponent of that faith, writer of several books on the subject, and professor of philosophy at Haverford college. He interprets in a simple way the history, ideals and achievements of Quakerism—its attitude toward war, its practice of the simple life, its faith in love as a method of dealing with our fellows, its service to humanitarianism and education." Book rev. digest

"In this eminently fair-minded volume, Dr. Rufus Jones has endeavoured to state the case for the Quaker position. He does not defend the early extravagances and singularities of the body of which he is himself a distinguished ornament, but he has little difficulty in demonstrating that, on the whole, it has proved a potent factor in the spiritual regeneration of the human race." "Written by a German student twenty years ago before war relief and reconstruction work had drawn international attention to the social services of the Friends, this study is primarily of historical interest. . . It is well for the social student to trace the history of a social enterprise so clearly exemplifying the part played by a continuing ethical dynamic in a world of changing needs and techniques." 1 Religions 33-11134

"A discussion of the changes in the past century of various non-Christian religions." Cincinnati

"The work is carefully done, well documented, and fairly put. All sides of the subject are touched. It is a scientific, scholarly study, not propaganda of any sort. It is something that every well read person ought to know, and it is exceptional in its value and authority for this purpose. The whole matter is brought thoroughly up to date, and the kaleidoscopic changes are portrayed in a picturesque fashion." Boston Transcript

"This compact, 600-page volume, obviously written for students and other well-informed readers, is replete with the necessary information for the comprehension of the particular religions under discussion. Each chapter is encyclopedic in the sense that it is brief, compressed, and includes the essential details; but it is nevertheless interestingly written and happily escapes the almost necessary affliction of over-condensation—aridity." "He has done his work with the utmost sympathy and skill and given us a book of most unusual value for its style, accuracy, and comprehensiveness. As a psychological and practical interpretation it stands somewhat alone. . . The chapter on Christian missions in India is eminently sane, and while Dr Pratt has 'no axe to grind,' he affords the reader a scholarly and unprejudiced justification for the attempt to Christianize India." Yale review

Sir G. F. Macmunn's "Religions and hidden cults of India" (1931 Macmillan $5; Low 15s) is a briefer treatment of the subject

Pilgrimage of Buddhism and a Buddhist pilgrimage. 1928 Macmillan $3; 15s **294**

1 Buddha and Buddhism 28-24492

"This large volume of nearly 800 pages, by the well-known professor of philosophy in Williams College [1933], is written in his usual lucid and charming style. It is the result of long years of study, and of much travel and reflection. . . The book will be of great value to the serious student of religion, whether in its psychology, or its philosophy, or its history." Churchman

"Dr. Pratt's claim to our attention is his wide knowledge of Buddhism as it actually exists. He does not pretend to a knowledge of Oriental languages, and his account of the past is admittedly a work of compilation rather than of research. But concerning modern Buddhism in Ceylon, Burma, Siam, Indo-China, China, Korea and Japan, he supplies much first-hand information that is of great interest and value." Times (London) lit. sup.

"Students of Indian philosophy in particular and Indologians in general have been well aware of the high value of Professor Hume's work. Wilhelm, Richard

Confucius and Confucianism; tr. by G. H. Danton and A. P. Danton. 1931 Harcourt $1.75; Routledge 6s 299

1 Confucius and Confucianism 31-8780

"This little volume by a world famous Sinologist is divided into five chapters: the life of Confucius according to the Chinese historians Sse-Ma Ch'ien, an examination of Sse-Ma Ch'ien's data, the teachings of Confucius, and the documents and the texts. To the uninitiated the first of these, being a rather literal translation from the classical Chinese, will probably be difficult and not always clear. The rest of the book, however, presents an accurate and at once sympathetic and objective interpretation of the great sage, his life, and teachings. There is an excellent polyglot bibliography." Argues, first, that the ordinary citizen cannot hope to find, by his own undirected thought, the solution of innumerable political problems in which a single mistake may bring national or international disaster; and next that the expedient of a dictatorship will not help us, because a dictator cannot rule in the modern world unless he is also a demagogue." Giddings, Franklin Henry

Civilization and society. (American social science ser.) 1932 Holt $2.50 301

1 Sociology 2 Social psychology 3 Civilization 32-18861

This account of the development and behavior of human society is an outgrowth of a course of lectures delivered at Columbia University, arranged and edited for publication by Howard W. Odum after the death of Professor Giddings. The aim of the editor has been to make it possible for the student of sociology and of public affairs to obtain in one volume the essentials of the Giddings sociology

"This volume is characterised by an informal, direct style, and by the scholar's capacity for reducing problems to their essentials. The first twenty chapters are largely ethnological and historical in subject; and the later ones deal with the objective and values of education." Boston

1 Sociology 2-19706

Contents: Elements of social theory; Elements and structure of society; Historical evolution of society; Social process, law and cause

"In 1896 appeared the fruition of [the author's] labors of many years in the book which gave him his great reputation. . . . in it Professor Giddings reconciled in a consistent system as no one before him had done with anything like his thoroughness the theory of the physical factors of social evolution and the theory of the subjective or volitional factors." Odum's American masters of social science

Larger libraries may well add more examples of the work of this eminent authority. His "Scientific study of human society" (1924 Univ. of N. C. press o.p. 1933) is a summary of the author's thought on the use of scientific methods in the study of sociology. "Studies in the theory of human society" (1922 Macmillan $3; 15s) is his individual contribution to the revision of the science of sociology

population, on the home, on industry, and on socialization. . . . Its chief purpose is to focus the principles of the social sciences upon the dark sides of our social trend and, without offering any panaceas, to give a sufficient picture of the possibilities of social reconstruction to make constructive programs and policies more apparent." Publisher's note

Groves, Ernest Rutherford

Introduction to sociology. (Longmans' social science ser.) new rev ed 1932 Longmans $3.25 301

1 Sociology 32-25866

In this revised edition of a textbook first published in 1928 "nearly all the chapters have been lengthened and additional material has been incorporated. This has provided greater recognition of the cultural and ecological aspects of sociology. The summary of social thinking has also been increased by the addition of much that has appeared since the first edition was published." Preface

"The most competent chapters are those devoted to the consideration of personality and related topics. . . The book seems well adapted to serve poorly-prepared college students as their first introduction to the study of sociology." American journal of sociology

The field covered by this book and that of the author's "Sociology" listed below is somewhat different. "Sociology" is a brief review of the nature, methods and aims of the science while the "Introduction" is a systematic examination of the principles

Elements of social justice. 1922 Holt $2; Allen, G. 10s 6d 301

1 Social ethics 2 Sociology 22-8828

"Though written in continuation of a previous book on 'The rational good,' the latest monograph by this well known British philosopher of liberalism is self-contained and provides a study of social ethics which is particularly timely in this period when the public mind seems to have become confused on what once were more or less self-evident principles of social living. Such conceptions as public welfare, natural rights, freedom of the individual, social justice, the rights and duties of ownership, democracy are subjected to a searching scrutiny and emerge in a general view of the relation between the individual and society which will be helpful to many." "'The Science of Society' is one of the monuments of social anthropology. It comes as near as any existing work to supplying a great desideratum: a collation without favor or selection of available information concerning pre-civilized society. Dr. Keller has dealt very sensibly with the problem of meeting the unreasonable commercial demand for a popular epitome. He has written a new book, setting forth in vivacious—a shade too vivacious—popular language the impression of significance of his survey which he had previously couched in sober scientific speech." 1 Social psychology [22-3552]

First edition 1908. Later issued with two supplementary chapters and in this revision with three additional ones. Contents of chapters added to this edition: Instinct of laughter and some minor tendencies; Instincts of man, in the light of recent discussion; Sex instinct

Society; its structure and changes. 1931 Macmillan $4 301

1 Sociology 31-35539

"This book offers a new analysis of the social structure, revealing alike the conditions which give it cohesion and order and the conditions which make that order forever unstable. That this process of change is not meaningless, that there are lines of direction in the transformations of society as there are in the broad sweep of organic life, is the conclusion at which, in the light of many evidences, the author arrives." Publisher's note

"MacIver has performed his self-assigned task of defining and explaining sociological concepts and ideas with considerable skill and intelligence, and it will scarcely be fair to assert that his rather abstract and philosophical propositions

Martin, Everett Dean
Behavior of crowds; a psychological study. 1920 Norton $3 301
1 Crowds 20-20958
The author holds that "as a practical problem, the habit of crowd-making is daily becoming a more serious menace to civilization. Events are making it more and more clear that, pressing as are certain economic questions, the forces which threaten society are really psychological." Foreword
"As a remedy to this menace he suggests reeducation along the lines of humanism expounded by such writers as James, Schiller, Dewey and others." Book rev. digest

Social science for teachers. (Riverside textbooks in education) 1923 Houghton $1.90 301
1 Social sciences 2 Social problems 23-17273
"A very elementary treatise on the life of people in organized society, presenting in simple form some of the more important present-day social problems, describing briefly the great governmental and social institutions of such society, and pointing out the relation of all these to the problem of education for citizenship in a democracy. . . Intended for the beginner, and for that great mass of teachers . . . who have had but a high-school education and are lacking in social and political conceptions. . . Equipped with lists of selected readings and topics for study and report." Introduction

Niebuhr, Reinhold
Moral man and immoral society; a study in ethics and politics. 1932 Scribner $2; 10s 6d 301
1 Social ethics 2 Political ethics 33-1231
"The thesis of the book is that group relations can never be as ethical as individual relations. Man, in general, desires to be moral but he lives in an essentially immoral society. The idealist, confronted with insuperable obstacles to the realization of his ideals, is forced into defeatism or sentimentality. Having argued the futility of the Christian ideal in politics Dr Niebuhr attempts to find the most promising political methods of achieving social morality." Book rev. digest
"It seems that Dr. Niebuhr is through with Christian socialism. . . He wishes to be judged as a Marxian. And it is only logically fair to do so. Let us look at him as such. Within this Marxian logic Niebuhr seems to me realistic, lucid, learned, and, above all, brave. His style is admirable, disciplined and most unexcited for his delicate cargo of intellectual dynamite." N.Y. Evening post

King Mob; a study of the present-day mind. 1930 Harcourt $2 301
1 Crowds 2 U.S.—Civilization 3 Social psychology 4 Public opinion 30-14821
"The author protests vigorously against the organized mob as revealed in modern advertising, modes of salesmanship, book clubs and easy culture courses. He prophesies that our growth in rapid communication will make of the world a single city in feeling, thought, action, ideals, with the consequent obliteration of originality of concept or effort. His conclusion is that self-sufficiency and self-reliance of the individual soul must be made the foundation of education." Wis. bul.

"Intended to be used as a text in a college course in social problems or in an introductory course in the social sciences, the author begins with society, the good life, and the individual. A discussion of social change follows. Then, the family, education, religion, the state, business, and the community are passed in review. The style is readable to college student and the general public alike." Sociology

Sumner, William Graham

‡ Folkways; a study of the sociological importance of usages, manners, customs, mores and morals. 1907 Ginn $5; 27s 6d 301

1 Manners and customs 7-21403

Folkways the author defines as "ways of doing things" which are gradually recognized as expedient and develop into established customs. Their origins are lost in mystery, but they are always and everywhere a controlling social force, regulating in every detail the life of uncivilized races and hardly less potent in the life of civilized peoples. With great labor Professor Sumner has assembled a mass of materials, gathered from almost all accessible sources, and with rare insight and scientific caution has sought to elicit their meaning. The result is an important contribution to the scientific study of society. Condensed from Nation

Trotter, William

Instincts of the herd in peace and war. [2d ed] 1919 Macmillan $1.50; Benn 3s 6d 301

1 Social psychology 2 European war, 1914-1918 3 Crowds [16-6406]

"A few errors in the text of the first edition have been corrected. . . No other change has been made. A postscript has been added." Preface to the 2d edition

Mr. Trotter argues that gregariousness is an instinct as powerful and primitive as the sexual, the nutritive and the self-preserving, and that there are times in the life of a people, especially if war exists, when gregariousness masters or at least distorts every other impulse. In 1908 and 1909 Mr Trotter published his articles in the Sociological review. These are now reprinted and immensely enriched by contrast with those later developments of abnormal psychology which are due to Professor Freud. What Freud calls the censor, Trottor calls gregariousness or herd instinct. Adapted from the New republic

Veblen, Thorstein Bunde

‡ Theory of the leisure class. [new ed] 1918 Viking press $2.50; Allen, G. 10s 6d 301

1 Leisure class [12-5177]

A cheaper but satisfactory edition is published by the Vanguard press at 75c

"It is the purpose of this inquiry to discuss the place and value of the leisure class as an economic factor in modern life, but it has been found impracticable to confine the discussion strictly within the limits so marked out. Some attention is perforce given to the origin and the line of derivation of the institution, as well as to features of social life that are not commonly classed as economic." Preface

"Whatever may be the deficiencies of Veblen in the scientific role which he assumed, the effect of his work has been to stimulate some of the best scientific work of the present century in the field of the social sciences. . . . Economic science is less committed to the discovery of hypothetical economic laws, and more committed to a realistic explanation of economic behavior and the functioning of the economic order. The most various factors have led to this change of direction. But no single individual has had a larger hand in it than Veblen." Odum's American masters of social science

Wallas, Graham

The great society; a psychological analysis. 1914 Macmillan $2.25; 10s 301

1 Social psychology 14-11250

In his earlier book, "Human nature in politics," Mr Wallas discussed psychology as a factor in the study of politics. In this later one, which continues the theme with more definiteness of aim and more substance he makes a plea for social psychology as the basis of a study of human nature in mass. By the "great society" he means the complex urban, industrialized society of to-day. Condensed from North American review, 1914

Our social heritage. 1921 Yale univ. press $3; Allen, G. 12s 6d 301

"An expansion of [the 1919 Dodge] lectures delivered at Yale university constituting psychosociological treatment of institutions such as group coöperation, monarchy, and the church, from the standpoint of instinctive behavior. The author's "Dynamic sociology" in 2 volumes was revised in 1911 (Appleton-Century $6; 25s). It summarizes Ward's ideas of his contribution to sociology

Ward; summarized by Clement Wood" (1930 Vanguard press 75c) is a summary of Ward's theories as developed in "Dynamic sociology," "Pure sociology," "Psychic factors of civilization," and "Applied sociology." Principles of social science. 1932 Heath $1.60 301

1 U.S.—Soc. condit. 2 U.S.—Econ. condit.—1918- 3 U.S.—Pol. & govt. 4 Social problems 32-23313

High school text book which takes the place of Williamson's earlier book, "Problems in American democracy," first published in 1922. A considerable portion of the earlier volume which has stood the test of classroom use has been incorporated into the present volume

"While the style of the book is not entertaining, it is clear and direct. The book does exactly what it claims to do: it presents problems, states relevant facts, gives both sides of a controversy, and makes no attempt to propagandize. The format is attractive, the print clear, the binding attractive and of light weight, and the illustrations are well chosen." School rev.

The contrast which he brings out between ancient and medieval mortality on the one hand, and the modern extension of the life span on the other hand . . . justifies his insistence that the population problem of today is a new problem . . . The other distinctive feature is the author's frank and unrestrained espousal of that solution of the problem represented by the birth control movement." H. P. Fairchild in Survey

Published in England under the title: History of government

"Sir Charles Petrie has managed to compress into a small book a lively and stimulating discussion of the various forms of government which the Western World has known from the days of the Greek City States to our own times. As a prehistorian he is an inadequate guide. On the other hand, his survey of monarchy, tyranny, dictatorship, aristocracy, oligarchy and democracy from the Homeric chieftains to Mussolini, from Pericles to Baldwin, is never allowed to drift far from the facts; and his criticism of these various forms of government is studiously fair." 1 Political science—Hist. 31-19402
"It is no surprise to find sound thought and good writing in the . . . volume edited by Professor Hearnshaw. Nothing could be better as an introduction to that turbulent period which in so many ways resembles our own age. The editor himself writes brilliantly on Burke, the one true Conservative in the list. The other contributors are concerned with Radicals of every degree from the self-satisfied Bentham, well portrayed by Professor J. W. Allen, to that queer anarchist, William Godwin, who, as Mr. C. H. Driver reminds us in his able and dispassionate essay, ended a long and rather discreditable career as a State pensioner. The American, French and German theorists are competently handled, as well as our English thinkers and dreamers, and to each chapter is added a really good bibliography." Spectator
"Social & political ideas of some representative thinkers of the age of reaction & reconstruction, 1815-65" (1932 Harrap 8s 6d) also edited by Mr Hearnshaw includes studies of such figures as Chateaubriand, Hegel, Coleridge, Owen, Mill and Comte

"Replete with concrete governmental and industrial data (largely from Great Britain), this book is singularly free from traces of intellectual snobbery. It is graced by an intimacy of insight and an intuitive appreciation of persons and personal relations that is as reassuring as it is extraordinary. Its tone here and there might strike one as too positive were there not such conclusive evidence throughout that the author speaks of experiences with common men and of kinaesthetic rather than of mere literary appreciations of the values thus disclosed. Though teeming with quotable passages, this is one book on democracy singularly free from oratory and quite devoid of bunk." T. V. Smith in International jour. ethics

First published 1932 by Liveright. The second edition is a reprint of the 1932 edition with a new preface

"Mr Chamberlain studies the course of liberal thought in America, both in politics and literature, during the last thirty years, from the days of the muckrakers thru the progressivism of the Roosevelt and Wilson eras to the planned economy proposed by Chase, Soule, Beard, and others." Book rev. digest

"This is a volume only for the thoughtful; it is packed with names of people and of books, and with facts, and it has to be read slowly and carefully to get its full meaning. It has its own peculiar vigor, but it makes no concession to the running reader. It shows the results of a great deal of careful reading and hard work, and from its pages may be gleaned an excellent bibliography of liberalism in this country." Books (N.Y. Herald Tribune)

They include the Scopes trial in Tennessee, the Sacco-Vanzetti case, and the cases arising from the suppression of the 'American mercury' and of the play, 'The captive.' All illustrate what the author believes to be a growing disregard for the constitutional rights of liberty—of education, of speech and assemblage, of the press, of residence, and of opinion." "The particular value of this small book lies in the fact that it is a Negro educator's own account of the political progress of his race in America since the Civil War. As if fully aware of the suspicion of bias under which he would labor, he writes with a notable restraint and with constant reference to source material." Current history

"Dr. Raper's method was to select the year 1930, to examine each of the twenty-one cases of lynching which occurred in the United States during that period, and to prepare a careful case history of each one. He supplies not only the best ascertainable facts as to the particular episodes—the alleged crimes, the formation of the mob, the action of peace officers and so on—but a study as well of the historic and economic backgrounds of the counties where the lynchings occurred, the existing racial relations, the attitudes of local leaders, churches and the press." Books (N.Y. Herald Tribune)

"The facts are not taken from biased reports, but from statistics and newspaper accounts published in the vicinity of the operations. Some of the book is gruesome in the extreme, and it is impossible to understand how any people, savage or civilized, could be guilty of the atrocities depicted." Clarence Darrow in Books (N.Y. Large libraries or those especially interested in world affairs will find it useful because of the broad field covered

A reprint with a few introductory remarks to bring up to date some of the educational developments to which reference is made
"Zimmern. . . has been driven in these post-war years to discover just why the modern world is emphatically not an intelligent community. He postulates that man has lost control of his environment and that control over one's environment is the mark of civilization. His book is an inquiry into how we can recapture that control, and his answer is very much the Platonic one that philosophers must rule. The author is in the noble tradition of Liberalism." "This book differs from most of the volumes dealing with American foreign affairs in discussing the subject from the viewpoint of political science. The present work is the outgrowth of a book published in 1922 under the title, 'The conduct of American foreign relations.'" Book rev. digest

"It is comprehensive, solid and penetrating." Pol. sci. quar.

Two useful supplements to Matthews are P. Q. Wright's "Control of American foreign relations" (1922 Macmillan $3.25) which analyzes the powers and duties of the government in foreign relations from the legal rather than the political side, and Arthur Bullard's "American diplomacy in the modern world" (1928 Univ. of Pa. press $1.50; Oxford 6s 6d) which discusses the American position in regard to problems of peace and disarmament

"The word 'behavior' in the title provides the key. Economics is approached not as a body of laws nor as an abstract science, but as a process of behavior. How do we act as individual men, and as social groups, in furnishing ourselves with food, shelter and clothing? What are our folkways, traditions and 'idees fixes' in the processes of production, consumption, banking, investment, foreign trade? How far are we guided by reason, how far by habit? What has the machine actually done to our day-by-day behavior, and what does it propose to do?" Books (N.Y. Herald Tribune)

"By limiting the number of selections, it is possible to reprint complete chapters (the readings average 22 pages in length), thus presenting a unified and adequate treatment of each topic not possible in the short extracts to be found in the usual book of readings. Lest these students be confused, only those topics are discussed 'upon which the science of economics may fairly be said to have reached definite conclusions.' " . . . "This edition is a reprint of the seventh, which was almost a reprint of the sixth, the only changes being in small matters of detail." Preface to the 8th edition

"Among English books, Alfred Marshall's 'Principles of Economics' occupies a peculiarly authoritative position. It is characterized by an unusually intimate grasp of the facts of modern economic life and by a rare degree of ability in critical analysis. It attempts to reconcile many of the modern developments in economic analysis with the fundamental tenets of the political economy of David Ricardo and John Stuart Mill. Marshall's 'Principles' is difficult for any but the mature student." Ely's Outlines of economics

"No writer before Mill had ever surveyed political economy as a whole with anything like equal ability; no one had shown with the same fulness the relation which different parts of the science bore to each other; still less had any one so well explained the relation of this science to other sciences and to knowledge in general." "Though intended as a textbook, this elementary and simply written survey of the principles of economics, embodying as it does many of the more recent developments in economic theory, might well be given attention by busy men outside university walls. The point of view throughout is the reverse of dogmatic, so that the book will appeal to many for its easy-going treatment of questions around which controversy rages." Current history

Essay on the nature and significance of economic science. 1932 Macmillan $3; 7s 6d 330

1 Economics 32-35335

"An important effort to clear the science from a great mass of what the author] believes to be irrelevancies, by simplifying its scope. Gifted with amazing erudition and a trenchant style, which he sometimes uses to buffet his opponents in rather too contemptuous terms, he has produced a work which, though 'caviare to the general' and stiff reading for most, is full of stimulating matter." 1 Economics 23-12171

This edition presents "a pretty thorough rewritting, . . . of the chapters beginning with Chapter XIX and an expansion of the text from 654 to 690 pages. . . . The theoretical chapters have been only slightly altered and I have seen no reason to modify materially the conclusions reached in the chapters on practical problems." Preface to 3d edition

"Prof. Seager is, we believe, typical of the new economist. His book is intensely practical; he regards economic theory as the connecting link between the history of industry and the tasks confronting the social reformer. Mathematical conceptions scarcely enter into his work." Athenæum

He subjects to this remorseless fire the economic theories of Sir Arthur Salter and J. M. Keynes, the free traders, the national planners, Ramsay MacDonald and the British Labor party, and all those other props on which capitalism depends. Mr. Strachey has an enormous range of knowledge, a considerable fund of wit, and a fine crusading eloquence. He has translated Marxism into clear, concrete terms suited to the Anglo-Saxon mind. Veblen, Thorstein Bunde

Absentee ownership and business enterprise in recent times. 1923 Viking press $3; Allen, G. 10s 6d 330.1

1 Economic conditions—1918- 2 Industry—Organization, control, etc. 24-26087

"By 'absentee ownership' Veblen means control of industry and land, not by absent individuals but by business enterprise. Thus, he says that the country town, which shapes public sentiment and gives character to American culture, is itself located and controlled by real estate interests. Theoretical, analytical, iconoclastic and stimulating." Cleveland

"Theory of business enterprise" (1904 Scribner $2) is an earlier book of Veblen's in which may be found good examples of his analysis of current economic institutions. The views expressed here were later expanded or amended in "Vested interests" (class 331) "Engineers and the price system" (class 331) and in "Absentee ownership"

330.4 Essays on economics

"Economic essays and addresses" by A. C. Pigou, and D. H. Robertson (1931 King 10s 6d) is a collection of eleven papers by two eminent Cambridge economists. While most of them are rather specialized, three at least will be of interest to the general reader, especially the series of broadcasting talks by Mr. Robertson on world finance

Contemporary economic problems, by P. F. Gemmill and associates. 1932 Harper $3; 15s 330.4

1 Economics 2 U.S.—Econ. condit. 1918- 3 Economic conditions—1918- 32-17182

"This is not a book of economic principles, nor an ordinary collection of readings, but a book of economic essays, the work of Professor Gemmill and his associates at the University of Pennsylvania. It covers most of the economic problems that are treated in the usual economics text, classified into problems of economic stability, labor, finance, business enterprise, international economics and social waste. Labor problems, business cycles, the agricultural problem, international trade, and economic waste are treated with particular fullness, while little attention is given to value and distribution or to economic reform. . . They offer a wealth of information, well written." Annals Amer. acad.

Dr. Knowles treats the nations separately and in a methodical way. She takes each in turn and describes its development in agriculture, industry, transport and tariff policy. . . It is a pity that Dr. Knowles did not live to complete the work for publication. Here and there signs of incompleteness are evident; but great pains have been spent on her notes, and the loss does not seriously detract from the value of the book." Times (London) lit. sup.

Each one of these nations has its own 'dilemma' beyond a doubt. "The book contains, besides an introduction and a few statistics in an appendix, fifteen chapters each devoted to a special subject, which is reviewed in relation to three countries—Britain, France and Germany—with occasional references to several others, notably Russia. . . Here is obviously a vast field, requiring great economy of space and the omission of much, to bring the whole within reasonable limits. The author must make a selection of facts and state them concisely. On the whole, he does this well, perhaps as well as it can be done." Times (London) lit. sup.

Day, Clive

Economic development in modern Europe. 1933 Macmillan $2.50; 12s 6d 330.94

1 Europe—Econ. condit. 33-6765

"This sketch of the economic development of modern Europe deals with the development of industry and agriculture in England, France, Germany and Russia from the last quarter of the eighteenth century to the present time. Despite the concentration of attention on these primary topics the discussion is severely compressed, as the space is almost equally divided among the four countries. Germany receives the least space, seventy-three pages; England, the most, one hundred and twenty-nine pages. This compression of statement, however, is essentially in keeping with the elementary character of the text." Pol sci. quar.

"The book is written with an admirable simplicity and will, no doubt, prove a useful addition to the libraries of both teachers and students of economic history." Amer. econ. rev.

He considers the difficulties presented by customs walls and political rivalries, economic factors that make for union, the place of Russia in the scheme, etc. Important as an authoritative expression of French opinion." Wis. bul.

"The most valuable parts of this book are those which discuss the economic problems confronting Europe today. In this connection the author quotes at length from a large number of private memoranda not hitherto available to American readers. The work is less satisfactory in its treatment of the relation of the European federation to Russia, the British Empire and the League." Books (N.Y. Herald Tribune)

"Unfortunately, the new edition has not incorporated all that has been added to knowledge since 1901. The author's treatment is always judicious, his presentation lucid, his narrative entertaining. To many of the chapters is prefixed a brief indication of attendant political conditions. The last chapter in the new edition is an admirable account of developments from 1906 to 1920." An outline history of British trade from the eighteenth century to the present, together with a general survey of post war conditions

"Technicalities are completely avoided, the exposition is clear and cogent, rapid summaries of basic points of analysis are frequently introduced, and statistical tables and charts are lavishly scattered through these pages and subjected to illuminating comment. . . New statesman and Nation

According to the author, this survey is in a sense a sequel to his "Next ten years in British social and economic policy" (1929 Macmillan $5.50; 15s) This earlier book, however, deals in large measure with the new social and economic problems to be met by practical socialism in Great Britain

With striking phrases and telling arrays of figures it contrasts the Japan of today, with the Japan of yesterday. The work of twenty-seven collaborators most of whom are connected with the faculties of Southern universities. "All are specialists in the fields of which they write. The area's historical development; its resources in seven industries: textiles, tobacco, lumber, iron and steel, chemical industries, coal, and power; and the status of the four leading states of Virginia, North Carolina, Tennessee, and Alabama are presented in detail. A section on labor views the situation of women and children in industry, the Negro's plight, the source of labor supply, trends in workmen's compensation legislation, and attempts at advancing union organization. Problems of adjustment in agriculture, transportation, banking, taxation, politics, the press, and public opinion are treated in an interpretative section . . . Depression is due primarily to the maladjustments of the machine age and is likely to continue for some time. The specialist in any one of a hundred compartments of human knowledge only really appreciates the lucidity and the compactness of Bogart's method when he comes to the treatment of his own bailiwick. Here are regiments of facts, carefully arranged, and derived to an astonishing extent from original sources, all noted and often evaluated. Here are balance and restraint and (considering the purpose and the subject) a not uninteresting style." Annals Amer. acad.

Translated from the German and published in England under title: Prosperity; myth and reality in American life

"The rather unattractive prosperity that was achieved, through mass production and standardization, in America, its diffusion through all classes through high wages, stock exchange gambling, and consumers' credit, the weaknesses that loomed in the background even when it was at its height, and its appalling crash when it was found that buying stocks to sell them higher up was a game that could not always last forever—all these things will be found most pleasantly and shrewdly described and analysed in [these] pages." Economy of abundance. 1934 Macmillan $2.50 330.973

1 U.S.—Econ. condit. 34-27051

Poverty in the midst of plenty is no paradox, the author insists, but the logical outcome of a system in which the supplying of human needs is only a by-product. This book surveys the field . . . industry by industry, showing the technical potentialities behind estimates and certain important limitations on future expansion." Book preview

First published 1924. In this revision the text has been brought up to date and enlarged by about 70 pages

"The author stresses economic causes and explanations rather more than most economists would. It is obviously intended for a textbook but ought to appeal to the general reader. Many interesting quotations from contemporaries are introduced into the text. The presentation of the subject is aided by a large number of maps, graphs and statistical tables. At the end of each chapter are 'Notes for further reference' and also 'Selected readings' which are properly intended for teaching assignments. The index is unusually adequate." Survey

The plan of the book is somewhat mechanical, and the separate accounts, while doubtless convenient for pedagogical purposes, make it a little difficult at times to see the economic situation of a period as a whole. In part two, dated 1930, Professor Beveridge considers the results of this policy—its successes and failures." Book rev. digest

"Altogether, Sir William Beveridge's new book is a worthy pendant to his original study. It is not, and does not profess to be, based to anything like the same extent upon fresh research of his own. But the situation is now radically different; there is far more material gathered by other students on which he is able to draw. It is more controversial, especially in the section dealing with wages, than his earlier study; and it is a good deal less exhaustive in the method. But it is thoroughly stimulating, masterly in account of what has happened to the unemployment insurance scheme, and often tantalisingly suggestive." New statesman

Times (London) lit. sup.

"Mr Hobson shows that the failure of consumption to keep pace with production is responsible for the periodic gluts, stoppages, under-production and unemployment which cause cycles of depression. On this fact he bases his thesis that it is the unequal distribution of the surplus of unearned income, the disproportion between saving and spending, which brings about trade fluctuations." "As extension lecturer for Brookwood Labor College the author became acquainted with conditions in the South before the outbreak of the strikes, and his work bears the marks of first-hand experience. . . Mr. Tippett's book makes two valuable contributions. In the first place, it tells in great detail and at times very vividly the strike stories. . . In the second place, the author makes an evaluation of the policies and tactics of both the right and left wing unions." World tomorrow

"Mr. Tippett is straightforwardly sympathetic to labor and its aims in the recent and future struggles in the South. . . The book is full of human drama and tragedy. However, its greatest value, to my mind, does not lie in the description of violent, dramatic and tragic incidents, but in the presentation of hard economic facts behind those incidents." L. Adamic in Books (N.Y. Herald Tribune)

"This is not, like the first volume, a direct narrative of settlement development. Social service and the Progressive party, The devil baby at Hull House, Aspects of the woman movement, Efforts for peace during five years of war, Immigrants under the quota—are chapter heads that suggest the scope. Another chapter, A decade of prohibition, is an outstanding contribution to that subject." Wis. bul.

"'Windows on Henry Street' may be counted among the major achievements of Miss Wald. Facts she has in plenty, but it is more than facts that she presents. It is human interpretation and human needs, often tragic and pitiful, but often, also, of the stuff that the laughter of the East Side is made of. Within the covers of this book she has written the story of twenty epochal years that mirror the lives of the great and the humble who have helped fashion the progress of this generation." In this edition "the historical background has been left without revision. The other parts have been condensed in many places in order to add the newer material while many chapters . . . have been . . . entirely rewritten." Preface to 2d edition

A textbook undoubtedly of scientific rank. Its strength lies in its impartial attitude, in the excellent description of the structure of the American federation of labor, and in the extensive discussion of the legal aspect of unionism. Its weakness lies in its lack of emphasis on the psychology of the subject, in its failure to give the reader an acquaintance with the trade unionists as people, or with the spirit of organized labor, its ideals, aims and policies. "These four essays are an attempt to outline the elements of monetary policy in Great Britain in its relation to unemployment. Three of the essays have been previously published, two in the New Leader and one in the New Statesman." Book rev. digest

interesting and enlightening to the academic economist. . . [In this monograph the author] discusses the technique of gold movements under modern conditions, and shows what unreliable planets those once fixed stars the 'gold points,' have become. "We have to regard his work not as a topical contribution to current controversy, but as a scholar's history of the pound sterling from the Middle Ages to 1925. The earlier chapters gather together a good deal of material not otherwise easily accessible. The later largely repeat what has been written before in more than one history of the Bank of England or of British banking. But Mr. Feavearyear seems to have had access in some cases to new sources of information; and his account, even when it is not original, is uniformly clear and lucid. He is especially good in dealing with the monetary controversies of the early nineteenth century." New statesman and Nation

"The book is something of a pioneer in its field. Its author, Harry W. Laidler, is one of the outstanding American students and historians of socialist thought and the socialist movement. It goes without saying that his book is thoroughly competent, It is, moreover, clearly written. Its simplicity of explanation and its illustrations will make the book valuable not only to children and to parents who want their children to know something about socialism, but also to many adults to whom, at least in America, socialism has been made to appear too often as some strange mystery." inadequate and they state the Socialist plan for service. Part 2, Socialist Planning in industry and Politics, indicates what is thought by the various writers to be good constructive planning on the part of the Socialist party. Part 3, Roads to Socialism, points out the way in which the Socialists hope to accomplish their purpose. . . . The book as a whole is well written and embodies the thoughts of many clear-thinking men. It should be of interest to anyone who wishes to inform himself about economic and Socialistic plans." 1 Machinery in industry 2 Power (Mechanics) 3 Economics 33-14278

First published in England 1931

"Mr. Henderson's thesis is that the present economic system has been rendered obsolete and unworkable by the world's advance in productive power, and by the changed technique of modern production. He sees the prevalence of unemployment in the modern world as the inevitable consequence of a huge development in the power to produce, shackled by a method of distribution which causes actual production to remain far in arrear of productive capacity." New statesman and Nation

"The book is moderate in tone and well written, and thereby gains much in persuasiveness. Prices. 1933 Wiley $3.90; Chapman 25s 338.5

1 Prices—U.S. 2 Index numbers (Economics) 3 Currency question—U.S. 33-4972

"Statistical data and other information upon prices, gold, silver and wages in the United States covering a period from about the beginning of the nineteenth century to December, 1932. The authors, both of whom are professors at Cornell university, contend that prices depend on the gold stock and that the depression is owing to a lack of gold. They suggest two ways out: one is deflation or a process of bankruptcies and recapitalization; the other is 'reflation' or devaluating the dollar." Book rev. digest

"The statistical part of the book should be of great value as a companion to the theoretical study of money and prices." Times (London) lit. sup.

This is a searching inquiry into recent trends in the concentration of business under large corporations, with the diffusion of ownership among millions of stockholders and into the law under which this centralization of management has taken place

"Clearly organized, lucid, scrupulously documented. It is seldom one finds such epoch-shattering material clothed in such scholarship." New republic

Max Lowenthal's "The investor pays" (1933 Knopf $2.50) supplements Berle and Means by showing what happens to an investor's money when a corporation passes into the hands of a receiver. The concrete case taken to illustrate his point is the receivership of the Chicago, Milwaukee and St Paul railway

"A detailed analysis of the subterfuges of monopolies during the last 40 years, designed to evade the provisions of anti-trust laws. The author is a firm believer in competition." Pittsburgh

"Dr. Fetter has dipped his pen in poison and written as slashing a criticism of current economic tendencies as I have ever read. The most revered of our institutions—'big business' and the United States Supreme Court—are subjected to a raking crossfire of intellectual scorn." Evans Clark in Books (N.Y. Herald Tribune)

Hoagland, Henry Elmer

Corporation finance. 1933 McGraw $3.50; 21s 338.8

1 Corporations—Finance 2 Corporations 33-13775

"In important respects this book differs in method, emphasis and scope from the traditional text in corporation finance. Illustrative material dealing with the financing of particular corporations is omitted entirely, and the legal aspects of the subject are given very minor consideration. Approximately one-fifth of the space is devoted to short-term financing and internal financial control, separate chapters being set aside for budgets and credit policies. The six chapters of Part 7 deal with social control of corporations. . . In general, the book has merit as a text in spite of its attempted encyclopedic character in parts." Amer. econ. rev.

"Operating aspects of industrial mergers" by W. R. Basset and Johnson Heywood (1930 Harper o.p. 1933) gives more specialized attention to mergers. Of interest to the business man rather than to the general reader

The author suggests a number of reforms—federal incorporation, stricter accounting practice, better trusteeship, more efficient reorganizations, with less exploitation of helpless security holders, and a national holding corporation to provide for the needs of expanding business. . . Prof O'Leary's small volume on the importance of the modern corporation is worth the attention of students of economics." Springfield Republican

* Gentlemen of the jury; reminiscences of thirty years at the bar. 1924 Macmillan $4 340

1 Law—Anecdotes, facetiae, satire, etc. 2 Jury 24-25300

"From his experience of more than a thousand cases tried before juries, the author addresses himself particularly to those jurors who have never been in court before. He deals with the chief elements that the juror has to contend with: the witnesses, the lawyers in the cases, the judges, and the rendering of a verdict. Methods of distinguishing truth from falsehood are explained and the means by which lawyers try to distort or conceal evidence. Many amusing experiences in open court as well as behind the scenes are related." Book rev. digest

"The author makes his volume a handbook in the largest sense, describing first with brevity the circumstances of the League's birth, the methods by which it operates and how it is organized and carried on, and then analyzing the ways in which it functions as a means of international cooperation. In this section, which fills the greater part of the book, Mr Myers takes up successively the various phases of the League's work and outlines the story of what has been done by the League in each phase of work from its establishment down to the end of 1929. Another section tells the full story of what the League has tried to do and has accomplished toward the achievement of peace and security." N.Y. Times

Attempts to answer the questions: What is meant by disarmament? Is it feasible; can it be made practical and effective in terms of honest technical thought? What are the reasoned requirements of disarmament in operation?
"[It] will hardly appeal to those who affect to see in disarmament an easy task, to be achieved at a stroke by such simple devices as blue-penciling items in war budgets or drawing horizontal lines through inventories of war establishments. It will be in the highest degree provocative of thought, on the other hand, to readers who are ready to have the scientific complexities of the undertaking expounded to them by a writer who is himself a scientist as well as a military authority." There is an introductory discussion of the evolution of sea-power and of the theory of naval supremacy, but the larger part of the volume is taken up with a review and analysis of the various post-war conferences and with a discussion of the advantages of action through the League. The author is convinced that theories of sea-power are outworn, and that the future can be secured only through pacific methods. . . A timely and substantial volume." Foreign affairs

Government of the people; a study in the American political system. 1933 Harper $4; Hamilton, H. 18s **342.73**

1 U.S.—Pol. & govt. 33-24369

Published in England with title: American political system

"Mr. Brogan displays in this remarkable book a knowledge of American men and affairs. The ground he covers can be indicated by the headings of some of the eleven parts into which the book is divided: these include 'The Origin and Character of the Parties,' 'The President,' 'Congress,' 'The Spoils System,' 'The Pension System,' 'The Machine,' 'Conventions and Candidates,' 'The Campaign.' The subject being the machinery of party, the writer makes no pretence of rewriting Bryce, or of explaining the legalities of the Constitution." New statesman and Nation

"Mr. Brogan has made a purely political study covering nearly the same ground as Bryce's American Commonwealth; and, in this challenging comparison with that classic work, the praise he earns in his task is that his volume is not unworthy of its predecessor." Spectator

"Written by an observer with extraordinary range and keenness of vision, with sympathetic interest, and with great powers of lucid and interesting exposition; marked an epoch in the description of American institutions; still remains the most brilliant and authoritative study of the American government. The exposition of the workings and spirit of the governmental organization is remarkable for its insight and clearness. Of special significance is the discussion of the less formal characteristics of government, such as the party system, public opinion, and the social forces conditioning the operation of the governmental system." * Dissenting opinions of Mr Justice Holmes. 1929 Vanguard press $4.50 **342.73**

1 U.S.—Constitutional law 29-30420

Mr. Alfred Lief, the editor "has selected, and grouped effectively, those opinions which reveal, through flashing epigram and sparkling phrase, the keen intellectual penetration of a man whose knowledge of law is broadened by his philosophy of life and his insight into the workings of social and economic forces. . . The flavor of belles-lettres, natural enough in a son of the Autocrat of the Breakfast Table, everywhere pervades his legal writings. The dull and technical citation of cases yields to passages which show a rare sensitiveness to beauty and appreciation of art and literature. A copyright case contains revealing references to Goya, Degas, Manet. A case involving the price of theatre tickets furnishes an opportunity to contrast American culture with that of France." N.Y. "This present footnote to history is singularly calm for a conviction so firmly held. It seems to say that we have had enough eloquence on either side: let us now have what did happen and by what dogged industry it was discovered. . . Most of the book is just a record of evidence in the case that never got to court—the case of Massachusetts against the South Braintree murderers. Hays, Arthur Garfield

Trial by prejudice. 1933 Covici $2.50 343

1 Trials 2 Justice, Administration of 33-23817

"The theme of the book is the 'thirteenth juror,' the part that prejudice plays in trials where mass emotions are involved, by reason of the race, color, religion, politics or opinions of the defendant. The introduction is followed by accounts of notorious cases where prejudice has caused an unjust verdict—the Scottsboro, Mooney and Billings, and Sacco-Vanzetti cases, the Centralia and Gastonia affairs, the case of Leo Frank, and others." Book rev. digest

"The candid reader is convinced of the author's essential fairness. The title of the book only is misleading. This puts the reader on guard, leads him to expect a one-sided and biased attack upon our legal institutions. But Mr. Hays is in no sense a fanatic. He is a practical idealist with his feet on the ground; and his observations and reflections are shot through with a disarming suavity and maturity of judgment which make his mildest criticism more effective than another man's invective." 1 U.S.—Pol. & govt. 2 State governments 3 Local government—U.S. 32-11597

"In the main, this volume represents a condensation of [the authors'] 'Introduction to American Government,' the fourth edition of which was published in 1931. The opportunity has been seized, however, not only to rewrite many portions and to give suitable attention to various developments since the larger book was issued . . . but also to introduce some changes of arrangement which have seemed desirable. One of the resulting new features is a separate chapter on foreign relations and defense." Preface

"For those who seek a briefer text and one in which primary emphasis is placed upon the presentation and explanation of factual data, leaving interpretation and philosophizing largely to the teacher, this abridged edition will have a decided appeal." Amer. pol. sci. rev.

"A contribution to social education from the standpoint of society rather than that of education. It is written in text-book style, for college students, and is easy to understand. As Professor Cubberley says in his introduction, it deals not only with theory, but affords 'a social interpretation of our modern educational progress.'" W. D. Lane in Survey

1 Educators 2 Education—Philosophy 3 U.S.—Civilization 33-30739

"A critical review of the social attitudes of 17 contemporary leaders in American education—Dewey, Horne, Morrison, Bagley, Cubberley, Briggs, Finney, Judd, Snedden, Thorndike, Horn, Charters, Bobbitt, Counts, Rugg, Bode, Kilpatrick. Its very nature is controversial. It judges men of established reputation in the light of their writings and theorizings upon education—and never was there less unanimity of opinion upon that subject. It judges them, furthermore, from a very definite point of view, that of liberal realism. First is outlined the contemporary scene; it is a picture of divided loyalties and ideals. Against this background, one by one, are thrown the images of the educators. Last of all, we have the author's own recommendations." N.Y. State educ. dept.

Our schools have been organized for the benefit of the teachers instead of the students. That is to say, our whole teaching technique has followed the logical lines of the teacher's organization of the subject-matter in his field. In a small volume he now presents the basic principles of this system and the manner in which it is applied in important elementary-school subjects. He also describes the procedure employed in 'group activities,' to which one-half of each school day is devoted. . . The author writes like a master of his subject. 1 Mental tests 2 Grading and marking (Students) 26-8089

"A handbook on the construction and uses of non-standard tests for the classroom teacher." Subtitle

"The writer finds that the traditional school examination is based so largely on the subjective judgment of the examiner and is usually so narrow in test range that it is difficult to obtain reliable results. Standard tests, on the other hand, are somewhat difficult to score and interpret, besides being relatively high in cost. Teachers' classroom tests or nonstandard tests which are described in this manual are readily devised and used, and retain many of the advantages of the standard tests as well as some of the better qualities of the traditional school examinations." N.Y. school bul.

Tests and measurements. 1928 Silver $3 371.26
1 Mental tests 2 Grading and marking (Students) 28-19307

"Tests and Measurements have been treated in most books as a separate and distinct entity in the field of education. The plan of this book is to bring together the objectives of the teaching of a particular subject and the measurement of the results of this teaching in so far as these results can be measured in the achievement of pupils. . . A second contribution . . . is the help that it gives the teacher in the use of standard tests to diagnose pupil difficulties and to suggest remedial measures." Preface

"The volume consists of forty-four contributions on various aspects of character in relation to physical education, the symposium taking place at Stanford and New York University, although there are some 'armchair contributions' from other centers. The motivating idea seems to have been two-fold: (1) the determination of criteria for attaining the recognized goal of character education through athletics and the activities program generally; and (2) the assembling of illustrations of successful application of principles evolved. . . The volume should be of engrossing interest to schoolmen generally and to all those who think about the physical well-being of children in its largest terms." Boston Transcript

The chapters on 'Disciplinary control,' 'Extra-classroom activities,' and 'Training in ethical character' are a valuable contribution on adolescence, and should be read by all who are working with young people. Psychology of secondary education. 1927 Ginn $2.20; 12s 6d 373

"In the Preface . . . the author points out that it is virtually a new work. Even cursory examination by one who is acquainted with its predecessor, 'Psychology of High-School Subjects,' published in 1915 and now to go out of print, will substantiate the statement. The impression of a practically complete re-writing is given by a comparison both of the chapter organization and of the internal treatment of the subject matter proper in the older and newer books. In reading the chapter titles, one finds at least ten in the new book unrepresented in the old. . . The older book did much to fill a void for principals and teachers in secondary schools in 1915. The present book is suited to rendering an even larger service." L. V. Koos in School rev.

The foreword by John Bauer is illuminating and adds to the general value of the book. . . An honest and thorough piece of research. . . Then comes a description of the holding company in that group and a well-balanced discussion of its advantages and disadvantages for that utility. "The St. Lawrence waterway, the improvement of the Mississippi to help navigation and diminish floods, the project for a sheltered coastal waterway from Boston to Miami, as well as less feasible and plainly absurd schemes are discussed with learning, remarkable objectivity, and a sense of humor, making this book a readable and valuable contribution to American economic geography." 387 MERCHANT MARINE

Anderson, Romola, and Anderson, R. C.
The sailing-ship; six thousand years of history. 1926 McBride $3.50; Harrap 7s 6d 387

1 Ships 2 Clipper-ships [27-26099]

"There has not hitherto been easily available in English a concise summary of the latest knowledge [of sailing ships] written with an understanding of evidence and a minimum of speculation. This lack is now supplied, and it could hardly have been done better. The authors of 'The Sailing Ship' use the simplest English and avoid technical terms with a restraint rare in nautical writers." Times (London) lit. sup.

"Six thousand years of history is a big span to encompass in a volume of about 200 pages, and the authors get over it by disposing of 4,000 years in the first chapter, leaving 2,000 years for the rest of the book, later developments, naturally, being treated at some length. There are some excellent illustrations of all types of vessels, and the book presents a very interesting sketch of the development of the sailing ship, taking us right up to the American six-masted schooner and the peculiar five-masted rig of some modern German vessels." Shipbuilding and shipping record

Also available from Cape, J. in a cheaper edition at 3s 6d

"A book about ships and seafaring. Its purpose is 'to familiarize the reader with the outward appearance of representative types of vessels.' Four pictures in color and many others in black and white. Should be of interest to boys and all readers of sea stories. Has glossary of sea terms." Wis. bul.

"It is one of many services rendered by this book that it should enable the passenger to answer a number of his own questions for himself, and, if that is his bent, to pose as an authority. Properly constituted boys know something of flags and funnels, for those who cater for them supply tables in which they are set forth. Mr. Bone is not much concerned with these mechanical aids; he points out how a ship may be put in her class without the help of a crib." Times (London) lit. sup.

"A detailed review of the dress of the upper classes, civilian and military, from the Norman conquest to the beginning of the nineteenth century. [Each volume] is divided into two parts—civilian costume and armor. The drawings include every article of clothing including such minor accessories as gloves, belts, corsets, shoes, straps, buckles, fasteners, etc." Book rev. digest

"Within the limits set by length and price it is undoubtedly the best book of its kind that has yet appeared . . . A word is due to the illustrations themselves. Their number alone is impressive—over two hundred drawings, sixty-four pages of half-tones, and nine colour plates —but even more so is their quality. The selection of contemporary works of art is refreshingly individual, the drawings are lively and exact. Taken all together they make a picture-gallery of the past that will delight the ordinary reader almost as much as it will profit the student." Times (London) lit. sup.

The unpretentious simplicity of style, almost classic in its absence of artificialities, is admirably adapted to the subject matter, and the twenty-two graceful silhouettes by Joseph Cranston Jones embody and intensify these same delightful qualities. . . The folklorist will find rich material in the hundred and fifteen superstitions and the eight folk tales." N. N. Puckett in Sat. rev. of lit.

Your language. 1930 Appleton-Century $1.20; 4s 6d **401**

1 Language and languages 30-15309

"A textbook on the rise and development of language, written in a manner which makes it available for use in upper grades of the elementary school or in the junior high school." Book rev. digest

"A well-conceived textbook. The child's interest in his own tongue and its probable development . . . is aroused by the posing of introductory questions to be answered in the course of study. Throughout the eighteen chapters of the book the author never becomes too technical, although he deals with the emergence of intelligent speech from mere animal noises, the use of gesticulation, the beginning of writing and records, the formation of language families, and the changes brought about in word-meanings." Times (London) lit. sup.

Graff, Willem Laurens

Language and languages. 1932 Appleton-Century $4; 18s **401**

1 Language and languages 32-30388

"A general introduction to the scientific study of language, dealing with fundamental concepts and organization and explaining what language is, how it originated, how it changes, etc. The author, tho writing for the general reader and student, has not attempted to overpopularize his subject at the expense of an exact, technical terminology. The book is furnished with a glossary, a linguistic map of the world, bibliography and index." Book rev. digest

"A comprehensive and well-written textbook. . . . Professor Graff's work differs from those already extant chiefly in the amount of space devoted to phonetics and the problem of meaning in language. These two subjects are fully discussed and form a very useful part of the book." American journal of sociology

"The book is a model of method, written with clearness and ease. . . . There could be few books more fundamentally useful to the American teacher than this brilliant exposition of the teaching of [illegible]ther tongue." New republic

Julien Bezard's "My class in composition; a teacher's diary; tr. by Phyllis Robbins" (1923 Harvard univ. press $2.50; Oxford 12s 6d) illustrates Mr Brown's book as it is a French teacher's enthusiastic day-by-day record of assignments, suggestions, and criticisms

"Contains a compilation of the most helpful ideas selected from numerous sources, principally from the publications fostered by the [Modern foreign language] study." Preface

"Gathers together in one well-organized volume all the significant investigations in the special field of modern foreign language teaching and evaluates, correlates, and interprets them for the use of teachers, supervisors, and administrators. The author has not been content merely to collect and review the literature in the field of language-teaching, but, using scientific investigation as a basis wherever possible, he discusses fully all the problems related to classroom teaching of the modern foreign languages. . . . A list of problems for study and discussion and an annotated bibliography at the end of each chapter make the book an ideal textbook for special-methods courses." School rev.

An introduction deals with earlier work of the 16th, 17th and 18th centuries, and one chapter is on the history of writing and the origin of the alphabet

1 Alphabet 2 Writing—Hist. 16-2050

First published 1900

Traces the development of writing from picture writing to phonetic symbols, with special emphasis on the common primitive forms and concepts from which the modern alphabets have been derived. Adapted from the Preface

"Story of writing" prepared by the American council on education (1933 The committee pa 20c) in the Achievements of civilization series, is "an attractive and intelligent short presentation of the whole story [of the origin of writing and the formation of the alphabet]. The 'Story' stops short with the establishment of a definite alphabet; [B. L. Ullman's 'Ancient writing and its influence' (1932 Longmans $1.75; Harrap 5s)] takes up the story from then on, recording the changes of the alphabet until the invention of printing. . . "This edition has been completely rewritten. It incorporates the results of my experience during the last eighteen years, since the book was originally prepared. . . The improvements have resulted in a considerable enlargement of the book, and it has been found necessary for reasons of economy to omit certain matter which figured in the original edition, and notably the rules of word-stress and most of the parts relating to experimental phonetics." Preface to the third edition
